It works better than the 70' random wire, which used the same space. I can listen to Mike Brown on KOA now. The HFBC is still annoying for the most part. I like the eschatologist on 9980.

WWV/WWVH still my favorites, and have been for almost 50 years.

WWV/WWVH still my favorites, and have been for almost 50 years.

And even those have changed format several times over the decades. Remember when they used to ID in Morse? I can hear WWVH on occasion on 5, 10 and 15 MHz, fighting with a Chinese frequency standard station (used to think it was JJY) WWVH is pretty easy to identify in the mess, though, since the Chinese station only has the tick-tick-tick, whereas there is other modulation, including the ID and weather that is easy to copy over the ticks.

Satellite ISP.When I cancel my AT&T SUCKS! land line, how would
satellite switch to dial up for me?

Satellite DirecTV service I have, the longest time (stormy weather) my
DirecTV service went out was about 12 to 15 minutes untill the weather
in the Southwest cleared up Good enough for my DirecTV service to start
working real Good again.There have been times before when my AT&T SUCKS!
SUCKS! SUCKS! land line QUIT working at all for up to about Two Weeks
untill an AT&T repairman could get over here and repair it for me.There
have been a few times before when rain caused my AT&T land line to Quit
working at all for a week or more.

Anything,,, ANYTHING Beats AT&T SUCKS those nasty thangs a Million Miles
Long! EFF AT&T SUCKS!!!!!!!

I never, but Never! have any important files/documents/anything online
which I would want to save, Period! Look at where I am right now,,,,,,
cruzing around in rec.radio.shortwave on the WWW.Where was I just before
my bright shiney arse showed up in here, you may ask? (go ahead and ask)
I was in the rec.autos.tech newsgroup,,,, online.

Thanks for listening to my Rant.

Why don't you research why Canaduh is determined to destroy Western culture? Get back to us when you find the answer and not before boy.

Listening to Radio Canada International a few nights ago I was surprised to learn that China, India and Pakistan lead the list of immigrants to Canada for the fifth straight year.
"Canada welcomed the highest number of immigrants in more than 50 years by admitting 280,636 permanent residents in 2010. This new number is about 60,000 higher than the average annual intake of permanent residents in recent years, according to a statement by Immigration and Citizenship Canada. Canada has admitted between 240,000 and 265,000 immigrants annually in recent years."
http://economictimes.indiatimes.com/news/news-by-industry/services/tr...

And as always, boycott Canada. At least one dufus lives there, and who knows how many other dufei are running loose up there.

On a different note,
http://www.devilfinder.com/find.php?q=Cell+Towers

Lemme see here, devilfinder.com Cell Phone Towers in Jackson,Mississippi

It is 275 of my foot steps to the front entrance of the Sears store at Metrocenter Mall.If I walk from doggy's front yard to the main entrance door of the mall an on through to the back of the mall and on across that part of the parking lot to that cell phone tower, (I am not dumb enough to actually get within forty of fifty feet of that cell tower.There is a fence around it anyway) I guesstimate a little less than 275 of my foot steps.I know that cell tower is a little less than one quarter of a mile from doggy's front yard, in a straight line.Would one, or both of my WiFi radios work?

.
D'Oh ! : Which Part of . . .

HD-Radio Listeners Using HD-Radios Do Not Hear
"The Hash/Buzz" DID YOU NOT UNDERSTAND !?!

The Receiver Dictates What You Hear
HD-Radios are Digtila Signal Processors and NOT
Analog Noise Amplifiers -yes-it-is-that-simple-

-and- With an HD-Radio YOU DO NOT HEAR
"The Hash/Buzz" When You Are Turned To A Radio
Station You Want To Hear KCBS-AM @ 740 kHz
is KCBS-AM @ 740 kHz -hint- You do not tune to
745 & 750 kHz to hear 740 kHz -yes-it-is-that-simple-

-rule-number-one-
Think Like The Average {Normal} Radio Listener
-not- A Radio Fanatic & Techie with an Agenda
.
-by-then-
.
Phase Two of IBOC HD-Radio Implementation :
{Years 6~10}
Still a Mixture of Analog and IBOC Digital Broadcasters
with a mixture of Analog and HD-Radio Receivers :
Still the Analog Radio Listeners* Notice "The Hash/Buzz"
-but- HD-Radio Listeners Using HD-Radios Do Not
Hear "The Hash/Buzz"
* Radio Listening is mostly now Local still with some
Distant Radio Station Listening.

- It works better than the 70' random wire,
- which used the same space.

Dave : Egg-Zak-Lee !

In the same Square Space :

The Longest Random/ Long Wire Antenna is
a Diagonal = 1.414

Where as a Wire [Perimeter] 'Loop' Antenna
is an all around Square {Loop} = 4.000

Which is 2.829 Times the Wire in the Air :
All Other Things Being =Equal=

~translation~
More Signal {More Wire In-the-Air}
Same/Less Noise {Balanced Antenna}
-result- Over-All Better S/N Ratio

The space being 10' above the ground from the back wall of my yard to the front of my house (I don't build antennas in the front of the house). I am using the same fiberglass pole at one corner, and the same treated 2 by 2 pole at the opposite corner that defined the random wire. I have added another pair of corners.

Why should they? Americans and British are invaders.

Apparently, by the reports, they drive themselves.

Steve, you've been lying since you came on this newsgroup. And your constant bullying and bending the truth show you for the low-life you truly are. One example: Your nonsensical lies about my graduate transcript at Wayne State. You called me a liar for saying I had a 4.0 GPA. Even claimed to have got someone on the phone to say that wasn't true. Just shows how deceitful you really are. Example: Calling my employers and saying silly things about me. That's got them so concerned that they removed all faculty and staff photos from the college's web page for safety reasons. You are the exact type of person that justifies the creation of cyber-bullying and cyber-libel laws. Example: Complaining about people sucking social services from the gov't, when that's how you (and Kevin) stay alive. Proves your incredible hypocrisy.

You call everyone else the names that really fit you best! You may be the saddest excuse for a human on the entire planet.

I don't drive my 1914 T Model Ford car either.If if hit a Dangerous Walmart store, all it would do is go 'bump' just like those bumper cars when the Missy State Fair is in town.

That woman who's car ran into that Walmart store in Ridgeland yesterday, she suffered a seizure/heart attack.She was taken to a hospital, they said she will be alright.

Success!

Earlier this morning (March 3), I copied the beacon packet from FASTRAC 2. It wasn't a very close pass, about 700 km at nearest approach, they are running 1 watt and I was using a zero gain, omnidirectional antenna.

Also copied a lot of ham digipeater packet chatter from several passes of the International Space Station, which is also on the same frequency, 145.825 MHz and apparently running a bit more power.

I certainly don't recall anything about asking about your GPA at Wayne State. I called, only asking if you had received a PhD from Wayne State as you had claimed.

The nice woman, who had to go to another building to retrieve your records, laughed, and said no, you received no PhD.

> Just shows how deceitful you really are. Example: Calling my
> employers and saying silly things about me.

Silly was the fact that you claimed to have a PhD, 'tard boy?

> That's got them so
> concerned that they removed all faculty and staff photos from the

When did they do that? I've not talked to anyone at Backwater U. for many, years now.

> You are the exact type of

Guess you'd better call that lawyer, eh, 'tard boy?

> Example: Complaining about people sucking social services from

I 'suck' the Social Security Benefits that I PAID FOR via payroll deduction.

You prove your incredible stupidity everyday, 'tard boy.

> You call everyone else the names that really fit you best! You may be
> the saddest excuse for a human on the entire planet.

Sad is a lying academic 'tard boy, such as yourself.

Steve,

That's nonsense. I said I did not have the PhD long before that! So,
if I prove you did say she said something about my GPA would you admit
that you just lied now?
Could you admit? I think we know that answer...

2189. instructor's solutions manual for Statics and Mechanics of Materials by Bedford, Fowler, Liechti

Newsgroup: rec.radio.shortwave

I have solutions manuals to all problems and exercises in these textbooks. To get one in an electronic format contact me at: ronaldmanualsea(at)gmail(dot)com and let me know its title, author and edition. Please this service is NOT free.

instructor's solutions manual for A First Course in Differential Equations (7th ed.) Zill & Diferential Equations (5th ed.)Zill & Cullen
instructor's solutions manual for A Course in Game Theory by Osborne, Rubinstein
instructor's solutions manual for Multivariable Calculus, 4th Edition, JAMES STEWART
instructor's solutions manual for A Course in Modern Mathematical Physics by Peter Szekeres
instructor's solutions manual for A Course in Ordinary Differential Equations by Swift, Wirkus
instructor's solutions manual for A First Course in Abstract Algebra (7th Ed., John B. Fraleigh)
instructor's solutions manual for A First Course in Differential Equations - The Classic Fifth Edition By Zill, Dennis G
instructor's solutions manual for A First Course In Probability 7th Edition by Sheldon M. Ross
instructor's solutions manual for A First Course in Probability Theory, 6th edition, by S. Ross.
instructor's solutions manual for A First Course in String Theory, 2004, Barton Zwiebach
instructor's solutions manual for A First Course in the Finite Element Method, 4th Edition logan
instructor's solutions manual for A Practical Introduction to Data Structures and Algorithm Analysis 2Ed by Shaffer
instructor's solutions manual for A Quantum Approach to Condensed Matter Physics (Philip L. Taylor & Olle Heinonen)
instructor's solutions manual for A Short Course in General Relativity 2e by J. Foster and J. D. Nightingale
instructor's solutions manual for A Short Introduction to Quantum Information and Quantum Computation by Michel Le Bellac
instructor's solutions manual for Accounting Principles 8e by Kieso, Kimmel
instructor's solutions manual for Accounting principles 8th Ed by Weygandt
instructor's solutions manual for Accounting, 23 Ed by Carl S. Warren, James M. Reeve, Jonathan Duchac
instructor's solutions manual for Adaptive Control, 2nd. Ed., by

Astrom, Wittenmark
instructor's solutions manual for Adaptive Filter Theory (4th Ed., Simon Haykin)
instructor's solutions manual for Advanced Accounting 10E international ED by Beams , Clement, Anthony, Lowensohn
instructor's solutions manual for Advanced accounting 9th Ed by Hoyle, Schaefer
instructor's solutions manual for Advanced Calculus Gerald B. Folland
instructor's solutions manual for Advanced Digital Design with the Verilog HDL by Michael D. Ciletti
instructor's solutions manual for Advanced Dynamics (Greenwood)
instructor's solutions manual for Advanced Engineering Electromagnetics by Constantine A. Balanis
instructor's solutions manual for Advanced Engineering Mathematics 3rd ed zill
instructor's solutions manual for Advanced Engineering Mathematics 8Ed Erwin Kreyszig
instructor's solutions manual for Advanced Engineering Mathematics by Erwin Kreyszig, 9th ed
instructor's solutions manual for Advanced Engineering Mathematics, 6th Edition by Peter V. O'Neil
instructor's solutions manual for Advanced Engineering Mathematics,2E, by Zill, Cullen
instructor's solutions manual for Advanced Engineering Thermodynamics, 3rd Edition by Adrian Bejan
instructor's solutions manual for Advanced Financial Accounting by Baker
instructor's solutions manual for Advanced Financial Accounting 5 Ed by Baker
instructor's solutions manual for Advanced Industrial Economics by Martin
instructor's solutions manual for Advanced Industrial Economics, 2nd ED Stephen Martin
instructor's solutions manual for Advanced Macroeconomics 2nd edition by David Romer
instructor's solutions manual for Advanced Macroeconomics, by David Romer
instructor's solutions manual for Advanced Modern Engineering Mathematics 3rd Ed Glyn James
instructor's solutions manual for Advanced Modern Engineering Mathematics, 3rd Ed., by G. James
instructor's solutions manual for Aircraft Structures for Engineering Students (4th Ed., T.H.G. Megson)
instructor's solutions manual for Algebra & Trigonometry and Precalculus, 3rd Ed By Beecher, Penna, Bittinger
instructor's solutions manual for Algebra Baldor
instructor's solutions manual for Algebra-By Thomas W. Hungerford
instructor's solutions manual for Algorithm Design (Jon Kleinberg & Ã %va Tardos)
instructor's solutions manual for An Interactive Introduction to

Mathematical Analysis 2nd E (Jonathan Lewin)
instructor's solutions manual for An Introduction to Database Systems (8th Ed., C.J. Date)
instructor's solutions manual for An Introduction to Economic Dynamics by Ronald Shone
instructor's solutions manual for An Introduction to Modern Astrophysics (2nd Ed., Bradley W. Carroll & Dale A. Ostlie)
instructor's solutions manual for An Introduction to Numerical Analysis By Endre Süli,David F. Mayers
instructor's solutions manual for An Introduction to Ordinary Differential Equations (James C. Robinson)
instructor's solutions manual for An Introduction to Signals and Systems by John Stuller
instructor's solutions manual for An Introduction to Stochastic Modeling 3rd Ed by Taylor, Karlin
instructor's solutions manual for An Introduction to the Finite Element Method (3rd Ed., J. N. Reddy)
instructor's solutions manual for An Introduction to Thermal Physics by Schroeder, Daniel V
instructor's solutions manual for An Introduction to Thermodynamics and Statistical Mechanics (2nd Ed, Keith Stowe)
instructor's solutions manual for Analog Integrated Circuit Design, by Johns, Martin
instructor's solutions manual for Analysis and Design of Analog Integrated Circuits (4th Edition) by Gray , Lewis , Meyer
instructor's solutions manual for Analysis With an Introduction to Proof 4th E by Lay
instructor's solutions manual for Analytical Chemistry, Higson
instructor's solutions manual for Analytical Mechanics 7E by Grant R. Fowles, George L. Cassiday
instructor's solutions manual for Antenna Theory 2nd edition by Balanis
instructor's solutions manual for Antennas for All Applications (3rd Ed., John Kraus & Ronald Marhefka)
instructor's solutions manual for Applied Calculus for the Managerial, Life, and Social Sciences, 7 E, by Soo T. Tan
instructor's solutions manual for Applied Econometric Time Series, 2nd Edition by Enders
instructor's solutions manual for Applied Finite Element Analysis 2ed, by LJ SEGERLIND
instructor's solutions manual for Applied Fluid Mechanics (6th Ed., Mott)
instructor's solutions manual for Applied Linear Regression 3rd Ed by Sanford Weisberg
instructor's solutions manual for Applied Numerical Analysis, 7th Edition, by Gerald, Wheatley
instructor's solutions manual for Applied Numerical Methods with MATLAB for Engineers and Scientists(Steven C. Chapra)
instructor's solutions manual for Applied Partial Differential Equations (4th Ed., Haberman)

instructor's solutions manual for Applied Partial Differential Equations by J. David Logan
instructor's solutions manual for Applied Quantum Mechanics (A. F. J. Levi)
instructor's solutions manual for Applied Statistics and Probability for Engineers (2nd Ed., Douglas Montgomery & George Runger)
instructor's solutions manual for Applied Statistics and Probability for Engineers (3rd Ed., Douglas Montgomery & George Runger)
instructor's solutions manual for Applied Strength of Materials (4th Ed., Mott)
instructor's solutions manual for Applying Maths in the Chemical and Biomolecular Sciences, Beddard
instructor's solutions manual for Artificial Intelligence A Modern Approach 2e by Russell, Norvig
instructor's solutions manual for Artificial Neural Networks by B. Yegnanarayana and S. Ramesh
instructor's solutions manual for Assembly Language for Intel-Based Computers (3rd Edition) by Kip R. Irvine
instructor's solutions manual for Auditing and Assurance Services- An Integrated Approach 12E by Arens
instructor's solutions manual for Auditing and Assurance Services, 12th edition, Alvin A Arens, Randal J Elder, Mark Beasley
instructor's solutions manual for Auditing and Assurance Services, 13 ed by Arens, Elder, Beasley
instructor's solutions manual for Auditing and Assurance Services, 2nd Ed by Louwers
instructor's solutions manual for Automatic Control Systems 9 Ed by Kuo, Golnaraghi
instructor's solutions manual for Automatic Control Systems, 8E, by Kuo, Golnaraghi
instructor's solutions manual for Basic Electrical Engineering By Nagrath, D P Kothari
instructor's solutions manual for Basic Electromagnetics with Applications by Nannapaneni Narayana Rao
instructor's solutions manual for Basic Engineering Circuit Analysis, 7th Ed by David Irwin
instructor's solutions manual for Basic Engineering Circuit Analysis, 8th Edition by J. David Irwin, R. Mark Nelms
instructor's solutions manual for Basic Heat and Mass Transfer by A. F. Mills
instructor's solutions manual for Basic Probability Theory by Robert B. Ash
instructor's solutions manual for Bayesian Core by Christian P. Robert and Jean-Michel Marin
instructor's solutions manual for Bioprocess Engineering Principles (Pauline M. Doran)
instructor's solutions manual for Business Statistics - Decision Making 7th E by David F. Groebner
instructor's solutions manual for C++ for Computer Science and Engineering by Vic Broquard

instructor's solutions manual for C++ How to Program 3rd edition - Deitel
instructor's solutions manual for CALCULO VECTORIAL 7th Ed. by Louis Leithold
instructor's solutions manual for Calculus - Early Transcendentals, 6th E, by Anton, Bivens, Davis
instructor's solutions manual for Calculus - Early Transcendentals, 7E, by Anton, Bivens, Davis
instructor's solutions manual for Calculus - Late Transcendentals Single Variable, 8th Ed by Anton, Bivens, Davis
instructor's solutions manual for Calculus (9th Ed., Dale Varberg, Edwin Purcell & Steve Rigdon)
instructor's solutions manual for Calculus 2nd edition-M. Spivak
instructor's solutions manual for Calculus A Complete Course 6th Edition by by R.A. Adams
instructor's solutions manual for CALCULUS An Intuitive and Physical Approach 2nd ed by Morris Kline

instructor's solutions manual for Digital Signal Processing Principles, Algorithms and Applications, 3rd Edition by John G. Proakis
instructor's solutions manual for Digital Signal Processing 4th Ed by Proakis, Manolakis
instructor's solutions manual for Digital Signal Processing a computer based approach (2nd Ed.) (Mitra)
instructor's solutions manual for Digital Signal Processing a computer based approach (Mitra)
instructor's solutions manual for Digital Signal Processing by Proakis & Manolakis
instructor's solutions manual for Digital Signal Processing by Thomas J. Cavicchi
instructor's solutions manual for Digital Systems - Principles and Applications (10th Ed., Ronald Tocci, Neal Widmer, Greg Moss)
instructor's solutions manual for Discrete and Combinatorial Mathematics 5e by Ralph P. Grimaldi
instructor's solutions manual for Discrete Mathematics (6th Ed., Richard Johnsonbaugh)
instructor's solutions manual for Discrete Mathematics (6th Edition) by Richard Johnsonbaugh
instructor's solutions manual for Discrete Random Signals and Statistical Signal Processing Charles W. Therrien
instructor's solutions manual for Discrete Time Signal Processing, 2nd Edition, Oppenheim
instructor's solutions manual for Discrete-Time Signal Processing 3rd ed by Oppenheim, Schafer
instructor's solutions manual for DSP First A Multimedia Approach- Mclellan, Schafer & Yoder
instructor's solutions manual for Dynamic Modeling and Control of Engineering Systems 2 E T. Kulakowski , F. Gardner, Shearer

instructor's solutions manual for Dynamics of Flight- Stability and Control, 3rd Ed by Etkin, Reid
instructor's solutions manual for Dynamics of Mechanical Systems by C. T. F. Ross
instructor's solutions manual for Econometric Analysis, 5E, by Greene
instructor's solutions manual for Econometric Analysis, 6E, by Greene
instructor's solutions manual for Econometrics of Financial Markets, by Adamek, Cambell, Lo, MacKinlay, Viceira
instructor's solutions manual for Econometrics, 2nd edition by Badi H. Baltagi
instructor's solutions manual for Econometrics: A Modern Introduction (Michael P. Murray)
instructor's solutions manual for Electric Circuits (7th Ed., James W Nilsson & Susan Riedel)
instructor's solutions manual for Electric Circuits (8th Ed., James W Nilsson & Susan Riedel)
instructor's solutions manual for Electric Machinery 6th ed. A.E. Fitzgerald,Kingsley,Umans
instructor's solutions manual for Electric Machinery and Power System Fundamentals (Chapman)
instructor's solutions manual for Electric Machinery Fundamentals (4th Ed., Chapman)
instructor's solutions manual for Electric Machines Analysis and Design Applying MATLAB,Jim Cathey
instructor's solutions manual for Electric Machines By D. P. Kothari, I. J. Nagrath
instructor's solutions manual for Electrical Engineering Principles and Applications (3rd Ed., Allan R. Hambley)
instructor's solutions manual for Electrical Engineering Principles and Applications (4th Ed., Allan R. Hambley)
instructor's solutions manual for Electrical Machines, Drives and Power Systems (6th Ed., Theodore Wildi)
instructor's solutions manual for Electromagnetic Fields and Energy by Haus, Melcher
instructor's solutions manual for Electromagnetics Problem Solver (Problem Solvers) By The Staff of REA
instructor's solutions manual for Electromagnetism. Principles and Applications by LORRAIN, PAUL ; CORSON, DAVID
instructor's solutions manual for Electromechanical Dynamics Part 1, 2, 3 by Herbert H. Woodson, James R. Melcher
instructor's solutions manual for Electronic Circuit Analysis, 2nd Ed., by Donald Neamen
instructor's solutions manual for Electronic Devices 6th ed and electronic devices Electron Flow Version 4th ed, Floyd
instructor's solutions manual for Electronic Devices and Circuit Theory 8th Ed by Robert Boylestad
instructor's solutions manual for Electronic Physics Strabman
instructor's solutions manual for Electronics, 2nd Ed., by Allan R. Hambley
instructor's solutions manual for Elementary Differential Equations

(Werner E. Kohler, Johnson)
instructor's solutions manual for Elementary Differential Equations and Boundary Value Problems (8th Ed., Boyce & Diprima)
instructor's solutions manual for Elementary Linear Algebra 5th edition by Stanley I. Grossman
instructor's solutions manual for Elementary Linear Algebra by Matthews
instructor's solutions manual for Elementary Linear Algebra with Applications (9th Ed., Howard Anton & Chris Rorres)
instructor's solutions manual for Elementary Linear Algebra with Applications 9E by Kolman, Hill
instructor's solutions manual for Elementary mechanics & thermodynamics jhon w.Nobury
instructor's solutions manual for ELEMENTARY NUMBER THEORY AND ITS APPLICATIONS, (5TH EDITION, Bart Goddard, Kenneth H. Rosen)
instructor's solutions manual for Elementary Principles of Chemical Processes (3rd Ed., Felder & Rousseau)
instructor's solutions manual for Elementary Statistics Using The Graphing Calculator 9 Ed by MILTON LOYER
instructor's solutions manual for Elementary Statistics Using the Graphing Calculator For the TI-83-84 Plus (Mario F. Triola)
instructor's solutions manual for Elements of Information Theory - M. Cover, Joy A. Thomas
instructor's solutions manual for Elements of Chemical Reaction Engineering by Fogler hubbard, hamman , johnson , 3rd edition
instructor's solutions manual for Elements of Deductive Inference by Bessie, Glennan
instructor's solutions manual for Elements of Electromagnetics , 2 ed by Matthew N. O. Sadiku
instructor's solutions manual for Elements of Electromagnetics , 3ed by Matthew N. O. Sadiku
instructor's solutions manual for Elements of Forecasting in Business, Finance, Economics and Government by Diebold
instructor's solutions manual for Embedded Microcomputer Systems Real Time Interfacing, 2nd Edition , Jonathan W. Valvano
instructor's solutions manual for Engineering and Chemical Thermodynamics (Koretsky)
instructor's solutions manual for ENGINEERING BIOMECHANICS (STATICS) by Angela Matos, Eladio Pereira, Juan Uribe and Elisandra Valentin
instructor's solutions manual for Engineering Circuit Analysis 6Ed, Luay Shaban
instructor's solutions manual for Engineering Circuit Analysis 6th ed by Hayt
instructor's solutions manual for Engineering Circuit Analysis 7th Ed. by William H. Hayt Jr
instructor's solutions manual for Engineering Economic Analysis 9th ED by Newnan
instructor's solutions manual for Engineering Economy and the Decision-Making Process (Joseph C. Hartman)
instructor's solutions manual for Engineering Electromagnetics 6E by

William H. Hayt Jr. and John A. Buck
instructor's solutions manual for Engineering Electromagnetics 7E by William H. Hayt Jr. and John A. Buck
instructor's solutions manual for Engineering Fluid Mechanics - 8th Ed by Crowe, Elger & Roberson
instructor's solutions manual for Engineering Fluid Mechanics 7th Ed by Crowe and Donald
instructor's solutions manual for Engineering Materials Science, by Milton Ohring
instructor's solutions manual for Engineering Mathematics (4th Ed., John Bird)
instructor's solutions manual for Engineering Mechanics - Dynamics by Boresi, Schmidt
instructor's solutions manual for Engineering Mechanics - Dynamics, 5th Ed (J. L. Meriam, L. G. Kraige)
instructor's solutions manual for Engineering Mechanics - Dynamics, 6th Ed (J. L. Meriam, L. G. Kraige)
instructor's solutions manual for Engineering Mechanics - Statics (10th Edition) by Russell C. Hibbeler
instructor's solutions manual for Engineering Mechanics - Statics (11th Edition) by Russell C. Hibbeler
instructor's solutions manual for Engineering Mechanics - Statics by Boresi, Schmidt
instructor's solutions manual for Engineering Mechanics - Statics, 4th Ed (J. L. Meriam, L. G. Kraige)
instructor's solutions manual for Engineering Mechanics - Statics, 6th Ed (J. L. Meriam, L. G. Kraige)
instructor's solutions manual for Engineering Mechanics : Dynamics (11th Ed., Hibbeler)
instructor's solutions manual for Engineering Mechanics Dynamic (10th Edition) hibbeler
instructor's solutions manual for Engineering Mechanics Dynamics (12th Ed., Hibbeler)
instructor's solutions manual for Engineering Mechanics Dynamics, Bedford & Fowler, 5th Edition
instructor's solutions manual for Engineering Mechanics Dynamics, by R. C. Hibbeler, 3rd
instructor's solutions manual for Engineering Mechanics Statics (12th Ed., Hibbeler)
instructor's solutions manual for Engineering Mechanics Statics, Bedford & Fowler, 5th Edition
instructor's solutions manual for Engineering Statistics (4th Ed., Douglas Montgomery, George Runger & Norma Faris Hubele)
instructor's solutions manual for Engineering Vibration 3rd Ed by Inman
instructor's solutions manual for Erosion and sedimentation by Pierre Y. Julien
instructor's solutions manual for Essentials of Soil Mechanics and Foundations: Basic Geotechnics (7th Ed., David F. McCarthy)
instructor's solutions manual for Feedback Control of Dynamic Systems

(4th Ed., Franklin, Powell & Emami-Naeini)
instructor's solutions manual for Feedback Control of Dynamic Systems (5th Ed., Franklin, Powell & Emami-Naeini)
instructor's solutions manual for Field and Wave Electromagnetics 2nd Ed by David K. Cheng
instructor's solutions manual for Financial Accounting 6th Ed by Harrison
instructor's solutions manual for Financial Management- Principles and Applications, 10th Ed by Keown, Scott
instructor's solutions manual for Financial Management- Theory and Practice 12 th ED by Brigham, Ehrhardt
instructor's solutions manual for Finite Element Techniques in Structural Mechanics Ross
instructor's solutions manual for First Course in Probability (7th Ed., Sheldon Ross)
instructor's solutions manual for Fluid Mechanics (5th Ed., White)
instructor's solutions manual for Fluid Mechanics 4th Ed by Cohen, Kundu
instructor's solutions manual for Fluid Mechanics and Thermodynamics of Turbomachinery (5th Ed., S.L. Dixon)
instructor's solutions manual for Fluid Mechanics by CENGEL
instructor's solutions manual for Fluid Mechanics Egon Krause
instructor's solutions manual for Fluid Mechanics Fundamentals and Applications by Çengel & Cimbala
instructor's solutions manual for Fluid Mechanics with Engineering Applications, 10th Edition, by Finnemore
instructor's solutions manual for Foundations of Applied Combinatorics by Bender, Williamson
instructor's solutions manual for Foundations of Colloid Science 2e , Hunter
instructor's solutions manual for Foundations of Electromagnetic Theory by John R. Reitz, Frederick J. Milford
instructor's solutions manual for Fourier and Laplace Transform - Antwoorden
instructor's solutions manual for Fractal Geometry Mathematical Foundations and Applications, 2nd Ed Kenneth Falcone
instructor's solutions manual for fracture mechanics ; fundamentals and applications, 2E, by T.L. Anderson
instructor's solutions manual for From Polymers to Plastics By A.K. van der Vegt
instructor's solutions manual for Fundamentals of Advanced Accounting By Fischer, Taylor
instructor's solutions manual for Fundamentals of Aerodynamics (3 Ed., Anderson)
instructor's solutions manual for Fundamentals of Aerodynamics (2 Ed., Anderson)
instructor's solutions manual for Fundamentals of Aircraft Structural Analysis by Howard D. Curtis
instructor's solutions manual for Fundamentals of Applied Electromagnetics (5th Ed., Fawwaz T. Ulaby)

instructor's solutions manual for Fundamentals of Chemical Reaction Engineering by Davis
instructor's solutions manual for Fundamentals of Complex Analysis (3rd Ed., E. Saff & Arthur Snider)
instructor's solutions manual for Fundamentals of Computer Organization and Architecture by Abd-El-Barr, El-Rewini
instructor's solutions manual for Fundamentals of Corporate Finance 8th edition by Ross
instructor's solutions manual for Fundamentals of Corporate Finance 9th edition by Ross
instructor's solutions manual for Fundamentals of Corporate Finance, 4th Edition (Brealey, Myers, Marcus)
instructor's solutions manual for Fundamentals of Differential Equations 7E Kent Nagle, B. Saff, Snider
instructor's solutions manual for Fundamentals of Digital Logic with VHDL Design (1st Ed., Stephen Brown Vranesic)
instructor's solutions manual for Fundamentals of Electric Circuits (2nd.ed.) by C.K.Alexander M.N.O.Sadiku
instructor's solutions manual for Fundamentals of Electric Circuits (4E., Charles Alexander & Matthew Sadiku)
instructor's solutions manual for Fundamentals of Electromagnetics with Engineering Applications (Stuart Wentworth)
instructor's solutions manual for Fundamentals of Electronic Circuit Design , Comer
instructor's solutions manual for Fundamentals of Engineering Economics 2nd E by Chan S. Park
instructor's solutions manual for FUNDAMENTALS OF ENGINEERING ELECTROMAGNETICS, by DAVID CHENG
instructor's solutions manual for Fundamentals of Engineering Thermodynamics, 5th Ed (Michael J. Moran, Howard N. Shapiro)
instructor's solutions manual for Fundamentals of Engineering Thermodynamics, 6th Ed (Michael J. Moran, Howard N. Shapiro)
instructor's solutions manual for Fundamentals of Financial Management 12th edition James C. Van Horne, Wachowicz
instructor's solutions manual for Fundamentals of Fluid Mechanics 5th Ed Munson Young Okiishi
instructor's solutions manual for Fundamentals of Fluid Mechanics 6th Ed by Munson
instructor's solutions manual for Fundamentals of Fluid Mechanics, 4E (Bruce R. Munson, Donald F. Young, Theodore H.)
instructor's solutions manual for Fundamentals of Heat and Mass Transfer - 5th Edition F.P. Incropera D.P. DeWitt
instructor's solutions manual for Fundamentals of Heat and Mass Transfer (4th Ed., Incropera, DeWitt)
instructor's solutions manual for Fundamentals of Heat and Mass Transfer (6th Ed., Incropera, DeWitt)
instructor's solutions manual for Fundamentals of Logic Design, 5th Ed., by Charles Roth
instructor's solutions manual for Fundamentals of Machine Component Design (3rd Ed., Juvinall)

instructor's solutions manual for Fundamentals of Manufacturing 2nd Edition by Philip D. Rufe
instructor's solutions manual for Fundamentals of Materials Science and Engineering- An Integrated Approach, 3rd Ed by Callister
instructor's solutions manual for Fundamentals of Modern Manufacturing: Materials, Processes, and Systems (2nd Ed., Mikell P. Groover)
instructor's solutions manual for Fundamentals of Momentum, Heat and Mass Transfer, 5th Ed by Welty,Wilson
instructor's solutions manual for Fundamentals of Organic Chemistry, 5E, by T. W. Graham Solomons
instructor's solutions manual for Fundamentals of Physics (7th Ed., David Halliday, Robert Resnick & Jearl Walker)
instructor's solutions manual for Fundamentals of Physics, 8th Edition Halliday, Resnick, Walker
instructor's solutions manual for Fundamentals of Power Semiconductor Devices By Jayant Baliga
instructor's solutions manual for Fundamentals of Probability, with Stochastic Processes (3rd Ed., Saeed Ghahramani)
instructor's solutions manual for Fundamentals of Quantum Mechanics (C.L. Tang)
instructor's solutions manual for Fundamentals of Semiconductor Devices, 1st Edition by Anderson
instructor's solutions manual for Fundamentals of Signals and Systems Using the Web and Matlab (3rd Ed., Kamen & Bonnie S Heck)
instructor's solutions manual for Fundamentals of Solid-State Electronics by Chih-Tang Sah
instructor's solutions manual for Fundamentals of Structural Analysis 3rd Ed by Leet
instructor's solutions manual for Fundamentals of Thermal-Fluid Sciences, 2nd Ed. by Cengel
instructor's solutions manual for Fundamentals of Thermodynamics 5th Ed by Sonntag, Borgnakke and Van Wylen
instructor's solutions manual for Fundamentals of Thermodynamics 6th Ed by Sonntag, Borgnakke & Van Wylen
instructor's solutions manual for Fundamentals of Wireless Communication by Tse and Viswanath
instructor's solutions manual for Fundamentals of Wireless Communication by Tse, Viswanath
instructor's solutions manual for Gas Dynamics (3rd Ed., John & Keith)
instructor's solutions manual for General Chemistry 9 Edition by Ebbings, Gammon
instructor's solutions manual for General Chemistry, 8th Edition by Ralph H. Petrucci; William S. Harwood; Geoffrey Herring
instructor's solutions manual for Geometry - A High School Course by S. Lang and G. Murrow
instructor's solutions manual for Geometry (Glencoe)
instructor's solutions manual for Geometry and Discrete Mathematics Addison Wesley
instructor's solutions manual for Guide to Energy Management, 6th

Edition by Klaus Dieter E. Pawlik
instructor's solutions manual for Guide to Energy Management, Fifth Edition, Klaus-Dieter E. Pawlik
instructor's solutions manual for HARCOURT MATHEMATICS 12 Advanced Functions and Introductory Calculus
instructor's solutions manual for Harcourt Mathematics 12 Geometry and Discrete Mathematics
instructor's solutions manual for Heat and Mass Transfer: A Practical Approach (3rd. Ed., Cengel)
instructor's solutions manual for Heat Transfer A Practical Approach ,Yunus A. Cengel 2d ed
instructor's solutions manual for Heating, Ventilating and Air Conditioning Analysis and Design, 6th Edition McQuiston, Parker, Spitler
instructor's solutions manual for Higher Algebra 3rd edition by Hall and Knight
instructor's solutions manual for HIGH-SPEED NETWORKS AND INTERNETS 2 ED STALLINGS
instructor's solutions manual for History of Mathematics: Brief Version (Victor J. Katz)
instructor's solutions manual for Hydraulics in Civil and Environmental Engineering 4 E by Chadwick , Morfett
instructor's solutions manual for Industrial Organization Theory & Applications by Shy
instructor's solutions manual for Intermediate Accounting Kieso 12th ed
instructor's solutions manual for Intermediate Algebra - Concepts & Applications 8th Ed by Bittinger, Ellenbogen
instructor's solutions manual for Introduction to Accounting 3rd Ed by Marriott, Mellett
instructor's solutions manual for Introduction to Algorithms, 2nd Ed by Cormen, Leiserson
instructor's solutions manual for Introduction To Analysis (3rdEd) -by William Wade
instructor's solutions manual for Introduction to Applied Modern Physics by Henok Abebe
instructor's solutions manual for Introduction to Chemical Engineering Thermodynamics (7th Ed., Smith & Van Ness)
instructor's solutions manual for Introduction to Commutative Algebra by M. F. Atiyah
instructor's solutions manual for Introduction to Digital Signal Processing (in Serbian) by Lj. Milic and Z. Dobrosavljevic
instructor's solutions manual for Introduction to Econometrics (2nd ed., James H. Stock & Mark W. Watson)
instructor's solutions manual for Introduction to Electric Circuits 7th Edition by Dorf, Svaboda
instructor's solutions manual for Introduction to Electric Circuits, 6E, Dorf
instructor's solutions manual for Introduction to Electrodynamics (3rd Ed., David J. Griffiths)

instructor's solutions manual for Introduction to Elementary Particles 2nd Ed by David Griffiths
instructor's solutions manual for Introduction to Environmental Engineering and Science (3rd Ed., Gilbert M. Masters & Wendell P. Ela)
instructor's solutions manual for Introduction to Environmental Engineering and Science, Edition 2, Masters
instructor's solutions manual for Introduction to Ergonomics 2E by Robert Bridger
instructor's solutions manual for Introduction to Fluid Mechanics (7 E., Robert Fox, Alan McDonald & Philip)
instructor's solutions manual for Introduction to Fluid Mechanics (6E., Robert Fox, Alan McDonald & Philip)
instructor's solutions manual for Introduction to fluid mechanics 5th edition by Alan T. McDonald, Robert W Fox
instructor's solutions manual for Introduction to Graph Theory 2E - West
instructor's solutions manual for Introduction to Heat Transfer by Vedat S. Arpaci, Ahmet Selamet, Shu-Hsin Kao
instructor's solutions manual for Introduction to Java Programming, Comprehensive Version 7th Ed by Liang
instructor's solutions manual for Introduction to Linear Algebra, 3rd Ed., by Gilbert Strang
instructor's solutions manual for Introduction to Linear Optimization by Dimitris Bertsimas, John N. Tsitsiklis
instructor's solutions manual for Introduction to Management Accounting, 14 ED by Horngren, Schatzberg
instructor's solutions manual for Introduction to Materials Science for Engineers (6th Ed., Shackelford)
instructor's solutions manual for Introduction to Mathematical Statistics (6th Ed., Hogg, Craig & McKean)
instructor's solutions manual for Introduction to Mechatronics and Measurements Systems 2nd Ed by Alciatore, Histand
instructor's solutions manual for Introduction to Operations Research - 7th ed by Frederick Hillier, Gerald Lieberman
instructor's solutions manual for Introduction to Probability 2nd Ed by Bertsekas and Tsitsiklis
instructor's solutions manual for Introduction to Probability by Dimitri P. Bertsekas and John N. Tsitsiklis
instructor's solutions manual for Introduction to Probability by Grinstead, Snell
instructor's solutions manual for Introduction to Quantum Mechanics (2nd Ed., David J. Griffiths)
instructor's solutions manual for Introduction to Quantum Mechanics 1st edition (1995) by David J. Griffiths
instructor's solutions manual for Introduction to Queueing Theory 2nd Edition by R.B. Cooper
instructor's solutions manual for Introduction to Scientific Computation and Programming, 1st Edition by Daniel Kaplan
instructor's solutions manual for Introduction to Signal Processing by S. J. Orfanidis

instructor's solutions manual for Introduction to Signal Processing by Sophocles J. Orfanidis
instructor's solutions manual for Introduction to Solid State Physics 8th Ed by Kittel & Charles
instructor's solutions manual for Introduction to Statistical Physics by Kerson Huang
instructor's solutions manual for Introduction to Statistical Quality Control (5th Ed., Douglas C. Montgomery)
instructor's solutions manual for Introduction to the Theory of Computation by Ching Law
instructor's solutions manual for Introduction to the Thermodynamics of Materials 3 E by Gaskell
instructor's solutions manual for Introduction to Thermal and Fluids Engineering by Kaminski, Jensen
instructor's solutions manual for Introduction to Thermal Systems Engineering Moran Shapiro Munson
instructor's solutions manual for Introduction to VLSI Circuits and Systems, by John P. Uyemura
instructor's solutions manual for Introduction to Wireless Systems by P.M Shankar
instructor's solutions manual for Introductory Econometrics A Modern Approach, 3Ed by Jeffrey Wooldridge
instructor's solutions manual for Introductory Mathematical Analysis for Business, Economics and the Life and Social Sciences, 12th E By Haeussler,Paul,Wood
instructor's solutions manual for Introductory Quantum Optics (Christopher Gerry & Peter Knight)
instructor's solutions manual for Introdution to Solid State Physics, 8th Edition by Kittel
instructor's solutions manual for Investment Analysis and Portfolio Management 7th Edition by Frank K. et al. Reilly
instructor's solutions manual for Investments by Charles P. Jones
instructor's solutions manual for IT Networking Labs by Tom Cavaiani
instructor's solutions manual for Java How to program 7th Ed by Deitel
instructor's solutions manual for Journey into Mathematics An Introduction to Proofs ,Joseph Rotman
instructor's solutions manual for Kinematics, Dynamics, and Design of Machinery, 2nd Ed., Waldron & Kinzel
instructor's solutions manual for Kinetics of Catalytic Reactions by M. Albert Vannice
instructor's solutions manual for Laser Fundamentals (2nd Ed., William T. Silfvast)
instructor's solutions manual for Learning SAS in the Computer Lab 3rd ED by Elliott, Morrell
instructor's solutions manual for Lectures on Corporate Finance 2006, 2 Ed by Bossaerts, Oedegaard
instructor's solutions manual for Linear Algebra - 2 Ed - Poole
instructor's solutions manual for Linear Algebra and Its Applications 3rd ed by David C. Lay

instructor's solutions manual for Linear Algebra Done Right, 2nd Ed by Sheldon Axler
instructor's solutions manual for Linear Algebra with Applications (6th Ed., S. Leon)
instructor's solutions manual for Linear Algebra With Applications, 2nd Edition by W. Keith Nicholson
instructor's solutions manual for Linear Algebra, 4th Ed, by Stephen H. Friedberg , Arnold J. Insel , Lawrence E. Spence
instructor's solutions manual for Linear Algebra, by J. Hefferon
instructor's solutions manual for Linear Circuit Analysis Time Domain, Phasor and Laplace.., 2nd Ed, Lin
instructor's solutions manual for Linear dynamic systems and signals by Zoran Gajic
instructor's solutions manual for Linear Systems And Signals, 1stE, B P Lathi
instructor's solutions manual for Logic and Computer Design Fundamentals, 2E, by Morris Mano and Charles Kime
instructor's solutions manual for Logic and Computer Design Fundamentals, 3d edition by Morris Mano and Charles Kime
instructor's solutions manual for Logic and Computer Design Fundamentals, 4/E, by Morris Mano and Charles Kime
instructor's solutions manual for Machine Design : An Integrated Approach (3rd Ed., Norton)
instructor's solutions manual for Managerial Accounting 11th Ed by Garrison & Noreen
instructor's solutions manual for Managing Business Process Flows: Principles of Operations Management(2nd Ed., Anupind, Chopra, Deshmukh, et al)
instructor's solutions manual for Managing Engineering and Technology (4th, Morse & Babcock)
instructor's solutions manual for Manufacturing Processes for Engineering Materials (5th Ed. Kalpakjian & Smith)
instructor's solutions manual for Materials - engineering, science, properties, and design
instructor's solutions manual for Materials and Processes in Manufacturing (9th Ed., E. Paul DeGarmo, J. T. Black,Kohser)
instructor's solutions manual for Materials for Civil and Construction Engineers 3rd ED by Mamlouk, Zaniewski
instructor's solutions manual for Materials Science and Engineering- An Introduction (7th Ed., William D. Callister, Jr.)
instructor's solutions manual for Materials Science and Engineering- An Introduction (6th Ed., William D. Callister, Jr.)
instructor's solutions manual for Mathematical Analysis, Second Edition by Tom M. Apostol
instructor's solutions manual for Mathematical Methods for Physicists 5 Ed, Arfken
instructor's solutions manual for Mathematical Methods for Physics and Engineering, (3rd Ed., Riley,Hobson)
instructor's solutions manual for Mathematical Methods in the Physical Sciences; 3 edition by Mary L. Boas

instructor's solutions manual for Mathematical Models in Biology An Introduction (Elizabeth S. Allman & John A. Rhodes)
instructor's solutions manual for Mathematical Techniques 4th ED by D W Jordan & P Smith
instructor's solutions manual for Mathematics for Economists, by Carl P. Simon , Lawrence E. Blume
instructor's solutions manual for Mathematics for Physicists by Susan Lea
instructor's solutions manual for Matrix Analysis and Applied Linear Algebra by Meyer
instructor's solutions manual for McGraw-Hill Ryerson Calculus & Advanced Function by Dearling, Erdman, et all
instructor's solutions manual for Mechanical Engineering Design 8th Ed by Shigley & Budynas
instructor's solutions manual for Mechanical Engineering Design, 7th Ed. by Mischke, Shigley
instructor's solutions manual for Mechanical Measurements (6th Ed., Beckwith, Marangoni & Lienhard)
instructor's solutions manual for Mechanical Vibrations (Vol.1) 4th Ed., Rao
instructor's solutions manual for Mechanical Vibrations (3rd Ed., Rao)
instructor's solutions manual for Mechanics of Aircraft Structures, 2nd Ed by Sun
instructor's solutions manual for Mechanics of Fluids (8th Ed., Massey)
instructor's solutions manual for Mechanics of Fluids 3rd ED Vol 1 by Merle C. Potter
instructor's solutions manual for Mechanics of Materials 5 edition by James M. Gere
instructor's solutions manual for Mechanics of Materials (6th Ed., Riley, Sturges & Morris)
instructor's solutions manual for Mechanics Of Materials Beer Johnston 3rd
instructor's solutions manual for Mechanics of Materials, 6E, by Russell C. Hibbeler
instructor's solutions manual for Mechanics of Materials, 6th Edition - James M. Gere & Barry Goodno
instructor's solutions manual for Mechanics of Materials, 7E, by Russell C. Hibbeler
instructor's solutions manual for Mechanics of Materials, 7th Edition - James M. Gere & Barry Goodno
instructor's solutions manual for Mechanics of Solids, ross
instructor's solutions manual for Mechanism Design Analysis and Synthesis (4th Edition) by Erdman, Sandor, Kota
instructor's solutions manual for MEMS and Microsystems Design, Manufacture and Nanoscale Engineering 2nd ED by Tai-Ran Hsu
instructor's solutions manual for Microeconomic Analysis, 3rd Ed., by H. Varian
instructor's solutions manual for Microeconomic Theory Basic Principles and Extensions 9E (South-Western) by Walter Nicholson

instructor's solutions manual for Microeconomic Theory by Segal Tadelis Hara Chiaka Hara Steve Tadelis
instructor's solutions manual for Microeconomic Theory, by Mas-Colell, Whinston, Green
instructor's solutions manual for Microeconomics, 6th Ed by Pyndick, Rubinfeld
instructor's solutions manual for Microelectronic Circuit Analysis and Design, 3rd Edition, by D. Neamen
instructor's solutions manual for Microelectronic Circuit Design (3rd Ed., Richard Jaeger & Travis Blalock)
instructor's solutions manual for Microelectronic Circuits By Adel Sedra 5th Edition
instructor's solutions manual for Microelectronic Circuits, 4th Ed. by Sedra and Smith
instructor's solutions manual for Microelectronic Circuits, 5th Ed. by Sedra and Smith
instructor's solutions manual for Microelectronics Digital and Analog Circuits and Systems by Millman
instructor's solutions manual for Microelectronics I & II by Dr.Chang
instructor's solutions manual for Microelectronics,Solution MANUAL, 5thEd,MAZ
instructor's solutions manual for Microprocessors and Interfacing, Revised 2nd Edition by Douglas V Hall
instructor's solutions manual for Microwave and Rf Design of Wireless Systems, 1st Edition, by Pozar
instructor's solutions manual for Microwave Engineering, 2nd Ed., by David M. Pozar
instructor's solutions manual for Microwave Engineering, 3rd Ed., by David M. Pozar
instructor's solutions manual for Microwave Transistor Amplifiers Analysis and Design, 2nd Ed., by Guillermo Gonzalez
instructor's solutions manual for Mobile Communications 2nd ed by Jochen Schiller
instructor's solutions manual for Modern Control Engineering 3rd Ed. - K. OGATA
instructor's solutions manual for Modern Control Engineering 4th Ed. - K. OGATA
instructor's solutions manual for Modern Control Engineering 5 Ed. - K. OGATA
instructor's solutions manual for Modern Control Systems 11E by Richard C Dorf and Robert H. Bishop
instructor's solutions manual for Modern Control Systems 9 E by Richard C Dorf and Robert H. Bishop
instructor's solutions manual for Modern Control Systems, 12th Ed by Dorf, Bishop
instructor's solutions manual for Modern Digital and Analog Communication Systems, 3rd Ed., by Lathi
instructor's solutions manual for Modern Digital Electronics 3 Ed by R P Jain
instructor's solutions manual for Modern Digital Electronics,3E by R P

JAIN
instructor's solutions manual for Modern Digital Signal Processing- Roberto Cristi
instructor's solutions manual for MODERN OPERATING SYSTEMS 2nd ed A.S.TANENBAUM
instructor's solutions manual for Modern Organic Synthesis An Introduction by George Zweifel, Michael Nantz
instructor's solutions manual for Modern Physics 2nd E by Randy Harris
instructor's solutions manual for Modern Physics 4th ed by Mark Llewellyn
instructor's solutions manual for Modern Physics for Scientists and Engineers 3rd E by Thornton and Rex
instructor's solutions manual for Modern Quantum Mechanics (Revised Edition) by J. J. Sakurai
instructor's solutions manual for Modern Thermodynamics - From Heat Engines to Dissipative Structures by Kondepudi, Prigogine
instructor's solutions manual for Modern Thermodynamics - From Heat Engines to Dissipative Structures Vol 1 by Kondepudi, Prigogine
instructor's solutions manual for Molecular Symmetry and Group Theory by Robert L. Carter
instructor's solutions manual for Multinational Business Finance 10 E by Stonehill, Moffett, Eiteman
instructor's solutions manual for Multivariable Calculus, 5th Edition, JAMES STEWART
instructor's solutions manual for Multivariable Calculus, Applications and Theory by Kenneth Kuttler
instructor's solutions manual for Nanoengineering of Structural, Functional and Smart Materials, Mark J. Schulz, Ajit D. Kelkar
instructor's solutions manual for Network Flows: Theory, Algorithms, and Applications by Ravindra K. Ahuja , Thomas L. Magnanti , James B. Orlin
instructor's solutions manual for Networks and Grids - Technology and Theory by Thomas G. Robertazzi
instructor's solutions manual for Neural networks and learning machines 3rd edition by Simon S. Haykin (2,3,7,14 missing)
instructor's solutions manual for Nonlinear Programming ,2ndEdition , Dimitri P.Bertsekas
instructor's solutions manual for Numerical Analysis 8th ED by BURDEN & FAIRES
instructor's solutions manual for Numerical Computing with MATLAB by Moler
instructor's solutions manual for Numerical Methods for Engineers (3rd Ed. Steven C. Chapra)
instructor's solutions manual for Numerical Methods for Engineers (5th Ed. Steven C. Chapra)
instructor's solutions manual for Numerical Methods Using MATLAB (3rd Edition)by John H. Mathews & Fink
instructor's solutions manual for Numerical Solution of Partial Differential Equations- An Introduction (2nd Ed., K. W. Morton &D)
instructor's solutions manual for Operating System Concepts, 6E,

Silberschatz, Galvin, Gagne
instructor's solutions manual for Operating System Concepts, 7E, Silberschatz, Galvin, Gagne
instructor's solutions manual for Operating systems Internals and Design principles 4th Edition Stallings
instructor's solutions manual for Operating systems Internals and Design principles 5th Edition Stallings
instructor's solutions manual for Operations Management 5th Ed by Nigel Slack, Chambers, Johnston
instructor's solutions manual for Optical Fiber Communications 3rd E by Gerd Keiser
instructor's solutions manual for Optics 4th Edition by Hecht E., Coffey M., Dolan P
instructor's solutions manual for Optimal Control Theory An Introduction By Donald E. Kirk
instructor's solutions manual for Optimal State Estimation Dan Simon
instructor's solutions manual for Options, Futures and Other Derivatives, 4E, by John Hull
instructor's solutions manual for Options, Futures and Other Derivatives, 5E, by John Hull
instructor's solutions manual for Options, Futures, and Other Derivatives 7th Ed by John C. Hull
instructor's solutions manual for Orbital Mechanics for Engineering Students 2nd ED by Curtis
instructor's solutions manual for Orbital Mechanics for Engineering Students by Curtis
instructor's solutions manual for ORDINARY DIFFERENTIAL EQUATIONS by Adkins, Davidson
instructor's solutions manual for Organic Chemistry - Clayden et.al.
instructor's solutions manual for Organic Chemistry 2nd Edition by Hornback
instructor's solutions manual for Organic Chemistry 7ed, McMurry
instructor's solutions manual for Organic Chemistry, 4E., by Carey, Atkins
instructor's solutions manual for Organic Chemistry, 5E., by Carey, Atkins
instructor's solutions manual for Organic Chemistry, 6 Ed by Wade, Jan Simek
instructor's solutions manual for Parallel & Distributed Computation Numerical Methods by Bertsekas & Tsitsiklis
instructor's solutions manual for Parallel Programming: Techniques and Applications Using Networked Workstations and Parallel Computers (2nd Ed., Barry Wilkinson & Michael Allen)

Conditions up here are poor on 40 meters. Short skip is OK, but not
hearing the usual signal strength from Europe and Africa.

Old country boy from Edwards,Mississippi! knows all about chainsaws, he BROKE my chainsaw! He just now got done with mowing his yard.He steps over to those trees, he picked up a twig stick about a foot and a half long, he used that stick to shut off his lawn mower.That is the same lawn mower one of his sons picked out for him at a pawn shop, $65.00 lawn mower.Old country boy B HO! Butt Kisser! from Edwards,Mississippi! knows all about chainsaws, he BROKE my chainsaw! he pushed that lawn mower over here a year or two ago, He rattled my front screen door, he said, SHOW ME WHERE THAT OIL DRAIN PLUG IS!!!!!
He was/IS too STUPID! to find that oil drain plug himself.
Almost anybody knows how to find a lawn mower engine oil drain plug.

- - I don't drive them.

- Apparently, by the reports, they drive themselves.

Yes They Do -cause- They Are Evil & Demon Possessed :
Attacking Trees
Smashing Into Cars
Running Into Fast-Food Stores
Driving At High Speeds
Driving Through Stop Signs & Red Lights

stay-out the 'suv's ! ~ RHF

A thin layer of dried up dirt had that oil drain plug hidden.What would you do to find that oil drain plug? Do you have a walk behind lawn mower that has a Briggs & Stratton engine?
I wiped my fingers around on there, about one or two seconds.
There it is! Right there!

There are two Best Buy stores in the Jackson,Missy Sippy metro area, Ridgeland and Flowood.Both of them are at least 12 miles or more from doggy's couch.I have 'cabin fever', I need to get out more.Maybe one day this week or next week, I might go check out one or more of those Best Buy stores, some other computer stores.Maybe Best Buy has a good marked down price on a Velocity Micro Cruz Touch Tablet? I just don't like to drive anywhere anymore.I could step across Highway 80 (275 footsteps) to Metrocenter Mall and flirt with them wimmins over there.
cuhulin, Touch Me

Old country boy from Edwards,Mississippi! knows all about chainsaws, he is sitting on that little bitty front porch (doggy's front porch measures a little over seven feet by a little over fourteen feet) over there admiring his front yard.About a third of that front yard over there where there used to grass over there before he moved in over there, that grass is lonnng gone, they keep it beat down all the time.

I need to get started one of these days on finishing up laying down the rest of those two by eight plywood up in my attic for a floor so I can put a lot of my junk up there.Thinking I might also fence in doggy's back yard too, to keep stray dogs away from there when I sometimes take doggy out in the back yard.I have a lot of thingys to do, I only need to unass doggy's couch and start doing it.
cuhulin, the attic and fence

Yeah, it's good to hear these guys - Do we have a QTH for their XMTR?
(Maybe I'll check WRTVH when I get home - I hear these guys a LOT more
than I hear KBS from their own turf).

Bruce

How far outside? Was it in a State Troopers Belt?

Ya know, I heard something today, briefly, about those damn Liberal/Democrat/Marxist/Socialist's up in Wisconsin (on the other side of The Cheddar Curtain), being possibly detained, AND, being brought back to the Capitol in chains to be present to vote.

<< 3912 VOICE OF THE PEOPLE 0500-0800 1234567 Korean 50 ND Kyonggi-do
KOR >>

Kyeonggi-do (Kyeonggi Province), now Gyeonggi-do?

That's very interesting.. Gyeonggi is the largest provinces of the ROK (not the DPRK), and home of the Seoul District (sort of like DC back home). Also home of Pyeongtaek-si (city) and yours truly. That means that either your Voice of the People (I note: NOT Voice of Korea, which is Pyoengyang) is located in the ROK, and/or the ROK is hosting the DPRK's propaganda outlet(s).

Note: The spellings used for Korean names are currently used Romanizations (transliterations from Hangul to Western alphabet) of the Hangul.

I would like to apologize for my harsh words to this kind, clearly religious person. It was a moment of passion and I hadn't taken my meds that day. Please forgive me as harassing people for years at a time is a only a memory of my past and I have repented for Christ's sake.

Feel free to killfilter me if you choose. I deserve no better for the likes of the scum on these Usenet groups. Some have been kind but not many.

I use many, many names including LectronNuis, cHips, Tazoar and Pixie for the more common ones. Your forgiveness is owed me.

Yesterday afternoon, when I went back to Animal Medical Center to pick up doggy, ergo, her teeth got cleaned and polished, [pearly whites, baby, pearly whites] they used a laser device and whatever, but they had to give her a sedative first to put her to sleep so they could work on her teeth.(at least she has teeth, I don't have any teeth) Coming out her sedative stuff at Animal Medical Center, she was like, What the damn hell happened to me!?!?
When we got back home and I unlocked and opened my front door, she headed straight to her couch.

That's probably the wisest move. The restocking fee hurts, but it's
still a lot cheaper than keeping it. Cell phones are really bad for
privacy. They know where you are at all times.

I don't know why you got it...being so paranoid about even the house
phone line being bugged.

Isn't "Voice of the People" a kind of clandestine station, aimed at
propaganda *against* DPRK? It would seem silly for a Commie station
to be located in the Republic...?

D'oh! Answered my own query...from Aoki...

<< 3912 VOICE OF THE PEOPLE 0500-0800 1234567 Korean 50 ND Kyonggi-do
KOR >>

I wonder if they're colocated with 972 KHz (1.5 MW), which is the ROK
"Cultural" station, about 35 Km from me, beamed due north across Asan Bay to
the DPRK? Now THERE'S a station you can get on your fillings, if any. I once
had an old tube portable with variable inductance IF's.. they had a hella
tuning range. I accidentally broke the LO coil, and just tuned the IF's till
I heard something.. it was 972. I get them on my phonograph, too.. when I
pick up the tone arm.

There is NO oil whatsoever in that place . Just lots of poppy
plantations . And so on . And so forth .

*** Despite the closeness to both China,India,Pakistan and FSU ,
they probably just want to be left alone ... Also, I think this is
nearly hopeless , due to such an immense interest (plus so many
countries involved -- ISAF) . More than half of the GDP in
Afghanistan comes from dope , as a matter of fact !

Some confusion between RCI (Canada) and CRI (China) me thinks.

No confusion. Was talking about CRI initially, then mentioned RCI as one of
the other signals I can get regularly here.

Oh yea, that sounds familiar . By de-tuning the IFT a lot of strange
signals start popping up .

What I found interesting is that I didn't copy any other signals on the way
up in frequency. Odd, that.. since there is another megawatt station on 603
that I would have thought would have been heard first.

If you want a cool toy, keep your landline on "lifeline" service, get
DSL and a wireless router, and a nice Ipod Touch 16 GB. They run all the
iPhone apps, including thousands of radio stations, mostly for free.

Something else to consider.

How much moola do those iPod touchy feelys cost? I have read about them before.Some of the stores near doggy's couch sell them.When I tote my ATRIX stuff back to that AT&T store (next Monday morning) about 275 foot steps (but I will drive over there in my van.Walk across Highway 80, some MOFO would probally run me down) South of doggy's couch.I think that AT&T store sells them.

Frankly, I wish CRI would cut their transmissions WAYYYY back. They
hog the airwaves and the spectrum like nobody I've ever seen.

2281. (OT) Light Bulb Freedom of Choice Act.

Michele Bachmann introduces that Act.
http://www.libertypost.org/cgi-bin/readart.cgi?ArtNum=304062

Good for her on that.I Choose G.E.Reveal 60 Watt Incandescant Light Bulbs.Real Light Bulbs.Room Warmers.You know what a Radiometer is? I have two of them.One of them is parked in front of my G.E.Reveal 60 Watt Light/Lamp by my end of doggy's couch.Those little vanes in my Radiometer are spinnin around and around from the Light.There are other, different kinds of Radiometers too.

On 3/3/2011 7:25 PM, dxAce wrote:

> Embarrassed? Heck, I'm proud to state that I was once a member of the IAM, (a private
sector Union).

Workers are workers, public or private sector. So if someone has a
public sector boss, that makes them a
"Liberal/Democrat/Marxist/Socialist" and they have no rights? And you,
being a "proud" member of a private union, are not a
"Liberal/Democrat/Marxist/Socialist" and -do- have rights?

Gee, do you think your neighbors, all those teachers, nurses, librarians, garbage truck drivers, policemen and firemen that want a fair shake (JUST like the 'private' union folks do) realize that they are "Liberal/Democrat/Marxist/Socialists"? How dare those people want rights.

Why is a private union something to be proud of and being in a public union, according to you, makes you a "Liberal/Democrat/Marxist/Socialist"? I would appreciate you explaining the difference.

Yes, the reason was that people were frustrated that Obama didn't fix the Great Recession in two years -- the same Great Recession that W. Bush didn't fix in eight years.

And you may yet see some of those Wisconsin Repubs swept out of office via recall.

Interesting thought.

Even down here in the wilds of Indiana, we've heard about Michigan's new Republican governor's "shared sacrifice" plan.

GIVE Big Business a two billion dollar gift...and pay for it on the backs of school kids, retirees and yes, out of Lare's pocket, too.

I'm sure Big Business will really appreciate your gift. But again, please tell me why, as a 'little guy', you will be giving away the store to Big Business.

Finally, TAKE from Lare's pocket and GIVE to Big Business doesn't sound very much like "sharing", not even a little bit.

P.S. Lots of older guys here on this NG, so just thought you'd want to know that on the front page of today's (3/4/11) Wall Street Journal, Republican Boehner said he was "going to curb Social Security and Medicare". Just the news all us geezers want to hear.

LOL!

Not necessary.

>
> The people will swallow the cum of the plutocrats just so long before
> they will begin to understand they've been had.

That's always true. And it's always true, Bruce. In fact, it's
why the Dems were swept out of office, in the first place. There's
nothing that says those fortunes can't change, but the truth is,
that the people of Wisconsin are behind the Governor. At least right
now. And the Dems In Exile are fast falling from grace with now
talks about recall elections to remove the Dems from office.

Which, actually, may be unnecessary. If they remain out of the
state long enough, they'll run afoul of existing laws and will lose
their offices, anyway. And that deadline is closing fast. They claim
they're working, while away, and are protected from the desertion
clauses, but that may be sophistry. If they claim they're working,
but are not available (in mass, yet), to vote on pending
legislation, then the law says they're not working. And the people
are in agreement.

But here's the part that's really sticking in the public
craw...The Democrats are remaining out of state to avoid facing a
vote they will most certainly lose. Effectively defeating the intent
of the votes who put the Republicans into office by majority in the
elections. Yet, these Wisconsin Democrats are the ones who said, in
significant numbers, after November of 2008, along with Demcrats
across the nation (including the President,) when asked if they were

going to work with Republicans: Elections have consequences. We won.

And they have the nerve to call Republicans hypocrites.

Now that elections have brought the consequence of a balance of power to the other side, they refuse to play.

And the public is not sympathetic. To get back to your own question: Rigging an election is not necessary.

Not only did Obama not fix it, he made it far worse. They only people going
to be recalled in Wisc. will be Dems.

I have a few old Apple and Machintosh computers, some old Windows computers too, about eight of them in toto.But, I think they are wayyyy too old to use.Four of them were given to me for free, the rest of them I bought at Goodwill.They would no doubt need some major upgrading too.I have told people before in a couple of WebTV newsgroups, I am interested in buying a good used Mac mini.Because somebody said Mac minis have a HDMI port, I could connect it to a big screen HDTV set, but what do I know? I have no idea how much money a good used Mac mini is worth, I wouldn't even know how much money to offer.I wouldn't mind finding a good used Mac mini or a late model Apple/Mac computer at Goodwill.I could buy it for about five dollars, or less.

And on top of it CRI uses RCI's transmitters , if not mistaken .

Sounds very likely, they hire time on many transmitters in many countries to
relay their programs.

2316. The Truth About Fannie and Freddie’s Role in the Housing Crisis

Newsgroup: rec.radio.shortwave
Date: 2011-03-05 00:39:06 UTC
From: ∅baMa∅ Tse Dung <0bama0.speaker@gmail.com>
Message-ID: <19dc3cb7-212a-4947-a2c8-50b6dbe33eda@p16g2000vbo.googlegroups.com>
Source record: 221269
Cross-posted to: rec.radio.shortwave,alt.news-media,alt.fan.rush-limbaugh,alt.politics.economics,alt.politics.liberalism

Separating economic myth from economic fact

Myth 1: The government-sponsored housing finance companies Fannie Mae and Freddie Mac had nothing to do with the housing crisis. They were simply innocent bystanders caught in the crossfire. Economist and New York Times columnist Paul Krugman, for instance, has argued that Fannie and Freddie’s role in the housing market was insignificant between 2004 and 2006 because “they pulled back sharply after 2003, just when housing really got crazy.” According to Krugman, Fannie and Freddie “largely faded from the scene during the height of the housing bubble.”

Fact 1: Fannie and Freddie contributed to the housing crisis by making it easier for more people to take out loans for houses they could not afford. Beginning in 2000, Fannie and Freddie took on loans with low FICO scores, loans with low down payments, and loans with little or no documentation.

[...]

Myth 2: Fannie and Freddie’s role in the housing market increased homeownership, especially for first-time buyers and lower income earners.

Fact 2: The small increase in homeownership rates were temporary and artificial, driven by unsustainable incentives. In the best case scenario, Fannie and Freddie may have increased the homeownership rate from 63 percent to 69 percent, but the rate has now fallen back to 66 percent. Moreover, Fannie and Freddie did not make housing more affordable and even priced many first-time buyers out of the market.

[...]

Myth 3: Fannie and Freddie are essential for maintaining a working mortgage market. Without them, interest rates will increase and homeownership will plummet as more people are priced out of the housing market.

Fact 3: Interest rates are likely to go up. Yet it is not clear what impact this will have on homeownership rates. In the 1980s, interest rates on the average 30-year mortgage were significantly higher, yet homeownership rates were almost the same as they are today. Besides, the alternative to homeownership is not living on the street.

Um, you seem to be overlooking something quite obvious. There -is- other "outside money" than from the unions, you know.

Have you forgotten that the Supreme Court ruled that Big Business can give an infinite amount money to political parties and candidates. And that Big Business has waaay deeper pockets than the unions could ever hope to have. That Big Business money might go a long way towards explaining why "the Repubs swept the Dems out of ALL offices in Wisc".

Oh. What's that you say? You -did- overlook that fact.

Fannie Mae is a loan guarantor. She doesn't make loans. Investment banks
crashed the economy. Blame it on Phil Gramm and Bill Clinton, and "W"
for looking the other way.

Propagation Forecast Bulletin 9 ARLP009
From Tad Cook, K7RA
Seattle, WA March 4, 2011
To all radio amateurs

SB PROP ARL ARLP009
ARLP009 Propagation de K7RA

Solar activity is rising again, but average sunspot numbers and solar flux are down compared with last week. This week the average daily sunspot number declined over 14 points to 50.9, and average daily solar flux was off 7 points to 96.8. Average daily planetary A index rose from 6.1 to 9, and the average mid-latitude A index was about the same, declining from 5.4 to 5.1.

You can see daily sunspot and solar flux numbers, updated after 0230z at http://www.swpc.noaa.gov/ftpdir/indices/DSD.txt. Geomagnetic indices are updated 8 times per day at http://www.swpc.noaa.gov/ftpdir/indices/DGD.txt. Our weekly data reports at the bottom of this bulletin run Thursday through Wednesday, so at the above links you can see that yesterday (Thursday, March 3) the planetary A index dropped from 17 to 12 and the daily sunspot number went from 83 to 71.

The most active day for geomagnetic indexes was March 1, with a planetary A index of 31. The planetary K index rose as high as 6 on that day. Polar propagation paths were disturbed, with the College A index (measured near Fairbanks, Alaska) for March 1-3 at 53, 43 and 23.

NOAA and USAF predict solar flux of 120 on March 4-11, 110 on March 12-15, 105 on March 16-17, and 100 on March 18-21. Planetary A index is forecast at 12 on March 4-5, and 5 on March 6-13, 7 on March 14-15, and 5 on March 16-21.

You can get the daily NOAA/USAF prediction for solar flux and planetary A index at http://www.swpc.noaa.gov/ftpmenu/forecasts/45DF.html. The forecast is usually updated by 2130z daily.

Geophysical Institute Prague predicts unsettled geomagnetic activity March 4-5, quiet to unsettled March 6, quiet March 7, quiet to unsettled March 8-9, and quiet again on March 10.

It looks like good conditions for the ARRL International SSB DX Contest this weekend, or at least much more interesting than the past few years, due to increased solar activity. Along with this comes the greater risk of geomagnetic disruption from solar flares, coronal mass ejections and gusts of solar wind. I received some comments from 80 and 160 meter DXers during the recent minimum noting that they loved the absence of solar activity, because everything was so quiet and stable.

For this year's DX contest we are seeing sunspot numbers in the range of 20-100, but for the first ten days of March 2010 the average sunspot number was 20.1, for 2009 it was 2.4, 2008 it was 3.7, 2007 it was 14.9 and 2006 it was 14.1.

The monthly average of sunspot numbers for December 2010 through February 2011 was 22, 32.2 and 53.5, reflecting the rise in solar activity. The three-month moving average of sunspot numbers centered on January (an average of all daily sunspot numbers for December 2010 through February 2011) was 35.3. The three-month moving average of daily sunspot numbers centered on each month of 2010 was 22.4, 25.7, 22.3, 18.5, 16.4, 20.4, 23.2, 28.9, 33, 35.6, 31, and 30.1. The average centered on January 2011 is back up to the level it was in November 2010, 35.6.

Big news this week was about the solar model explaining the deep solar minimum we've just experienced. Thanks to all the readers who sent emails about this. See the story at http://www.sciencedaily.com/releases/2011/03/110302131859.htm, http://www.nature.com/nature/journal/v471/n7336/extref/nature09786-s1.pdf, http://www.nasa.gov/mission_pages/sunearth/news/solar-cycle23.html and http://www.nasa.gov/images/content/522578main_conveyorbelt.jpg.

Johnathon Ballard, KI4UKF lives in Stokes County, North Carolina, less than 10 miles south of the Virginia state line. On Wednesday, March 2 at 1655z (just before noon local time) he heard Claudio Costa, LW2ECC (Argentina) calling CQ on 2 meter FM, on 144.48 MHz. KI4UKF was using a Moxon wire antenna tacked to a wall, and said the signal was steady for several minutes at about S6, then faded away. He emailed Claudio, who confirmed the transmission. Claudio was using three 5/8 wave verticals and 160 watts.

John Shew, N4QQ of Silver Spring, Maryland was in Curacao for the ARRL DX CW Contest and operated at PJ2T. He had some interesting observations about trans-equatorial propagation on 6 meters into

South America.

He wrote, "Thursday evening around 8 PM (0000z February 19) W9VA and I decided to check 6 meters looking south for TE propagation. The equipment at PJ2T is a Yaesu FT2000 and a M2 5-element at 70 feet with a clear shot over water to South America. Much to our joy the band was full of LU beacons at S9 strength. At 0015z we tuned up to 50.110 MHz and I called CQ using the call PJ2/N4QQ. Over the next 15 minutes I worked 16 stations in 14 grid squares. Signal strengths were S7-S9 plus. Stations included:

PY4LH GG68 PY4OY GG78 LU4FW FF97 PP5XX GG53 LU2NI FG72
LU1DVT GF11 CE3SX FF46 LU5CAB GF05 PY2COY GG44 CE3RR FF46
PU2TVI GG66 ZP5RPO GG14 LU5FCV FF98 LU1DMA GF05 PY3NZ GG40
LU5FF FF99

"We kinda worked the band empty after 15 minutes but it was still open, but there were no more stations calling us so we moved back over to the HF bands.

"It was a great thrill for me to experience TE propagation for the first time after reading about it many times in the ARRL VHF column over the last 50 years. Signals sounded slightly hollow, but were quite strong with no obvious QSB. The band appeared to open to all areas at once, with no obvious flashlight effect, experienced during E-skip. I plotted the grid squares I worked and they fall in a band about 600 miles deep between 2700 and 3300 miles to the south, crossing the entire South American continent. The plotted skip zone appears to slightly skew from southwest to northeast, with stations to the west farther south than those to the east.

"As I have no experience with TE I don't know if this propagation is common for this time of year or if it occurs throughout the year or if it is enhanced by recent solar events. (Solar flux peaked somewhere between 115-125 during our time in PJ2.) With our attention focused on the DX contest we didn't have a lot of time to check 6 meters, but the few days we did check it appeared open to the south from 0000 to at least 0200z.

"It was my impression that TE is a very reliable mode of communication to the south from the southern Caribbean this time of year in the early evening. I have been checking 6 meter spots for the last week and the PYs and LUs have been having a field day beaming north in the late afternoon and early evening, with numerous contacts with KP4, TI, FM, YV, P40, etc. PY5XX and others have also worked EA and CT in Southern Europe and EA8 in Africa. In fact, I think now I understand one reason why 6 meters is so popular with the southern PYs and LUs. From PJ2 it appears there are only 5 countries we can work on TE -- PY, LU, CX, ZP, and CE. I worked all but one in less than 15 minutes. Maybe 4 or 5 more countries can be worked from PJ2 via TE if one counts islands with DXpeditions like Juan Fernandez, Trindade, etc. On the other hand PYs and LUs see in

their regular TE skip zone maybe 25 countries with active 6 meter populations; the countries include the northern coastal South American countries, much of Central America, the Yucatan, and most of the Caribbean from Puerto Rico south."

Thanks, John for a fascinating report!

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@arrl.net.

For more information concerning radio propagation, see the ARRL Technical Information Service web page at http://arrl.org/propagation-of-rf-signals. Well, that theory of yours would not explain why the NBC / Wall Street Journal poll showed that 77% of the people think public unions SHOULD be allowed to have collective bargaining.

> At least right now. And the Dems In
> Exile are fast falling from grace with now talks about recall elections
> to remove the Dems from office.

To say nothing of all the talk to recall the Republican governor from office.

They may well lose, but they are trying to stick up for the middle class. Let me give you an analogy: What about all the farmers that had to paint their barn or plow the back 40? When George Washington came to raise an army, it was a good thing for all of us that the back 40 took a back seat.

As you seem to be on the side of Governor Walker, let me present you with some facts and ask you a questionï¿½

*Apparently, you see no problem with teachers, nurses, librarians, policemen and firemen losing their rights. Do you think they are just supposed to blindly accept longer hours, possibly lower wages, larger

class sizes, whatever management can get away with? Basically, "My way or the highway". Somehow, I don't think -you- would tolerate that.

*What about Walker trying to *ram rod* through in record time this bill that also has a NO-BID clause for the stateï¿½s power plants. This should be patently illegal for either party. ï¿½No-bidï¿½ is just an invitation for corruption.

*Even though the ï¿½David Kochï¿½ was a fake, the point is that Walker ï¿½believed- he was real. Legitimate people with legitimate government business cannot get through to the governor on the first call and get 20 minutes of his uninterrupted time like "Koch" did. This would seem to indicate that Walker thinks the Koch brothers are his true bosses.

*In this same bill, Walker is removing the salary income price cap on vouchers for private schools. This would allow children of the wealthy to attend private schools at tax payer's expense. Maybe you think this is OK. Oh, I forgot. It seems this is consistent with the Republican Standard Operating Procedure of taking away from the middle class and poor and giving it to the wealthy. (Ask Lare about his Republican Michigan governor giving Big Business two billion dollars and taking it away from school children and the elderly pensioners -- and then having the gall to call it "shared" sacrifice).

I know you are strongly Republican and apparently a big Walker supporter, but how can you tolerate the unethical, sleazy facts above that Walker is trying to pull?

"EU czar stomps into digital radio"

Stone the Kroes

By Andrew Orlowski • Get more from this author

Posted in Music and Media, 3rd March 2011 16:30 GMT

Free whitepaper – The Register Guide to Enterprise Virtualization

Europe's digital radio sector is a not a happy place, as consumers vote with their wallets. It isn't just a DAB thing, which is a uniquely British disaster: the appetite for digital radio is similarly depressed all over the continent. And this is not good enough for Neelie Kroes, Europe's unelected digital czar.

"Some people even question the fact that we really need digital radio or claim that radio is 'a special case' which could exist forever on a combination of analogue and online services," she has told the Association for European Radio's annual conference. Kroes reminds us that "it is not for us in Brussels to dictate the pace or the way change should happen in this diverse sector".

Which is true. But that's not going to stop her chipping in. Why?

"My job is to help content providers scale up their offer [sic] at least to the Single Market size – and that cannot be done with FM analogue radio alone," she says.

There is hope then, for Alan Partridge – whose Mid Morning Matters may soon be heard in Latvia and Greece.

Kroes does, to her credit, admit there's a problem, saying, "we need to understand why the EU-wide consensus in 1986 that led to the technically impressive DAB standard has drifted to today’s inertia. Is it because digital radio is the new 'betamax'?"

She then goes on to cite the UK as an example of the potential of DAB. If only.

"How can radio best participate in convergence?" she wants to know. "What incentives would encourage user and manufacturers to shift to the digital format?

Kroes's intervention doesn't go much beyond exhorting her industry audience to do some creative thinking. Which really highlights the

perils of top-down intervention: there's only so much you can do. Digital technology has fragmented the market for devices: digital radio is a variety of incompatible standards, while FM analog still works anywhere. But as she notes, the WorldDMB group is working on this. As she doesn't note, "harmonising" Europe's digital radio masts is too costly for Europe's radio industry to afford. And debt-encumbered governments don't see it as a priority.

Kroes compares the digital radio migration path to dial-up to broadband, and the introduction of GSM. But in each case consumers didn't need to be prodded into action. GSM took off because the economies of scale made mobile telephony affordable to the masses. Broadband took off because it was faster.

The problem with digital radio is that it doesn't really doesn't anything like as new or compelling. There are advantages, some are interesting, fun and useful. But there are costs, too. And the cost of paying for carriage over two infrastructures is crippling an industry that would be struggling to pay for one. Kroes's job is to promote anything with digital on the label. She forgets that many digital technologies end up in the fail bucket: digital audio tape, for example. And while our radio listening in the future most probably will be mostly digital one day, it may well be over IP, not purpose-built digital multiplexes.

Expect an enquiry. Or something. ®

http://www.theregister.co.uk/2011/03/03/eu_czar_digital_radio_do_something/

Yup, you can throw Struble's hunk-of-junk into that too - LMFAO!!! Virtually no one gives a fuck outside of the HD broadcasters, and they don't really care either, as most HD stations are not time-aligned and are just jukeboxes - LMFAO!!!

It's a natural reaction. He's bitter and disappointed about the success digital radio has had in the marketplace. When Mexico adopted HD Radio last week he must have been in tears.

I've seen a lot on Usenet over the years, and he and several of the anti-digital-radio shills are right up there with the best of the best in terms of trolls.

But there actually is something to the article in The Register. If Europe wants to get serious about digital radio they need to adopt the system used in the U.S. which has gained acceptance by broadcasters, receiver manufacturers, automakers, and consumers. FM analog radio is one of the few technologies that's relatively the same throughout the world (the differences are small enough that receiver makers don't need completely different receivers for each market). It would be nice if FM digital followed the same path, and since HD is the furtherst ahead it makes sense for the rest of the world to use the HD system.

I think we all need to applaud RHF, SMS and FarceWatch for their
incessent spin and lies on every post about digital radio. iBiquity
must be paying SMS and FarceWatch a fortune for disrupting and
hijacking all posts about digital radio. I am truely amazed by these
characters, and one would never see this type of manipulation and
obsessiveness from successful technologies such as Apple. SMS and
FarceWatch seem to think that their posts in Usenet make any
difference, but one has to have a site/blog that sits on Google's
Homepage for searches on "hd radio" to make a huge impact.

The culmination of hundreds of hours of research on this person posting from
Germany

http://groups.google.ca/groups/search?hl=en&as_q=&as_epq=GymyBobism&as_oq=&as_eq=&num=100&scoring=&lr=&as_sitesearch=&as_qdr=&as_drrb=b&as_mind=1&as_minm=1&as_miny=2003&as_maxd=1&as_maxm=1&as_maxy=2008&as_ugroup=&as_usubject=&as_uauthors=m+II&safe=off

My 'GymyBobism' collection...updated daily:
==========
some '#' bracketed text added for clarification
all cut and paste, NO modifications of ANY kind
100 % Pure GymyBob. Accept no substitutes!

We need less morons like another clone of Moron II here.
My fifteen minutes of FAME!

Your car alternator will charge your car batery up to 15.4 volts in
cold weather.

NTSC redefined it slightly off 60Hz so that power supply ripple
will move on the screen (two slightly black bands that scroll
up/down your screen

You sure spent a lot of time trying to convince me you don't knwo what
I am talking about...LOL

Voltage does not indicate state of charge well.

At 11.6 volts a 12v battery is about 50-70% charged still.

Polish solar panels are what americans called "flashlights"

There should be subsidies for solar panels but control of prices to boot.

Propane will disapate and freeze when it evaporates.

Gasoline is not nearly as volatile as hydrogen.

When I use pot I imagine everythging is perfect.

Many people have browsers that economize the download

Just another threading error creating confusion

Learn how to thread or sit back and watch for a few years.

Try to stay on topic and on thread too bean brain.

Perhaps try Outlook Express or another browser that knows how to
thread posts.

Bottom posting was the was in the 70s and 80s before threading
browsers were available cheap like OE

Another Forte Agent person that doesn't understand threading.

You use Mozzilla and haven't learned to thread.

Try Outlook Express so you can understand threading maybe.

I have been noticing many threading errors everywhere on Usenet lately.

People with OE don't seem to have the petty problems with subject
lines changing, intermingled posts and downloading binary files with
mixed posts, random pieces and many other problems all the nonOE
people have.

Bottom posting has been obsoletely by threading browsers.

Forwarding does not include headers.

Call your damn ISP and tell them your browser is multiple posting.

90% of the people in America have never operated a computer.

Let's say youre solar cell was trying to put out
14.3 volts DC and you stuck a 10 ohm meter in series with a charged
13.8 volt DC battery.

Your troll was too obvious. Try to engage the mark in conversation
first so there is, at least, some stake, like friendship for the
person listening. When the friendship is well developed then attack.
Not too obvious at first or you will lose your audience. This will
enhance your troll points.

I think outside opinions are worth much more than sales hype from the
company that made the product.
Referring to *factory* charging specifications for the batteries
they make ##

This is power grid induction through capacitive proximity

You can get fooled with another ground in the house finding it's way
back to the transformer neutral.

A thought I have is rain water from a roof on a three story home
through a micro-turbine.

Setback thermostats only work efficiently for small differentials,
dependant on the time duration.

Breakers are good for one time usage of one fault and then they need
to be replaced for any warrantied usage.

If the breaker interupts a fault, it should be replaced.No warranty
will honoured after that.

I don't have a link at this time

There are no hydrogen molecules in water and the oxygen in water isn't flammable either.

Water is inert and contains no energy to be used. Get some basic chemistry first.

Quite simply put, for some of the boneheads here.

NiCads and NiMh batterries are designed to take a current charge forever.

Oh yeah, I can charge a battery and use it six months later fully charged. The nicads will be cooked because you keep them on charge, just in case you need them but when you remember them six months later they are cooked and won't last 5 minutes in the camera.

It takes a complete idiot to deny they can short out all by themselves. Three, loose in a bag can short themselves out.
referring to AA batteries doing the physically impossible

Did they have electricity back in 1994?

I have been around so long with this stuff I believe I invented the diode in 1941 but I am not familiar with the solar panel usage requirements of them. (no P & N substrate explanations please. I wrote the GE manual...LOL)

NOTE: do not pass ground wires through metal holes or cable clamps with two screws on a metal surface.

There is **NOT*** enough energy in a lightning bolt to power your house for more than an hour...if that. Do the math.
The figures escape me but let's say it puts out a roughly MWatt of power for 100 nanoseconds?
100 x 10-9 x 1 x 106 / 3600 (sec/hr) = 0.0027 wH
oooops.... Wouldn't light your home for a 1/2 second.
OK..OK.. multiply the figures time 100 or 1000. Now it would light a 100W bulb for 1 second.

The IEEE-232 standards were never followed or known by many.

Fossil fuels are still renewable and being cxreated as we speak.

Children are venerially created.

If you want to discuss this then fine, otherwise go fuck yourself like your mother did.

Can you let go of my dick before it explodes on ya, goofball?

Petroleum is not related to Natural gas.

I would rather work at my $100/hour job than at chopping wood for hours to save $3/hour

I have no license, I wire and inspect other's wiring for a job and work for a medium size electrical utility.

As a design engineer of transformers for 10 years I happen to know you are full of shit.

I am a Protection & Control Tech by profession and have experience with control systems

Try spelling "bus" correctly! Maybe your brain will start again. Probaby not, you fucking loser.
Referring to the correctly spelled word 'buss' as used in real electrical terminology
http://tinyurl.com/5ctml

X10 signals are transmitted just after the voltage waveform zero crossing. This is in order to avoid conflicts with SCR and Triac peak waveform switching spikes from load type devices such as lamp dimmers.
control module misinformation

Besides when they on any line they will pull of the meter as a disconnect point.
speaking of power line guys miles away removing YOUR electrical meter for THEIR safety

My workplace has been throwing out huge digitizing pallettes (like 24 x 36" units)
in alt.sewing.mach-embroider

The majority prefers top posting.

Not one of your suggesters listened to what the OP requested...LOL

Get your tear ducts flushed by a knowledgeable optometrist.

Not many materials have the huge exponential resistance/heat curve aluminum does. Overload doesn't make it glow like copper...it flashes and explodes.

A bathroom fan motor would never push hot air down ten feet or cold up ten feet.

Bathroom fans have a hard time pushing 55 cfm through a 3-4" pipe 20 horizontal feet. They are made to vent smells and humid air horizontally only.

Why not spend the money on a contract with the grid company and get an exclusive line to your house and never have brownouts.

Usenet rules dictate top posting for readability

Many cell modems are set up to filter bottom posts out.

Cell modems do not cut off anything.

What security flaws.
##referring to Outlook Express##

10 pounds per gallon Imperial. That gallon is totally unique to the US....ooops..I think all gallons are unique to the US now.

The standard Imperial gallon the whole world used weighs 10 pounds exactly.

The copper isn't worth more than 5 cents per pound. It is classed a mixed copper and nobody wants it.

Hey moron! The copper is considered "mixed" copper and is worth about $0.02 per pound, if he seperates it all.

Just don't ever lose weight. Toxins are stored in your fat cells.

Did you know, **NO***, I repeat ***NO*** death has ever been related to PCBs?

Insulated square copper wires from a dry transformer are not 99% copper and take a lot of work to remove the insulation.

I have tonnes of insulated copper wire if you want it. I think you could almost have for the picking it up. How many bins can you take per year

50 lbs? We have it by the bin full. Mostly #6 to 650 MCM. I beleive you would have to leave a bin and then pick it up full later to compete with the current scrapper.

Can't this tranformer be used by somebody to generate a second 120V from a single phase 120V inverter? It sounds pretty beefy.

BTW: once you knock the wedge out of the coil form the laminations will be easier to get out. This keeps them from buzzing until the varnish and other impregnations go into it.

All you guys have a bad Christmas or Jewish and didn't see Santa or something?

Run each signal twisted with a ground for noise. RD twisted with gnd as a pair, TD twisted around ground as a pair etc... This means signal/logic ground not power ground or case ground, if they are different. Do not
connect the other ends of the ground conductors.

Tar pitch in a flourescent ballast does ***NOT*** contain PCBs and probably never did.

Religion is not genetic or even herodigious

I believe the warmest part of the lake is just below the ice. As the water frezes it rises to the top and joins the other ice formations.

Gel cell won't cut it when it comes to putting out 100A or more. They cook in one spot and the rest of the electrolyte doesn't circulate fast enough.

There is nothing standard about USanian measurements. They changed their sizes to avoid trading with the rest of the world. This worked for a few centuries but the rest of the world moved on to the metric

system to avert the confusion the US caused.

Ever put your ohmmeter (do I need to explain an ohmmeter also?) across a capacitor? It measures infinity after charging to the supply voltage because the electrolyte is an insulator.

Electrolytes are not conductors of electricity in a capacitor.

If the electrolyte conducted it would be a resistor.

I doubt they are 4 farads. More likely 4 microfarads uf.
referring to 4000mfd caps

Sometimes it is an ego boost to have these so-called "professionals" come and beg for information because they can't our toys do what the good guys can but I would never hire them given a choice.

Do you measure altitude in degrees? Many aeronautical people would disagree with you.
referring to solar azimuth/altitude thread

My house is filled with motion detectors. They don't all operate lights. They mostly signal my house control computer and it decides what to do and when.

Enlighten please (like it really matters...LOL)

I will hand stitch my embroidery before I would pay that kind of money...LOL

A 50Hz transformer needs double the iron a 60Hz transformer needs for the same VA capacity.

Does it test CTs with real current or just voltage?

It doesn't really matter where the secondary current comes from, secondary exciting or primary current exciting, the voltage developed or excited across it will be about the same.
talking about an OPEN circuit CT transformer

High voltage spikes want to keep going at the end and this is where your saturating core transformer core is located behind the fuse.

Moving a kill-a-watt unit around is like using it on somebody else's house and telling the person's load.

oooops. A flourescent with a filament?
not knowing how most fluorescents start up

You are a stupid basterd.

Ever considered anxiety medication? Chest pains for a man is a classic symptom.

When confronted with many websites stating the otherwise he won't address the issue but repeats his crap again like a child stamping his

feet.
Oh, the Irony!

What are you doing up at this ungawdly hour? I just got finished
embroidering about 10 items, including a flight bag for golf clubs.
in alt.sewing.mach-embroider

I just love women with front loading bobbins.
in alt.sewing.mach-embroider

I doubt a 6 needle machine would be faster than a 1 needle machine
unless you do repetitive patterns.
in alt.sewing.mach-embroider

I had many problems with this and damaged my machine a few times. It
was the needles. Find ones that have very little "hip" bump around the
eye of the needle.
in alt.sewing.mach-embroider

I have found doctors absolutely ignorant and totally obstinet on
these kind of issues.

I put my first child on Ritalin for a year or so when quite young. It
beat going to prison for beating him black and blue.

I made a big mistake and should have "drugged" all of my children the
same.

I did the chem.cut medication stuff for a few years with my first
child and then found Naturopathic Doctors using homeopathy to get more
lasting relief.

Homeopathics saved me thousands of dollars for operations I did not
have on my children

Accupunture worked for my 1 and two year old children for ailments
after the medical doctors could do nothing for.

Placebo is a completely natural cure for many ailments.

Polio Vaccine? They stopped giving that one long before HIV was invented.

You have no idea what you are talking about and either does anybody
else here.

See if you can replace it with a thermal acting unit. They have a
rachet on a shaft that holds thew contacts closed.
confusing motor overload with breaker

What are you doing in my group?

Milk is just plain poison for humans.

I am not a chemist but I know that cow's milk calcium molecules are a
huge irritant to human digestion and usually results in calcium
deficiencies

See an accupunturist for the pain and circulation
See a chiropractor to keep the structure good.
See a naturopathic doctor for the chemical imbalance.
See a medical doctor for a some poison that will make her life shorter.

Even an honest Doctor will take yoy they arte totally ignorant of
nutrition.

The medical doctors will play the time game and probably just let him
die after removing half his organs because they may be a problem.

Some things mankind should just not eat too much of and it isn't meat
typically and this may not be consistent for all people.

Do not listen to the stories of addiction. Yes, they are tough to stop
but so is insulin for a diabetic. I have stopped taking mine and it
wasn't that bad but after months of regressing I chose to return like
the other half the population.

Make sure your wrists are well warmed up before putting sudden jerky
movements to them.

Make up your mind before you mouth off like the usual Internet piece
of shit. This is a rough group and if you had followed the usual
recommendations you would have known that and have nothing to say
about it.

Source record: 221287

Liberty Net: February 26, 2011

http://3950.net/2011/03/liberty-net-february-26-2011/

by Kevin Strom, WB4AIO

A COUPLE OF INSANELY OBSESSED would-be jammers made obscene catcalls and played noises during the Liberty Net this week, but even the lowest-power and furthest check-ins were able to overcome them and communicate an amazing array of ideas and new information to the other net participants.

Here are just a few of the subjects discussed and debated this week on amateur radioï¿½s longest-running and best discussion net:

ï¿½ Was the killing of four White Americans ï¿½ three of whom were amateur radio operators ï¿½ by savage Somali pirates revenge for the recent sentencing of another Somali pirate? It is reported that some 30 ships and about 600 captives are still being held by these pirates. (15 minutes)

ï¿½ Why does Obama meet with lobbyists in a small complex just off the White House grounds? Simple: If he met with them on White House grounds, the lobbyists would have to sign Secret Service logs, which are required to be released to the public. (20 minutes)

ï¿½ Why does the TSA have an official policy of never checking the immigration status of persons applying for pilotï¿½s licenses? (23 minutes)

ï¿½ The corruption and financial profligacy in Americaï¿½s most African city, Detroit, has reached such proportions that they are seriously considering simply shutting down the public school system. (50 minutes)

ï¿½ One of the most important things we can teach our children is to avoid debt: they will be much better off if they spend none of their precious lives working to pay interest to the bankers for fictitious ï¿½loans.ï¿½ (1 hour 12 minutes)

ï¿½ When a group of 14- and 15-year-old Kenyan and Ethiopian Black male ï¿½refugeesï¿½ ï¿½ as large and strong as many adults, since Blacks mature faster than Whites ï¿½ were sent to a school in Manchester, New Hampshire, they were placed with sixth grade White kids because of their relative mental development. The result was that four of the Blacks separated a 12-year-old White girl from her fellow students and relentlessly tormented her, demanding that she become their ï¿½girlfriend.ï¿½ When she refused, the girl was beaten by the Blacks.

She received a concussion and several of her teeth were knocked out. The media have given almost no publicity to this story. Neither the school nor the local authorities are taking any action against the Blacks. School officials claim that ï¿½cultural differencesï¿½ caused the attack. (1 hour 48 minutes)

ï¿½ Why is Fox News all in an uproar over the millions that public employee unions have managed to wrest for their members from government, when the budget for the useless, murderous, and illegal Zionist wars in the Middle East dwarfs them by hundreds of times? (1 hour 55 minutes)

ï¿½ Not only is regime in Washington importing millions of Third Worlders to replace us, but they are cherry-picking them from the worldï¿½s worst trouble spots (and therefore from the most aggressive and low-IQ tribes of humans in existence). This is a guaranteed formula for disaster, since ï¿½ contrary to equalitarian dogma ï¿½ humans are not equal or interchangeable, and most behavior is genetically determined. (2 hours 18 minutes)

Thanks to N2SAG and N2IRJ and W1WCR, you can listen to the Liberty Net every week ï¿½ somewhere near 3950 kHz, plus or minus the interference (lately substantially above that frequency) ï¿½ every Saturday night at 10PM Eastern Time, and also via the Web. You can also download the Liberty Net right here at http://3950.net and listen in your car, at work, or wherever you like.

How long ago did you start in this hobby ? It was a L-O-T worse a few
years back , during the Cold War some parts of the HF spectrum were
full of jammers , intentional interference , useless monotonous
broadcasts and the power of the transmitters were often in the
Megawatt range . It is MUCH better now !

I picked up one of these little radios just because it was cheap and I was curious as to it's true functionality. Preliminary tests showed amazing results.

First thing out of the box, I put in the batteries (comes with three AA NiMHs) and hit the power button. It was set to FM (US band, it also has the Russian 64-108, the "short" Japanese band 76-90 and the "long" Japanese band 76-108 (which includes their bottom tier of TV channels).

This is the first (portable) radio I've had that gets ZERO crosstalk between FM stations just 200 KHz apart. This includes the local AFN outlet on 88.3 (at the time it's huge 40 watts was about 5 blocks away as the crow flies) and the Osan AFN outlet on 88.5, about 15 miles away. This feature is handy, since there are no two stations here more than 400 KHz apart, with 95% of them being just 200 KHz apart. It's a very crowded band (gets really crazy when the tropo is in and the Chinese FM's take over..) As the radio has dual speakers and a stereo amp. the FM stereo is quite good and you don't HAVE to have headphones, but of course some are supplied.

Moving on to the MW band, I find the sensitivity to be way above par for a small portable. The DSP does a very admirable job here. When using the auto tuning feature, the radio found some 40 stations, some which were pretty far down in the mud. The radio has a digital readout signal meter with both strength in dBu and S/N in dB. The AGC hits a wall at 63dBu on the MW, LW and SW bands.

The SW reception is excellent, but is limited on this radio to AM only, and the band runs only from 2300-21950 KHz. This is still useful for most program and utes listening. In addition, it has a bandwidth selector which operates on all the AM bands, with 6, 4, 3, 2 and 1 KHz bandwidths. Somehow it maintains a pleasant audio even at the low bandwidths, which most definitely work, as I can go to a fairly high level station, go to the 1 KHz position, tune 2 KHz off channel and have virtually nothing. Works out very well for the extremely crowded Asian SW bands, where stations every 5 KHz are not uncommon.

One interesting thing about the radio is that, in addition to the usual 12/24 hour clock display, it also has a thermometer, which reads out in Celsius when the AM is in 9 KHz mode and Fahrenheit when in the 10 KHz mode.

In a couple weeks, with any luck at all, I'll be getting a Tecsun PL-660. This one will have SSB, sync, Aircraft band, and a bunch of other bells and whistles. I'll do a short review of that one as well.

BAD,

What about the Built-in Rechargeable Battery function
via USB Jack (5V) for the 3 "AA" Batteries {4.5V} ?

I'd say more like 2020 to 2025 for analog terrestrial radio to disappear in the U.S. Because of the recession you're not going to see HD Radio in every new car for five to seven more years, and thus there will be too many relatively new vehicles with analog-only radios in "~2016+." Look how long it took every vehicle to have FM, after FM was invented, more than thirty years!

I'd predict that by 2020, buying a vehicle with an analog FM radio will be like buying a vehicle with a cassette deck in 2011. I could be wrong of course, all of a sudden something so much better could come along that everyone abandoned digital radio.

The big advantage in the U.S. and other HD countries, is that it's a more gradual transition than in Europe. This causes some problems in terms of co-existence of analog and digital on the same band, but it also makes the transition a lot easier. It's still possible that if DAB+ fails that the European countries will look to the success of HD Radio in the U.S. and realize that even though it's an American system that it's a better solution than DAB+.

- - - Some confusion between RCI (Canada)
- - - and CRI (China) me thinks.

No actually Canada RCI/CBC rents time on their
Transmitters in Sackville, NB to the Chinese CRI.

CRI in English on 11,970 kHz @ 2305 UTC -via- Canada
http://groups.google.com/group/rec.radio.shortwave/msg/839c3f7966d35776

Draw a Line from Sackville, NB to Hawaii and the
RCI Transmitters there put out a Shortwave Signal
that Covers the entire Continental USA [48 States].

Honestly do not understand why the BBC, DW,
RNW, and others don't make use of the Sackville
Transmitters for their Shortwave Broadcasts to the
USA. The Chinese CRI Shortwave Broadcasts from
Sackville are as good as it gets for Signal Quality
and Sound. East Coast to West Coast here in
California : Usually S9+10 and SIO 555 with Very
Good Audio -imho- the Chinese CRI Are Getting
Their Money's Worth and Them Some to Reach the
US {American} Shortwave Radio Listener. ~ RHF
.
HEY ! : VOA You Too Could Use a Few Shortwave
Radio Broadcasts in English from Sackville too :
Aimed at New Zealand & Australia... ;;-}}
.
.

The latest edition (5 March) of Top News has been posted:

http://www.wwdxc.de/topnews.htm

dxAce
Michigan
USA

Drake R7, R8, R8A and R8B
70' and 200' wires
GE SR I (2) and II

239 countries heard and 225 QSL'd (veried, for those in Glendale) using the NASWA Country List.

And, as always, don't let your children attend the Sullivan College of Technology & Design.

They've hired at least one dufus who once claimed to have a PhD and lied about being arrested, and who knows, there may be more dufi there.

I can certainly remember when Moscow was available in English 24/7 from many different transmitter sites.

I like the concept of going to 3 "AA" Rechargeable
Batteries {4.5V} for Power and the 5V USB Computer,
Wall Charger, Car Charger -a/o- Solar Charger 'options'.

With the Cellphone Industry standardizing on their
Wall and Car Chargers having USB Jacks with
interchangeable Cables : Making many/most 'portable'
AM & FM Shortwave Radios Rechargeable and Powered
by 2 or 3 Batteries is a nice idea. - imho ~ RHF
.

Exactly. We get a choice of Smiling Liar Number One and Smiling Liar Number Two, and both are carefully vetted by the money-men before we ever hear of them.

On the rare occasions when a candidate not desired by the Jewish power structure makes it through that gauntlet, the media (both "conservative" and "liberal") will scream to high heaven at the "evil" of the genuine candidate, and he or she will get the same treatment that Charlie Sheen and James Traficant and David Duke and Rick Sanchez and Cynthia McKinney got: they will spy on him, haunt him day and night looking for anything that looks bad, ply all his exes with money for "dirt," and send in sex operatives to destroy him if necessary.

When anyone gets that kind of treatment from the establishment and the media, it is logical to conclude that there is _something_ good, genuine, and honorable about him or her.

With every good wish,

Kevin Alfred Strom.

Interesting what you eliminate, when you quote these surveys. 77% of the peeople believe public sector unions should have collective bargaining privileges (it's a privilege, not a right), but that same survey revealed that 60%+ believe that there should not be public sector unions in the first place, and that 3:1 they believe that the budget must be balanced and that public sector union benefits are to blame for a lion's share of the shortfall.

So, again, the people are behind the Governor.

Interesting also what the skew is on that. But keep swinging, Joe.

No, they're not. They're trying to stick up for political contributors.

>

No one is losing any rights. Only a privilege that even George Meaney
of the AFL-CIO said they had no business getting in the first place. and
he said that decades ago.

> *What about Walker trying to *ram rod* through in record time this bill

Really?

I did.

> This would seem to
> indicate that Walker thinks the Koch brothers are his true bosses.

Sophistry. I heard the playback of the call. He sounded like he was
massaging a contributor. No different than NPR taking calls from
patrons, making promises on programming they have no intention of
keeping, and then ignoring that programming once the checks clear.

>
> *In this same bill, Walker is removing the salary income price cap on

No, it would allow citizens to send their children to private school
without having to pay for the public schools at the same time. No one
should have to pay the costs of a system that they're currently paying
exorbitant rates not to use.

Regardless of income.

Let the public schools compete for their tuition, just like the
private schools. If they're not doing the job, they don't deserve the
support, anyway.

Logic would dictate that one would not plead guilty to a crime that one did not commit.

Therefore, you, Kevin, are a dumbass 'tard boy who should not have been allowed to procreate as you are obviously one of the genetically defective peoples that you like to rant about.

Obama still believes that oil is the great evil in the world.
Michelle Obama believes every American citizen is too fat.

Solution: Drive the cost of fuel through the roof so people will quit
using as much also resulting in the prices of all consumables (ie
food) going sky high thus creating "The Obama Diet".

They're just killing two birds with one stone yes?

Indeed, it is doing wonders for the economy. Just this week I
increased my "trip charge" for service calls by $10 thanks to fuel
price increases.

On a side note: A lot of people mistakingly compare the current
economy with the Great Depression.
During the Depression everyone was out of work but a 10 pound slab of
bacon cost a dime. Everything was inexpensive but no one had a job or
money.
Today a lot of people are out of work and a 12 ounce package of bacon
cost around $4. Even those with jobs are finding it more difficult to
make ends meat.

Obama's "social justice" will soon be achieved. We shall all be
EQUALLY poor.

I never graduated.

"[...]So if a politician voiced an opposition point of view, and some
did, there was a real risk of them being beat down by an opponent
financed by the financial industry. Doesnï¿½t that kind of weaken the
ability to have a real discussion?

Absolutely. Thereï¿½s a chilling effect. One of our commissioners,
Brooksley Born, sheï¿½s the classic case. Brooksley Born was appointed by
[President Bill] Clinton in 1996 to head the Commodity Futures Trading
Commission. She was one of our 10 commissioners. From 1994 to 1996 or
1997, there were a series of scandals involving the highly risky use of
the over-the-counter derivatives; these are the ones not traded on the
Chicago Board of Trade and the commodity exchanges. There was a big
scandal at Procter & Gamble with Sumitomo Bank. So Brooksley Born, as
chair of that commission, stepped forth and said, ï¿½I think we ought to
discuss whether these over-the-counter derivativesï¿½ï¿½which ultimately
grew to this multitrillion-dollar industry by the time of the
crisisï¿½ï¿½should be regulated.ï¿½ She put out a concept paper to discuss it.

Well, she was immediately shut down by the powers that be. It was
[former Chairman of the Federal Reserve] Alan Greenspan, it was [former
Secretary of Treasury] Robert Rubin, it was [former Securities and
Exchange Commission Chairman] Arthur Levitt, it was [former Secretary of
Treasury] Larry Summers and it was the financial industry. And they
essentially put a stop, they went to Congress and said that Congress
ought to adopt a moratorium on any regulationï¿½and then two years later,
they got a complete ban on regulation. So this is an example where
someone stood up, said the right thing and was put down for it. But this
should be a constant source of concern, because also more and more power
is concentrated in fewer and fewer banks. Between 1990 and 2005, I
believe the top 10 banks in the country, their share of assets grew from
25 percent to 55 percent. After the crisis now, we have fewer big banks,
because Lehman [Brothers] went under, Bear Sterns went under, Merrill
Lynch merged with Bank of America. The concentration of power by fewer
banks is even greater today.[...]"

We go to war to protect corporations and to make money for defense contractors. This is the way it's been my whole life. We have not had a single legitimate war since 1945. We've had dozens of bullshit wars that accomplished nothing. We always end up worse than before.

General Dynamics and Raytheon make out like bandits, 'cause they are bandits.

Afghanistan pipelines are why the Taliban were our friends back in the '90s. By the way, they tried to warn Bush about 9-11. Rather publicly. For Bush to deny he was warned is a joke. He wanted war.

> documentation.

So Fannie and Freddie started loaning huge amounts of money to people who couldn't afford houses in 2000. But it took until late 2007 and 2008 for all these people who "couldn't afford houses" to get into financial trouble with those houses that they couldn't afford. That's a long, long time for dirt poor bums to be successfully making mortgage payments. And all these people who "couldn't afford houses" got into trouble at exactly the same time which, by an incredible coincidence, just happened to be the exact same historical moment when the rest of the economy was melting down. But there's no connection between the two events. Really? Banks and investment firms taking on insane, high stakes risks that they couldn't afford to lose had nothing to do with it? People losing their jobs en masse in 2007 and 2008 had nothing to do with a wave of people no longer being able to meet their financial obligations from late 2007 to today? No connection at all?

Spread that story in your garden and you can grow yourself some tomatoes.

The possible converse, and rather likely outcome of that will be the taxpayer having to bid on the auction of available tuitions. The death of publicly funded education would be another step closer. I can see the public education system resembling the rust belt at worst and privatized jails at best.

I'm now wondering how many of the mob at a book burning have a secondary education. How many Baptists at a snake charming ceremony have a high school diploma? How many of the pervert Mormon's thirty wives have completed grade nine? How many ex-navy guys in Holland MI. finished grade four?

It's a slippery slope.

Get Me ReWrite! By Barry Ritholtz - May 13th, 2010, 7:20AM My approach to everything I have written, studied and analyzed in this space is pretty straight forward: Start with the data and evidence and go forward from there. Figure out what the “Truth” is; try to get as close to the objective reality beneath the noise in order to make intelligent investing decisions for myself and my clients. There are others who do not share this objective. Their goals are either political (winning the next election) or ideological (having their belief system become dominant). Truth is irrelevant to these people. Not surprisingly, these folks — many of whom contributed to the crisis in a might way — are desperately trying to duck responsibility for what happened. Those who helped cause the crisis are engaged in an ongoing effort to rewrite its history. Their goal? Exonerate their own bad behavior, throw off any responsibility to the collapse, blame anything but their own ideology and horrific decision making. They want to keep pushing their tired political agendas, despite the damage they may have caused. When writing Bailout Nation, I tried to steer clear of partisan finger pointing. I kept the focus on what actually occurred, what could be proven mathematically. I blamed Democrats and Republicans — not equally, but in proportion to their what they did. Unsupported theories, tenuous connection, loose affiliations were not part of the analysis. Every legislative change, each regulatory failure, all corporate actions, to be blameworthy, had to manifest themselves in actual mathematical proof. This led me to ascertain the following 30 year sequence: -Free market absolutism becomes the dominant intellectual thought. -Deregulation of markets, investment houses, and banks becomes a broad goal: This led to Glass Steagall repeal, Derivative exemptions, Investing house leverage exemptions, and a new breed of unregulated non bank lenders. -Legislative actions reduce or eliminate much of the regulatory oversight; SEC funding is weakened. -Rates come down to absurd levels. - Bond managers madly scramble for yield. -Derivatives, non-bank lending, leverage, bank size, compensation levels all run away from prior levels. - Wall Street securitizes whatever it can to

satisfy the demand for higher yields. -"Lend to securitize" nonbank mortgage writers sell enormous amounts of subprime loans to Wall Street for this purpose. -To meet this demand, non bank lenders collapse lending standards, leading to a credit bubble. -The Fed approves of this innovation. -Housing booms, then busts -Credit freeze, market collapse recession. You will note that the CRA is not part of this sequence. I could find no evidence that they were a cause or even a minor factor. If they were, the housing bubbles would not have been in California or S. Florida or Ls Vegas or Arizona — Harlem and South Philly and parts of Chicago and Washington DC would have been the focus. Nor do I blame Fannie and Freddie. Now understand, there is no love lost between myself and the GSEs. For years, I have called them "Phoney and Fraudy." Since George Bush and Hank Paulson nationalized them, I have accused the government of using these two as a backdoor bailout for banks — a hidden PPIP/TARP used to buy all the garbage mortgages that banks are desperate to get off their balance sheets. Longtime readers will recall we very publicly shorted Fannie based upon their fraudulent practices and horrific balance sheet. But even I cannot reconcile the movement to place all of the world's troubles at the feet of the GSEs. Not, at least, according to the data. That lack of evidence, however, doesn't stop ideologues from making the attempt. Consider this attempt at rewriting the causes of the credit crisis by Kevin Hassett: "The worst financial crisis in generations was set off by a massive government effort, led by the two mortgage giants, to make loans to homebuyers no matter whether they could make the payments. Lenders were willing to lend money to just about all comers, no matter how low their income. Why? Because the lenders knew Fannie and Freddie would purchase the loans from them for a high price before bundling them into securities to sell to investors." Now, this makes for a fascinating narrative that plays into a number of different ideological beliefs. It exonerates the radical free market deregulators, it ignores what the private sector did, and it somehow ignores the fact that Congress was controlled by a very conservative GOP from 1994 to 2006 — the prime period of time covered leading up to and including the beginning of the crisis. But worse than all of that, the data supporting Hassett's position simply isn't there. Over the past 2 years, I have repeatedly asked the people who push this narrative to provide some evidence for their positions. I have offered a $100,000 if they could prove their case. Specifically, I have requested some data or evidence that DISPROVED the following facts: -The origination of subprime loans came primarily from non bank lenders not covered by the CRA; -The majority of the underwriting, at leats fro the first few years of the boom, were by these same non-bank lenders -When the big banks began chasing subprime, it was due to the profit motive, not any mandate from the President (a Republican) or the the Congress (Republican controlled) or the GSEs they oversaw. -Prior to 2005, nearly all of these sub-prime loans were bought by Wall Street — NOT

Fannie & Freddie -In fact, prior to 2005, the GSEs were not permitted to purchase non-conforming mortgages. -After 2005, Fannie & Freddie changed their own rules to start buying these non-conforming mortgages — in order to maintain market share and compete with Wall Street for profits. -The change in FNM/FRE conforming mortgage purchases in 2005 was not due to any legislation or marching orders from the President (a Republican) or the the Congress (Republican controlled). It was the profit motive that led them to this action. These are data supported facts I pounded on in BN. Of course, folks like Hassett hate this factual history, as it conflicts with their goals and politics. Rather than produce evidence, they create story lines unsupported by facts. But Monkeys love a good narrative, and so they give that to them. However, as an investor, I demand evidence, data and facts. The blame Fannie & Freddie crowd have managed to remain blissfully data free. They have steadfastly ignored all calls for proof. Its way past the time to call out their intellectual dishonesty. If you cannot show any data, if you cannot prove what you are alleging with actual facts, you need to be called out for what it is you actually are: Proponents of a failed philosophy. http://www.ritholtz.com/blog/2010/05/rewriting-the-causes-of-the-cred...

MERS, a creation of the free market to circumvent law, to defraud, cheat on taxes, maybe the un-dueing of wall street:)the housing bubble was solely a private sector affair to defraud, engage in criminal activity, and racketeering

Homeowners' Rebellion: Recent Rulings Could Shield 62 Million Homes From Foreclosure
Thursday 19 August 2010
by: Ellen Brown, t r u t h o u t | News Analysis

Over 62 million mortgages are now held in the name of MERS, an electronic recording system devised by and for the convenience of the mortgage industry. A California bankruptcy court, following landmark cases in other jurisdictions, recently held that this electronic shortcut breaks the chain of title, voiding foreclosure. The logical result could be 62 million homes that are foreclosure proof.
In a Newsweek article a year ago called "Too Big to Jail: Why Prosecutors Won't Hit Wall Street Hard in the Subprime Scandal," Michael Hirsch wrote that we were unlikely to see trials and convictions like those in the savings and loan scandals of the 1980s, because fraud and blame have been so widespread that there is no one to single out and jail. Said Hirsch:
"The sad irony is that in pleading collective guilt, most of Wall Street will escape whipping for a scheme that makes Bernie Madoff's shenanigans look like pickpocketing. At the crest of the real-estate bubble, fraud was systemic and Wall Street had essentially gone into

the loan-sharking business."
"Unfortunately," he added, "prosecution of fraud is the only way you're going to get reform on Wall Street."
Sure enough, a year later we got a banking reform bill that was so watered down that Wall Street got nearly everything it wanted. The too-big-to-fails, rather than being whittled down to size, have grown even bigger, circumventing antitrust laws; and they are being allowed to carry on pretty much as before. The Federal Reserve, rather than being called on the carpet, has been given even more power; and the Consumer Protection Agency - the main part of the bill with teeth - has been put under the Fed's watchful eye. Congress and the Justice Department seem to have bowed out, leaving no one to hold the finance industry to account.
But the best laid plans even of Wall Street can sometimes go awry. In an ironic twist, the industry may wind up tripping over its own Achilles heel, the Mortgage Electronic Registration Systems or MERS. An online computer software program for tracking mortgage ownership and rights, MERS is, according to its web site, "an innovative process that simplifies the way mortgage ownership and servicing rights are originated, sold and tracked. Created by the real estate finance industry, MERS eliminates the need to prepare and record assignments when trading residential and commercial mortgage loans." Or as Karl Denninger puts it, "MERS own website claims that it exists for the purpose of circumventing assignments and documenting ownership!"
MERS was developed in the early 1990s by a number of financial entities, including Bank of America, Countrywide, Fannie Mae, and Freddie Mac, allegedly to allow consumers to pay less for mortgage loans. That did not actually happen, but what MERS did allow was the securitization and shuffling around of mortgages behind a veil of anonymity. The result was not only to cheat local governments out of their recording fees, but to defeat the purpose of the recording laws, which was to guarantee purchasers clean title. Worse, MERS facilitated an explosion of predatory lending in which lenders could not be held to account because they could not be identified, either by the preyed-upon borrowers or by the investors seduced into buying bundles of worthless mortgages. As alleged in a Nevada class action called Lopez v. Executive Trustee Services, et al.:
"Before MERS, it would not have been possible for mortgages with no market value ... to be sold at a profit or collateralized and sold as mortgage-backed securities. Before MERS, it would not have been possible for the Defendant banks and AIG to conceal from government regulators the extent of risk of financial losses those entities faced from the predatory origination of residential loans and the fraudulent re-sale and securitization of those otherwise non-marketable loans. Before MERS, the actual beneficiary of every Deed of Trust on every parcel in the United States and the State of Nevada could be readily ascertained by merely reviewing the public records at the local recorder's office where documents reflecting any ownership interest in real property are kept.…
"After MERS, ... the servicing rights were transferred after the

origination of the loan to an entity so large that communication with the servicer became difficult if not impossible... . The servicer was interested in only one thing - making a profit from the foreclosure of the borrower's residence - so that the entire predatory cycle of fraudulent origination, resale and securitization of yet another predatory loan could occur again. This is the legacy of MERS and the entire scheme was predicated upon the fraudulent designation of MERS as the 'beneficiary' under millions of deeds of trust in Nevada and other states."

MERS now holds over 62 million mortgages in its name, including over half of all new US residential mortgage loans. But courts are increasingly ruling that MERS is merely a nominee, without standing to foreclose on the collateral that makes up a major portion of the portfolios of some very large banks. It seems the banks claiming to be the real parties in interest may have short circuited themselves out of the chain of title entitling them to the collateral.

Technicality or Fatal Flaw?

To foreclose on real property, the plaintiff must be able to produce a promissory note or assignment establishing title. Early cases focused on MERS' inability to produce such a note, but most courts continued to consider the note a mere technicality and ignored it. Landmark newer opinions, however, stress that this defect is not just a procedural. but a substantive failure, one that is fatal to the plaintiff's case.

The latest of these decisions came down in California on May 20, 2010, in a bankruptcy case called In re Walker, Case no. 10-21656-E-11. The court held that MERS could not foreclose because it was a mere nominee and that as a result plaintiff Citibank could not collect on its claim. The judge opined:

"Since no evidence of MERS' ownership of the underlying note has been offered and other courts have concluded that MERS does not own the underlying notes, this court is convinced that MERS had no interest it could transfer to Citibank. Since MERS did not own the underlying note, it could not transfer the beneficial interest of the Deed of Trust to another. Any attempt to transfer the beneficial interest of a trust deed without ownership of the underlying note is void under California law."

In support, the judge cited In re Vargas (California Bankruptcy Court), Landmark v. Kesler (Kansas Supreme Court), LaSalle Bank v. Lamy (a New York case) and In re Foreclosure Cases (the "Boyko" decision from Ohio Federal Court). (For more on these earlier cases, see here, here and here.) The court concluded:

"Since the claimant, Citibank, has not established that it is the owner of the promissory note secured by the trust deed, Citibank is unable to assert a claim for payment in this case."

The broad impact the case could have on California foreclosures is suggested by attorney Jeff Barnes, who writes:

"This opinion ... serves as a legal basis to challenge any foreclosure in California based on a MERS assignment; to seek to void any MERS assignment of the Deed of Trust or the note to a third party for

purposes of foreclosure; and should be sufficient for a borrower to not only obtain a TRO [temporary restraining order] against a Trustee's Sale, but also a Preliminary Injunction barring any sale pending any litigation filed by the borrower challenging a foreclosure based on a MERS assignment."

While not binding on courts in other jurisdictions, the ruling could serve as persuasive precedent there as well, because the court cited nonbankruptcy cases related to the lack of authority of MERS, and because the opinion is consistent with prior rulings in Idaho and Nevada Bankruptcy courts on the same issue.

RICO and Fraud Charges

Other suits go beyond merely challenging title to alleging criminal activity. On July 26, 2010, a class action was filed in Florida seeking relief against MERS and an associated legal firm for racketeering and mail fraud. It alleges that the defendants used "the artifice of MERS to sabotage the judicial process to the detriment of borrowers"; that "to perpetuate the scheme, MERS was and is used in a way so that the average consumer, or even legal professional, can never determine who or what was or is ultimately receiving the benefits of any mortgage payments"; that the scheme depended on "the MERS artifice and the ability to generate any necessary 'assignment' which flowed from it"; and that "by engaging in a pattern of racketeering activity, specifically 'mail or wire fraud,' the Defendants ... participated in a criminal enterprise affecting interstate commerce."

Local governments deprived of filing fees may also be getting into the act, at least through representatives suing on their behalf. Qui tam actions allow for a private party or "whistle blower" to bring suit on behalf of the government for a past or present fraud on it. In State of California ex rel. Barrett R. Bates, filed May 10, 2010, the plaintiff qui tam sued on behalf of a long list of local governments in California against MERS and a number of lenders, including Bank of America, JPMorgan Chase and Wells Fargo, for "wrongfully bypass[ing] the counties' recording requirements; divest[ing] the borrowers of the right to know who owned the promissory note ...; and record[ing] false documents to initiate and pursue non-judicial foreclosures and to otherwise decrease or avoid payment of fees to the Counties and the Cities where the real estate is located." The complaint notes that "MERS claims to have 'saved' at least $2.4 billion dollars in recording costs," meaning it has helped avoid billions of dollars in fees otherwise accruing to local governments. The plaintiff sues for treble damages for all recording fees not paid during the past ten years and for civil penalties of between $5,000 and $10,000 for each unpaid or underpaid recording fee and each false document recorded during that period, potentially a hefty sum. Similar suits have been filed by the same plaintiff qui tam in Nevada and Tennessee.

Axing the Bankers' Money Tree

Most courts continue to look the other way on MERS' lack of standing to sue, but the argument has picked up enough steam to consider the rather stunning implications. If MERS is not the title holder of

properties held in its name, the chain of title has been broken and no one may have standing to sue. In MERS v. Nebraska Department of Banking and Finance, MERS insisted that it had no actionable interest in title, and the court agreed.

An August 2010 article in Mother Jones titled "Fannie and Freddie's Foreclosure Barons" exposes a widespread practice of "foreclosure mills" in backdating assignments after foreclosures have been filed. Not only is this perjury, a prosecutable offense, but if MERS was never the title holder, there is nothing to assign. The defaulting homeowners could wind up with free and clear title.

In Florida, Jacksonville Area Legal Aid attorney April Charney has been using the missing-note argument ever since she first identified that weakness in the lenders' case in 2004. Five years later, she says, some of those homeowners are still in their homes. According to a Huffington Post article titled "'Produce the Note' Movement Helps Stall Foreclosures":

"Because of the missing ownership documentation, Charney is now starting to file quiet title actions, hoping to get her homeowner clients full title to their homes (a quiet title action 'quiets' all other claims). Charney says she's helped thousands of homeowners delay or prevent foreclosure and trained thousands of lawyers across the country on how to protect homeowners and battle in court."

If courts overwhelmed with foreclosures decide to take up the cause, the result could be millions of struggling homeowners with the banks off their backs and millions of homes no longer on the books of some too-big-to-fail banks. Without those assets, the banks could again be looking at bankruptcy, as was pointed out in a San Francisco Chronicle article by attorney Sean Olender following the October 2007 Boyko decision:

"The ticking time bomb in the US banking system is not resetting subprime mortgage rates. The real problem is the contractual ability of investors in mortgage bonds to require banks to buy back the loans at face value if there was fraud in the origination process.

"... The loans at issue dwarf the capital available at the largest US banks combined and investor lawsuits would raise stunning liability sufficient to cause even the largest US banks to fail...."

Nationalization of these giant banks might be the next logical step - a step that some commentators said should have been taken in the first place. When the banking system of Sweden collapsed following a housing bubble in the 1990s, nationalization of the banks worked out very well for that country.

The Swedish banks were largely privatized again when they got back on their feet, but it might be a good idea to keep some banks as publicly-owned entities, on the model of the Commonwealth Bank of Australia. For most of the 20th century, it served as a "people's bank," making low interest loans to consumers and businesses through branches all over the country.

With the strengthened position of Wall Street following the 2008 bailout and the tepid 2010 banking reform bill, the US is far from nationalizing its mega-banks now. But a committed homeowner movement

to tear off the predatory mask called MERS could yet turn the tide. While courts are not likely to let 62 million homeowners off scot-free, the defect in title created by MERS could give them significant new leverage at the bargaining table.

I'm curious, Kevin. Are you on some sort of tether, and are you required to
report your whereabouts on a regular basis?

Your car alternator will charge your car batery up to 15.4 volts in
cold weather.

NTSC redefined it slightly off 60Hz so that power supply ripple
will move on the screen (two slightly black bands that scroll
up/down your screen

You sure spent a lot of time trying to convince me you don't knwo what
I am talking about...LOL

Voltage does not indicate state of charge well.

At 11.6 volts a 12v battery is about 50-70% charged still.

Polish solar panels are what americans called "flashlights"

There should be subsidies for solar panels but control of prices to boot.

Propane will disapate and freeze when it evaporates.

Gasoline is not nearly as volatile as hydrogen.

When I use pot I imagine everythging is perfect.

Many people have browsers that economize the download

Just another threading error creating confusion

Learn how to thread or sit back and watch for a few years.

Try to stay on topic and on thread too bean brain.

Perhaps try Outlook Express or another browser that knows how to
thread posts.

Bottom posting was the was in the 70s and 80s before threading
browsers were available cheap like OE

Another Forte Agent person that doesn't understand threading.

You use Mozzilla and haven't learned to thread.

Try Outlook Express so you can understand threading maybe.

I have been noticing many threading errors everywhere on Usenet lately.

People with OE don't seem to have the petty problems with subject
lines changing, intermingled posts and downloading binary files with
mixed posts, random pieces and many other problems all the nonOE

people have.

Bottom posting has been obsoletely by threading browsers.

Forwarding does not include headers.

Call your damn ISP and tell them your browser is multiple posting.

90% of the people in America have never operated a computer.

Let's say youre solar cell was trying to put out
14.3 volts DC and you stuck a 10 ohm meter in series with a charged
13.8 volt DC battery.

Your troll was too obvious. Try to engage the mark in conversation
first so there is, at least, some stake, like friendship for the
person listening. When the friendship is well developed then attack.
Not too obvious at first or you will lose your audience. This will
enhance your troll points.

I think outside opinions are worth much more than sales hype from the
company that made the product.
Referring to *factory* charging specifications for the batteries
they make ##

This is power grid induction through capacitive proximity

You can get fooled with another ground in the house finding it's way
back to the transformer neutral.

A thought I have is rain water from a roof on a three story home
through a micro-turbine.

Setback thermostats only work efficiently for small differentials,
dependant on the time duration.

Breakers are good for one time usage of one fault and then they need
to be replaced for any warrantied usage.

If the breaker interupts a fault, it should be replaced.No warranty
will honoured after that.

I don't have a link at this time

There are no hydrogen molecules in water and the oxygen in water isn't
flammable either.

Water is inert and contains no energy to be used. Get some basic chemistry
first.

Quite simply put, for some of the boneheads here.

NiCads and NiMh batterries are designed to take a current charge forever.

Oh yeah, I can charge a battery and use it six months later fully
charged. The nicads will be cooked because you keep them on charge,

just in case you need them but when you remember them six months
later they are cooked and won't last 5 minutes in the camera.

It takes a complete idiot to deny they can short out all by
themselves. Three, loose in a bag can short themselves out.
referring to AA batteries doing the physically impossible

Did they have electricity back in 1994?

I have been around so long with this stuff I believe I invented the
diode in 1941 but I am not familiar with the solar panel usage
requirements of them. (no P & N substrate explanations please. I wrote
the GE manual...LOL)

NOTE: do not pass ground wires through metal holes or cable clamps
with two screws on a metal surface.

There is **NOT*** enough energy in a lightning bolt to power your
house for more than an hour...if that. Do the math.
The figures escape me but let's say it puts out a roughly MWatt of
power for 100 nanoseconds?
100 x 10-9 x 1 x 106 / 3600 (sec/hr) = 0.0027 wH
oooops.... Wouldn't light your home for a 1/2 second.
OK..OK.. multiply the figures time 100 or 1000. Now it would light a
100W bulb for 1 second.

The IEEE-232 standards were never followed or known by many.

Fossil fuels are still renewable and being cxreated as we speak.

Get your tear ducts flushed by a knowledgeable optometrist.

Not many materials have the huge exponential resistance/heat curve
aluminum does. Overload doesn't make it glow like copper...it flashes
and explodes.

A bathroom fan motor would never push hot air down ten feet or cold up
ten feet.

Bathroom fans have a hard time pushing 55 cfm through a 3-4" pipe 20
horizontal feet. They are made to vent smells and humid air horizontally
only.

Why not spend the money on a contract with the grid company and get an
exclusive line to your house and never have brownouts.

Usenet rules dictate top posting for readability

Many cell modems are set up to filter bottom posts out.

Cell modems do not cut off anything.

What security flaws.
##referring to Outlook Express##

10 pounds per gallon Imperial. That gallon is totally unique to the
US....ooops..I think all gallons are unique to the US now.

The standard Imperial gallon the whole world used weighs 10 pounds
exactly.

The copper isn't worth more than 5 cents per pound. It is classed a
mixed copper and nobody wants it.

Hey moron! The copper is considered "mixed" copper and is worth about
$0.02 per pound, if he seperates it all.

Just don't ever lose weight. Toxins are stored in your fat cells.

Did you know, **NO***, I repeat ***NO*** death has ever been related to PCBs?

Insulated square copper wires from a dry transformer are not 99% copper and take a lot of work to remove the insulation.

I have tonnes of insulated copper wire if you want it. I think you could almost have for the picking it up. How many bins can you take per year

50 lbs? We have it by the bin full. Mostly #6 to 650 MCM. I beleive you would have to leave a bin and then pick it up full later to compete with the current scrapper.

Can't this tranformer be used by somebody to generate a second 120V from a single phase 120V inverter? It sounds pretty beefy.

BTW: once you knock the wedge out of the coil form the laminations will be easier to get out. This keeps them from buzzing until the varnish and other impregnations go into it.

All you guys have a bad Christmas or Jewish and didn't see Santa or something?

Run each signal twisted with a ground for noise. RD twisted with gnd as a pair, TD twisted around ground as a pair etc... This means signal/logic ground not power ground or case ground, if they are different. Do not
connect the other ends of the ground conductors.

Tar pitch in a flourescent ballast does ***NOT*** contain PCBs and probably never did.

Religion is not genetic or even herodigious

I believe the warmest part of the lake is just below the ice. As the water frezes it rises to the top and joins the other ice formations.

Gel cell won't cut it when it comes to putting out 100A or more. They cook in one spot and the rest of the electrolyte doesn't circulate fast enough.

There is nothing standard about USanian measurements. They changed their sizes to avoid trading with the rest of the world. This worked for a few centuries but the rest of the world moved on to the metric system to avert the confusion the US caused.

Ever put your ohmmeter (do I need to explain an ohmmeter also?) across a capacitor? It measures infinity after charging to the supply voltage because the electrolyte is an insulator.

Electrolytes are not conductors of electricity in a capacitor.

If the electrolyte conducted it would be a resistor.

I doubt they are 4 farads. More likely 4 microfarads uf.
referring to 4000mfd caps

Sometimes it is an ego boost to have these so-called "professionals"
come and beg for information because they can't our toys do what the
good guys can but I would never hire them given a choice.

Do you measure altitude in degrees? Many aeronautical people would
disagree with you.

Yes, blame the middle class, not Big Business or Wall Street. C'mon
now...the average salary of all state workers is ~$47,600. That hardly
seems like the "lion's share of the shortfall". (and yes, they may have
a decent pension, but they are trading off a lower salary now for a
better pension in the future). Keep on demonizing those evil public
employees or as Christie, the NJ guv calls all those nurses and garbage
truck drivers, the "elite".

> So, again, the people are behind the Governor.

Sort of a vague statement. Many may be behind him, but many aren't.

>>> At least right now. And the Dems In

Huh? I truly miss your point on "skew" and "keep swinging(?)". The
people that are not behind Walker are boiling mad. Thus a Repub recall
is certainly a legitimate concern and well within the realm of
possibility. So, your point is?

>>> Which, actually, may be unnecessary. If they remain out of the state

> the AFL-CIO said they had no business getting in the first place. and he
> said that decades ago.

I can't verify that -- and I find it hard to believe a union leader
would say workers of any stripe should not have collective bargaining.
However, in Wisconsin the workers -have- had that "privilege" for
decades...and they may be losing that. And you are splitting hairs and
playing a little semantics here, with the "rights" vs "privilege".
Bottom line, if this goes through, they will indeed be in a "My way or
the highway" situation, a position most of us would not prefer to be in.

>> *What about Walker trying to *ram rod* through in record time this bill

> Really?
>
> I did.

You did what? Got to talk to the Governor of Wisconsin? For 20 minutes? On the first call? And you're not even a full-time resident of Wisconsin? I'm not disputing you, but that -does- stretch credulity.

>> This would seem to
>> indicate that Walker thinks the Koch brothers are his true bosses.

> Sophistry. I heard the playback of the call. He sounded like he was
> massaging a contributor.

Too bad he couldn't devote the same effort to actually sit down with the unions and discuss the issue -- rather than reject out of hand the unions offer of economic concessions and spend time kissing the ass of his Koch brothers masters.

> No different than NPR taking calls from
> patrons, making promises on programming they have no intention of
> keeping, and then ignoring that programming once the checks clear.

This is really another entirely different debate. I don't know NPR policies as well as you seem to think you do. You are laying some pretty serious charges. Finally, what you say makes no sense -- as it would seem that NPR could could only pull that stunt once, before the word of it spread like wildfire. Again, I'm not disputing you, but you -are- stretching credulity.

>> *In this same bill, Walker is removing the salary income price cap on
>> vouchers for private schools. This would allow children of the wealthy
>> to attend private schools at tax payer's expense.
>
> No, it would allow citizens to send their children to private school

> should have to pay the costs of a system that they're currently paying
> exorbitant rates not to use.
>
> Regardless of income.
>
> Let the public schools compete for their tuition, just like the private
> schools. If they're not doing the job, they don't deserve the support,
> anyway.

Hmmm, why was there a salary cap in the first place, if not to keep the rich from abusing the system. And just exactly how do you propose that the middle class and the poor "compete" to get into those private schools?

Let me close with a few more examples of Walker's sleaze...

1) If, as you said in your opening statement above that "public sector union benefits are to blame for a lion's share of the shortfall", why would the police and fire unions get a free pass and be exempt? I know, just purely a coincidence that the police/fire unions got a free pass because they originally supported Walker. Coincidence?...yeah, right. Sleaze.

2) Don't forget the Milwaukee scandal. When Walker was a Milwaukee County executive, he fired all the union county security guards and replaced them with private guards from Wackenhut, a BRITISH company (so much for the Repubs being concerned about "jobs, jobs, jobs"). Later, the courts ruled that he illegally fired the original guards, who the county had to hire back, WITH back pay. Walker's union busting folly cost the county $500,000. Hmmm, maybe Walker is a part of the budget shortfall. Sleaze.

3) The Federal government was going to pay for a high speed rail between Milwaukee and Madison. Walker turned it down cold. Please understand that this project was NOT like Alaska's "Bridge to Nowhere"; Milwaukee is Wisconsin's biggest city and Madison is the state capitol and has a very large university. The route would have gotten plenty of traffic and created many, many jobs. But for some kind of hare-brained tea-bagger reason, Walker killed the whole thing. And how ironic -- the Republicans said their main goal was "Jobs, jobs, jobs". Yet more sleaze and more broken promises about jobs.

Bottom line: You appear to be a rabid Republican (with tea-bagger leanings) supporter of Walker, apparently no matter what he does, no matter how unethical he is. I believe Walker is a sleaze bag that is selling the people of Wisconsin down the river on many fronts. Neither of us is going to convince either of us otherwise. Please feel free to have the last word.

You clown 'tard Liberal/Democrat/Marxist/Socialists stretch credulity on a
daily basis.

Of course - but when CRI covers up every damn smaller station on the
planet, someone's voice is getting trampled.

I listened in the 1970s, had a long hiatus, and then started again
around 2000. I guess it could be a West Coast USA thing - between the
Far East and Cuba we get bombarded constantly - but if you look in
WRTVH, China has more international broadcasts than any two other
stations combined - and that doesn't count their myriad "domestic"
services that easily make it across the big pond.

Yet ANOTHER dodge and tap dance. Keep it up and people will start to
think you don't have the brains or the balls to give a straightforward
answer. Oh, sorry...most of them think that already.

sadly, that means the overseas space concerns will be getting more
business in the future. A loss of confidence will move activity
elsewhere. A few more accidents and NASA is out of business.

About eight or nine sompin years ago, one of my snail mail Popular Science magazines, article, I think her name is Mrs.Green, she retired from working for NASA.She said,
NASA, YOU ARE BROKEN!

Get over to your local libraries, you will see it on the front cover page of that Popular Science magazine, also the article inside of the magazine.It is probally on the internet too, Popular Science Archives.

NASA sure doesn't need to be Losting any more Satellites, that's for Sure!

Has Canadistan ever lofted a satellite from it's own territory?

I'm guessing that they rely on the more knowledgeable, intelligent countries.

Please have someone read the following to you, drunken racist pig....

================================
With the launch of Alouette 1 in 1962 Canada became the third country to
put a man-made satellite into space. Because Canada did not have any
domestic launch capabilities of its own, (and still does not), Alouette
1, which was entirely built and funded by Canada, was launched by the
American National Aeronautics and Space Administration (NASA) from
Vandenberg AFB in California.
```

The technical excellence of the satellite, which lasted for ten years instead of the expected one, prompted the further study of the ionosphere with the Canadian designed US launched, international ISIS program. This undertaking was designated an International Milestone of Electrical Engineering by IEEE in 1993.

The launch of Anik A-1 in 1972, made Canada the first country in the world to establish its own domestic geostationary communication satellite network.

Excuse me, but somehow, someway, I don't think that Canucks are a separate race.

That may just be more delusional Liberal/Democrat/Marxist/Socialist thinking.

Whow... now that I think about it, they (dumbass Canucks) are indeed a separate race:
Clown 'Tards!

Thanks for the interesting review! But could you please elaborate on
"cheap" -- what did it cost (and what is the price of the 660 you are
going to get?)

The PL-390 set me back a whole $45 on ebay. For the price, it's nothing
short of amazing.

The PL-660 was $85.

Since Tecsun seems to build all the stuff for Grundig/Eton, going with the
manufacturer seems to be much more economically advantageous.

C'mon Lare, tell us your thoughts on your new Republican governor TAKING
money out of YOUR pocket and GIVING it as a gift to Big Business...and
then having the bare faced gall to call it *shared* sacrifice.

I believe you are indeed confused on this issue. Steve lives in Michigan.
The governor I believe you are referring to is the governor of Wisconsin.

A lot of people seem to get confused between these two states. An easy way
to remember them is: Wisconsin = cheeseheads. Michigan = (fewer and fewer)
automobiles.

Yes... and never forget the motto of Detroit:

Where they make cars during the day -- and steel at night.

(You might have to say it out loud to get it.)

With every good wish,

Kevin, WB4AIO.

Truth Be Told Prez "BO" {Obama} Is Anti-Union
and His Actions Prove It ! : Time and Time Again !
http://groups.google.com/group/rec.radio.shortwave/msg/6966c3b7d2c24c94
.
All City and State Workers should have the Same
{Equal} Rights as Prez "BO" {Obama} Gives US
Federal Government Employees [.]
-and- Nothing More -aka- The Basic Right To Have A
Union and Organizes To Redress Their Grievances :
NOT Pay !
NOT Benefits !
NOT Seniority !
NOT Hours of Work !
NOT Working Conditions !
Just Simply to have a 'Union'. {and Pay Dues}
Just Simply to Address Their Grievances.
IF It's Good Enough For Federal Employees :
It's Good Enough For City/State Employees Too !
Equality For All Workers *NOT* Special Privileges
and Benefits For City, County and State Employees.

Emilie Du Chï¿½telet?s most celebrated original contribution was to
identify energy with mv2 and to posit that energy was conserved, that
one form of energy might be converted to another, but that the total
energy was constant. This was a major break with Newton who focused on
mv, a scalar quantity that he observed could disappear in a collision.

You really don't have any clue about the meaning of what you read, do you? Ninety percent of your responses have absolutely NO bearing on the subject at hand.

While we're at it, just how long have you been defending the international trafficking of twelve year old females for the purposes of statutory rape?

Would Jesus have approved? Why did He mention hanging a millstone around the necks of those who sexually abuse children?

Do you know better than Jesus what is moral?

Please, I'd like to hear your defense (again) of the sixty year old 'Mormon' fundamentalist with underage wives. Did you send one of YOUR kids to his harem?

Sorry Brenda,

I know Lare lives in Michigan, and no, I am -not- referring to that
piece of work Walker from Wisconsin in this specific case.

Normally, you are right on top of things, but this is a complete
strike-out for you. Understandable though, as I'm sure we get much more
Michigan news in Kokomo than you do in Korea. :-(

Even though ol' Joe is from Kokomo (in Indiana ya know), Joe has his
facts 100% correct.

1) It IS indeed the new Republican Governor Rick Snyder from the great
state of Michigan.

2) Snyder is indeed touting his plan as "shared sacrifice".

3) Snyder is indeed taking money from kids K-12* and out of the pockets
of pensioners (LIKE LARE) to offset the two billion dollar gift he is
giving to Big Business (in the form of a tax break).

As Cuhulin would say, "Look it up!".

Let us know how you make out with that Tecsun 660!

Best regards,
J from K

Again, sophistry.

The salaries of state workers in Wisconsin are actually
considerablly higher than that. And they are nearly twice as high as
the wage/salaries of private sector workers doing the same work.
With state employees getting their benefits paid for by the
taxpayers while the taxpayers must contribute to their own benefits,
while paying all of the benefits of state workers, who are making

more than they are, again for the same work.

Yes, demonize, indeed.

The point is that the ones talking about recalling Republicans
are Democrat legislators. The ones talking about recalling Democrats
are the voters at large. Again, by a majority.

You can look it up. He was quite emphatic about it.

> However, in Wisconsin the workers -have- had that
> "privilege" for decades...and they may be losing that.

Privileges are lost every day. Part of the political process,
from time to time, is loss.

> And you are
> splitting hairs and playing a little semantics here, with the
> "rights" vs "privilege".

Not at all. A right can't be given, not taken away. It pre-exists
the powers that be. It may be protected. It may be infringed. But a
privilege may be created out of whole cloth, negotiated into and out
of existence, and dismissed out of hand by power.

Bottom line, if this goes through, they
> will indeed be in a "My way or the highway" situation, a position

Nice spin. But not a lot of fact, there.

>

I speak with some authority, here, because I speak from
experience. Both as a listener and contributor, and an insider at
NPR. Local and otherwise.

You are laying some
> pretty serious charges. Finally, what you say makes no sense -- as

> it would seem that NPR could could only pull that stunt once, before
> the word of it spread like wildfire. Again, I'm not disputing you,
> but you -are- stretching credulity.

Only to those who believe NPR is not subject to the economies of
the marketplace, like commercial broadcast. They must meet budgets.
And to do that, they must massage contributors. And to get the
numbers of contributors, they must have ratings. No difference than
PBS, which runs some programs only during pledge drives, and then
program, according to the same criteria during non pledge periods,
as commercial broadcasters.

They do have the same thinly disguised contempt as Clear Channel.
The difference is...well, there is no difference.

> propose that the middle class and the poor "compete" to get into
> those private schools?

You missed the point, Joe. Let the public schools compete for
students like the private schools. Let them do it by results. Better
results, they have students choosing public schools for their
academic excellence. If not, let them go away.

If the population were faced with fewer public schools, with more
students migrating to the private schools, tuitions would come down.

The middle class and the poor, which pay for the public schools
that do NOT produce results through their taxes, anyway, may then
take that same money and put it towards private school tuition, and

break the cycle of low pay for inferiour jobs through a generation
of better educated students.

Everyone wins. Especially the poor and the middle class.

>
> Let me close with a few more examples of Walker's sleaze...
>
> 1) If, as you said in your opening statement above that "public
> sector union benefits are to blame for a lion's share of the
> shortfall",

No, what I said, was "3:1 of the public believe that public
sector unions are to blame for the lion's share of the shortfall."

Significant difference. And in Wisconsin, as in the rest of the
Nation, public opinion moves political energy.

Often, even if what the public believes is not precisely the truth.

My point was that the public is not on board with the Dems move
to thwart the results of the election by simply refusing to
participate in a vote that will cost them their contributors in
public sector unions.

> 2) Don't forget the Milwaukee scandal. When Walker was a Milwaukee
> County executive, he fired all the union county security guards and

> who the county had to hire back, WITH back pay. Walker's union
> busting folly cost the county $500,000. Hmmm, maybe Walker is a part
> of the budget shortfall. Sleaze.

Nice spin, Joe. But this is a political discussion. Spin is
essential, isn't it.

>
> 3) The Federal government was going to pay for a high speed rail
> between Milwaukee and Madison.

No, the Federal Government was going to pay to get the process
started. The majority of funding must come from the states which are
involved, themselves.

A rail system that NO ONE has shown the slightest interest in,
except the Federal Government, btw.

> Walker turned it down cold.

Yes, he did. Because it would have cost the State Treasury
billions. The Federal Government only provides startup cash. And not
much of that. The state would have to provide the funding for the
project.

Walker was right to turn it down.

Please
> understand that this project was NOT like Alaska's "Bridge to
> Nowhere"; Milwaukee is Wisconsin's biggest city and Madison is the
> state capitol and has a very large university. The route would have
> gotten plenty of traffic and created many, many jobs.

No, it wouldn't. Because there is no interest in high speed rail
in Wisconsin. Just as there is no interest in high speed rail
between Chicago and St Louis, another money pit that the Federal
Government is pushing. With zero public interest.

>
> Bottom line: You appear to be a rabid Republican (with tea-bagger
> leanings) supporter of Walker, apparently no matter what he does, no
> matter how unethical he is.

I'm sure it would be convenient to believe that. And make your
vitriol all the more justifiable. But it's just not so.

Actually, I'm a conservative, with independent leanings. Would it
surprise you to find out that I voted for Jimmy Carter?

I've actively campaigned for Democrats in Lousiana, Texas, and
Illinois. And was spokesperson for several Democrat campaigns. These
jobs paid minimal stipends, and were accepted by me based on values
and the integrity of the individual. I've also done the same for
numerous Republican campaigns.

And I've turned down dozens of jobs from both sides.

Have a good day, Joe.

This is the?jimmy choo shoes
sale network, and all the people of the world are willing to spend
a good part, they share the news online in the website or with friends
and strangers to their lives. These days to organize the huge
potential, enjoy the Internet offers access to global market, make
person. It is no longer just about the content, It is also about the
content of the show. Into the flash. This software development, is
very popular, Macromedia used to create animation program based on
graphics. They provide full-screen navigation interface, pictures,
allow two-way interaction and support.

In fact, the community a
melting pot of visitors and local traffic like Boise public library,
Boise main post office, can even this… The local manolo blahnik shoes sale media, including
TV (KTVB channel 7, KIVI channel 6, KBCI channel 2), radio, and print,
do not use African-American fundamental key, I fear that in a certain
degree of influence. Reason is, a person would conclude, African-
American or refuse jobs from these organizations (a kind of living) or
not join the provided the first place was 1960 – ish)! I'm willing to
bet $11,000 million that job provides kids in college of African
americans in novitiate or later, should be welcomed weapons for
themselves and their family, no matter this position is located in the
"white", Boise Idaho. In other words, the job is not provided,
absolute not interviews. The last time I saw an African-American held
in Boise news, I want neiman
marcus shoes sale to Milli Vanilli is still considered true!

Yet another example of the utter contempt the ruling elite have for the idiots who listen to the know-it-all gas bags and their "SHOWS" (as in SHOW business). BWAHAHAHAHA!!!

“Thank you for auditioning for Premiere On Call,” it said. “Your audition was great! We’d like to invite you to join our official roster of ‘ready-to-work’ actors.” The job, the email indicated, paid $40 an hour, with one hour guaranteed per day...

"But what exactly was the work? The question popped up during the audition and was explained, the actor said, clearly and simply: If he passed the audition, he would be invited periodically to call in to various talk shows and recite various scenarios that made for interesting radio. He would never be identified as an actor, and his scenarios would never be identified as fabricated—which they always were." Continued at http://www.tabletmag.com/life-and-religion/58759/radio-daze/

As AT&T U-verse and wireless has been expanding in my neighborhood,
I've noticed that the background noise was increasingly making any
real
SWL very diificult. Recent deferral to family demand for both
services,
seems to make SWLing an impossibility. Any suggestions for what to
do with a collection of high-end portable receivers in the midst of
high
noise soup of digital hash? I've tried good coax, but the outdoor
antenna
seems to buried in noise.

Any possible tech fix or device suggestions? I really do like the
channel
lineup and and internet service. Any possibilty for co-existence?

MWB,

Most likely it is the Pole-to-House Feed-in-Lines.
{Local Noise}

1ST : The general best 'low tech' {no batteries required}
Answer is a Horizontal [Flat] Loop SWL Antenna

2nd : Noise Pick-Up Antenna and Noise Canceling
Phaser with a Loop Antenna
http://www.dxtools.com/Phaser.htm
http://www.universal-radio.com/catalog/preamps/3541.html
* Place the Vertical Noise Pick-Up Antenna as close
to the center of the Loop Antenna as possible.
* * Vertical Noise Pick-Up Antenna a simple 'Snake'
Coax Cable Antenna with a 5~10 Foot End Element
that is 10~20 Feet Vertical.

In a word... no.

I've been living in such a noise soup for 10 years. It never gets any
better.

There may be some small bit of hope if you could use a loop antenna of some sort (helps with common node noise) and/or vertical, which is less prone to noise pickup. But over all, your only way of getting clean SWL (or BCBDX) is to get out of the neighborhood. Set up a van with your radio equipment and a quick set-up antenna of some kind, drive a few miles out of town, and listen to your heart's desire. Either that or give up and go to listening to VHF/UHF utes..

I know.. not a lot of help.

It is almost as bad on the East Coast . CRI is actually louder than
RHC in most cases . What a waste of electric power ...

I got a slopbucket full of stations! It's like Christmas!

- In relatively signal poor California - 6 March 2011:

*BRAZIL - R. Bandeirantes, Sao Paulo, 11925.2, 0125z SINPO = 21321
*BRAZIL - R. Aparecida, Aparecida, 11855, 0127z, 14221 (1 kW?!?)
*BRAZIL - R. Brasil Central, Goiania, 11815, 0132z, 24222
*EGYPT - R. Cairo, 11590, 0140z, 24222, Low modulation (as usual)
*INDIA - AIR, 9870, 0145z, 12221, Music & Hindi
*CHINA - CRI, Kashi/Kashgar, 9710, 0149z, 14221, Spanish TX & MX
*SEYCHELLES - BBC Relay, Mahe, 7445, 0159z, 25333, Bells IS & sign-on in EE.
*MOLDOVA (Pridnestrovye) - V, Russia Relay, 7290, 0204z, 11321, English, Co-Channel with CRI - Kashi
*RUSSIA - VoR, Krasnodar, 7250, 0207z, 22332, co-channel with VOIRI Iran
*COLOMBIA - Marfil Estereo, Bogota, 5910, 0408z, 25311, Spanish w/ Colombian pops, what a treat! 1 or 5 kW - ?
*PORTUGAL - DW Relay, Sines, 5905, 0440z, 25222, EE apparently //6130, 6155 kHz
*SWAZILAND - Trans World Radio, 5995, 0444z, 23222 just prior to sign off, IS and Station ID in English, co-channel with Mali, but Mali has no modulation it seems :-(
*GUATEMALA - R. Verdad, Chiquimula, 4052.5, 0502z, 15321, Spanish language rlg. music by female.
*CHAD - R. N'Djamena, 6165, 0530z, 25232, French discussion by males & occ. female, heard ID at 0540 after appar. news.
*GABON - Afrique Numero Une, 9580, 0604z, 25322, French males in newstalk.

Made recordings, wrote RRs for Colombia, Chad, Gabon.

2463. Which NRD option to add

If any post proves that SMS doesn't know what he's talking about, then this is it. FM channel spacing in Europe is 100kHz. How on earth would IBOC work with channels that close together? OK, the frequency planning ensures that stations 100kHz apart are geographically relatively distant but here there are many signals 200kHz apart that are relatively close to each other, enough so that the boundaries between them have usable signals.

Oh, and trying to convince the public to adopt a new digital radio system that offers no advantages to DAB (which is struggling) would be another bad idea!

From what I recall, there were several production changes. It is important to establish which version is in your hands first (serial number) . Did you look inside the receiver to know for sure which modules are installed ?

True - but if you like utes, ECSS is probably not terribly important
(that's like S-AM). The bandwidth control would probably be a better
choice.

If any post proves that SMS doesn't know what he's talking about, then
this is it. FM channel spacing in Europe is 100kHz. How on earth would
IBOC work with channels that close together? OK, the frequency
planning ensures that stations 100kHz apart are geographically
relatively distant but here there are many signals 200kHz apart that
are relatively close to each other, enough so that the boundaries
between them have usable signals.

Oh, and trying to convince the public to adopt a new digital radio
system that offers no advantages to DAB (which is struggling) would be
another bad idea!

I'm still trying to figure out how they can claim that IBLOCK is doing well.
The sales are abysmal. The radios don't sell, and the stores have been
dropping the prices to try to get rid of them.

The conversion of stations has slowed dramatically because of this, and most
stations say they won't convert till there is a significant listener base.
iBiquity's own sales records show ~3,000,000 licenses sold (this doesn't
mean that 3,000,000 receivers have been sold, only that they have been built
and the licenses paid for), and even if these all represented an actual
receiver sold, it's a pretty ugly figure, since it's less than a 1%
penetration of the market. Compare this with something over 500,000,000
analog radios currently in use. And those are not going away.

As an aside, it was figured that as prices dropped on flat panel televisions
that their market penetration would reach over 90% after analog was shut
off.. this has not happened. With so much of the country living below the
poverty level, folks don't just discard perfectly good working electronics
and/or appliances just because someone tells them they must but the next
"big thing." And personally, (this is among people I know personally, not
those in some newgroup or another) I don't know anyone with a flatscreen TV
that isn't still watching more than 2/3 of what they watch in analog or
digital 480i, mostly because the cable companies are charging for anything
HD that they make available, even the OTA local channels.

As Rush mentioned on Friday, perhaps this was a good thing as the data to be gained had to do with 'global warming' and if it (the satellite) were operational it would only prove that 'global warming', at least manmade, was a hoax (which it is).

As he kind of intimated (tongue in cheek of course) maybe it was aborted (destroyed) on purpose.

The ECSS unit is a particularly poor one. I makes a loud howl when it loses sync, which it does often.

Oh, and trying to convince the public to adopt a new digital radio
system that offers no advantages to DAB (which is struggling) would be
another bad idea!

Actually, DAB, with it's dedicated band, would be a far better digital radio
system, implemented properly. The way the UK is doing it is far from
properly, unfortunately. They allotted far too narrow a band for the
service, so in the beginning, the signals were robust and quite high
fidelity. But, as it began to "mature", and more and more services were
added, it became necessary to decrease the bitrate of each stream and
quality began to suffer in short order. This is no fault of the system, it's
the fault of shortsighted planners.

This is all beside the fact that digital radio just really has no charm for
the average person, who has known analog radio all their life and finds it
to be quite satisfactory and much cheaper to utilize. Not to mention that
radio listenership in general has been plummeting ever since personal
stereos came into vogue, much more so since mp3 players that can hold
hundreds or thousands of tracks with no commercial interruption, (mostly) no
dropouts, and no inane, headache inducing air "personalities". DJ's used to
be much better... now they're mostly just obnoxious.

Personal observation: We have around 30,000 troops in country, as of now
about 7,000 of those on post just a few blocks from me.. and as a rule, the
only place I ever hear the "radio" on base is in the commissary or the PX.
And that isn't even OTA radio, it's satellite fed directly to those stores.

We have nice weather here as well. Unfortunately it's cold nice weather!

But, the hummingbirds will return in the next 6 to 7 weeks, as will the summertime static :-(

I have no dog in this fight. It does not affect me financially whether or not digital radio succeeds or fails. But it's disappointing to see so many of the anti-digital radio folks rely on myths and lies rather than on facts and logic.

If there's one good reason to hope for the survival of terrestrial radio, which everyone agrees depends on a digital transition, it's how bad the alternatives are for the public and for broadcasters. Satellite radio is up to $20 per month, plus taxes, and in the U.S. XM-Sirius has been under a price cap since the merger which they are now attempting to get lifted; satellite radio will never be mass-market at those kind of rates. Streaming 3G/4G into the car works if a) that data has little or no extra cost, b) you have 3G/4G coverage, and c) listeners are willing to pay monthly fees (since the free model is not making the providers any money). Everyone carrying their own content around on an iPod, SD card, or USB stick, in order to get the content and quality they desire may work for the listener, but it does not work too well for broadcasters.

I like radio because it's local, and because it's free. The commercials can be an annoyance of course, but that's the price you have to pay. You don't get the local component with satellite radio or streaming services

or on your iPod.

Most of those so opposed to digital radio are not opposed to it for any valid technical reason, they are opposed to it philosophically. The exception in the U.S. is the stations presently operating at relatively low power. They are a) left out during the transition because even 10% of 200 watts isn't going to help them (though full-power digital-only would work for them) and b) most likely to be affected by interference as digital power levels are allowed to rise.

With any debate it's important not to lump those that have valid concerns in with people like our favorite anti-HD troll. It would be nice if those that do have valid concerns about digital radio a) did research rather than demanding that others do it for them, and b) verified their statements prior to posting them. Their consistent reliance on suspect information undermines their credibility, causing people not to take them seriously.

Well I'm sure that the 2000+ stations broadcasting in HD, the multi-national automobile manufacturers, and the receiver manufacturers are operating in fear of a hysterical blog by an anonymous and clueless individual, and a page on a web site of a personal injury law firm in New Jersey that complains that the range of digital radio signals is insufficient because one of the principals purchased a vehicle with an HD Radio and didn't realize that it was not the same as satellite radio.

If that's the best that those opposed to digital radio can do, then digital radio has a very bright future indeed.

The fact is that digital radio is all about content and a lack of monthly fees. The lack of multipath interference is a plus, but the same thing that sells satellite radio and Pandora is what's driving adoption of digital radio, except that digital radio doesn't have a recurring monthly charge.

If you look at what radio stations are doing with their HD sub-channels it's adding more content, especially content where the audience isn't sufficient to warrant continuing the genre on the main station. Even if the audio quality could technically be better on analog FM, in practice, the sound quality and lack of interference, even at a lower bit rate on the sub-channels, still provides a superior product in most cases than analog FM.

> The conversion of stations has slowed dramatically because of this,

The conversion of stations has slowed because you can only convert once! The majority of major market stations have already converted. Smaller stations will take their time.

> since it's less than a 1% penetration of the market. Compare this with
> something over 500,000,000 analog radios currently in use. And those are
> not going away.

The big increase in HD receivers will come as sales of vehicles with HD receivers takes off. Toyota just announced, and Ford is in production, along with a bunch of smaller manufacturers like VW and BMW. It's very similar to how FM radio evolved--once FM receivers became standard equipment, or a low cost option, FM radio took off.

The one fear is that what happened to FM will happen to HD, when it becomes popular. I don't know how many people remember early FM radio, but it was a home to less top-40 genres and more alternative formats, and because of the low penetration of receivers there was not so much advertising. That's where we are today with HD. My favorite HD2 station runs no advertising at all, it's completely supported by the FM/HD1 station.

Clearly the broadcasters would like to monetize HD, but that's several years out. The broadcasters that converted early did so with a long term view of the advantages of digital radio. It doesn't cost much to add digital at a 1% power level, so it's not like they were investing a huge amount of money in the technology. The big question for broadcasters now is this "what percentage of the listening public must have HD receivers in order for it to make sense for us to increase digital power to 10%?" A 10x power increase is going to cost some real money.

> As an aside, it was figured that as prices dropped on flat panel
> televisions that their market penetration would reach over 90% after
> analog was shut off.

No, it was never expected that flat panels would quickly reach 90% of the installed base. Anyone with digital cable or satellite had no need to even get a converter. Flat panels did quickly reach nearly 100% of new sales.

> people I know personally, not those in some newgroup or another) I don't

I have Dish Network (much less expensive than cable or DirecTV) and they do not charge for HD ("for life") if you agree to paperless billing (or if you pay them a one-time $99 fee). <http://www.dishnetwork.com/packages/free-hdtv/default.aspx>. Those that are still on cable have more money than sense, or they want broadband internet from the cable company so they also get their TV from them. I did get a flat panel HDTV when my 1987 Toshiba 27" CRT television stopped working last year (on/off relay controlled by remote control stopped working). I could have repaired it (replaced the relay before myself once), but I thought 23 years was a reasonable expectation of service.

So glad that I bother you so much. Posting in newsgroups, as you and
FarceWatch are forced to do, has zero affect with such a small
audience. One has to have a site that sits on Google's Homepage for
searches on "hd radio". Even then, there is very little interest in HD
Radio. But, what counts are searches from the FCC, US Courts, Keefe
Bartels, law firms, the FTC, the GAO, Congress, Congressonal Quartly,
GM, Ford, Sanyo (daily regular), iBiquity investors, many foreign
broadcasters, and on and on and on - LMFAO!

Now there's spin if ever I heard it.
I don't remember hearing about any legal suits against Woolworth's
stores here in the UK, so by your logic they also should have had a very
bright future indeed. And yet they still went Bankrupt.

Having no strong legal suits against a company, doesn't automatically
make them a success, that it just pure spin.

For digital radio to be a success, it needs to get the public interested
in buying receivers and in using them. So far (judging from what I've
ready here) the sales of HD-Radio receivers has been tiny. I accept that
sales might increase (as I can't prove otherwise), but that hasn't
happened yet. So you can't yet claim that digital radio has been a
success, and you can not assume that it is going to be a success, and
you can not claim that it has a bright future. At least not without some
strong evidence to back it up, and so far I've not seen any such strong
evidence, just a lot of spin from people like you.

They tried to see us DAB based upon content here in the UK, and that approach hasn't worked. The forecasts for DAB listening figures keep on having to be revised down, and it's actually got to the point where sales grown of often negative. The sales of DAB receivers seems to have levelled off, while only a small minority of people are listening to it.

Still more spin, but no sign of significant receiver sales.

Richard E.

According to the FCC database only 1800+ stations have converted, not
the 2100 iBiquity claims, and a number of them have turned off IBOC.

"HD Radio Increasing Format Diversity?"

"From there, we can derive that 15% - or a whopping 130 multicast
channels - exist right now that might actually offer up something new
to a listener lucky enough to be in that innovative market (and
equipped with the proper receiver, which in itself is an interesting
story), as opposed to a derivation on the same-old."

http://www.diymedia.net/archive/0809.htm#082509

Only 15% of HD channels, if they haven't been tuned off already, are offering anything new.

The content on digital subchannels is no different than the content on the baseband. A different shuffling of the records, but the same records as are heard elsewhere.

And as for monthly fees....conditional access has been under test for more than a year, now. And that IS the goal of digital radio. It's been the holy grail of broadcast since KDKA. Digital doesn't make it possible. But digital does make it practical.

Public interest is still waning for HD radio, and more stations are turning off the IBOC transmitters across the country every month. Audio quality is poor and coverage is spotty.

And no, it's not a philosophical difference that has most in opposition to HD Radio, it's the interference, the lesser audio quality for the addition of programming that's no different than what's on the baseband that's got so many people opposed.

Your protests to the contrary not withstanding, HD Radio is not a growth industry.

You really don't have any clue about the meaning of what you read, do you? Ninety percent of your responses have absolutely NO bearing on the subject at hand.

While we're at it, just how long have you been defending the international trafficking of twelve year old females for the purposes of statutory rape?

Would Jesus have approved? Why did He mention hanging a millstone around the necks of those who sexually abuse children?

Do you know better than Jesus what is moral?

Please, I'd like to hear your defense (again) of the sixty year old 'Mormon' fundamentalist with underage wives. Did you send one of YOUR kids to his harem?

Now, it's two law firms working in concert. I talked with Keefe's office about a month ago (we are in email contact with him, and I just fed him information about Microsoft's and iBiquity's fraud to sell the Zune HD in Canada where there are zero HD Radio stations), and they indicated they were having a conference call with a bunch of "experts". I wouldn't be surprised to see more specialized communications law firms getting involved. Broadcasters are already involved. There is so much iBiquity deception and fraud to investigate.

The HD2 (and HD3, 4 if they exist) content is very different than the analog/HD1 content. In a great many locales, "niche" formats like jazz, classical, R&B, oldies, etc., only exist anymore on HD2.

Yes, it's possible that stations could offer commercial-free paid conditional access if the public would go along with it. I think it's unlikely to happen considering the alternative paid services.

> Public interest is still waning for HD radio, and more stations are
> turning off the IBOC transmitters across the country every month. Audio
> quality is poor and coverage is spotty.

Some AM is being turned off, but it's extremely rare for an FM IBOC station to stop digital transmission. More and more FM stations are adding HD, but since most major stations have already converted the rate of increase of conversions is less than when it was brand new. Audio quality is excellent, but coverage is definitely an issue at 1% of analog power. The hope by everyone is that as receiver penetration continues to increase that HD stations will increase their power levels.

> And no, it's not a philosophical difference that has most in opposition
> to HD Radio, it's the interference, the lesser audio quality for the

LOL, no matter how many times you claim "lesser audio quality" it won't make it true.

> Your protests to the contrary not withstanding, HD Radio is not a growth
> industry.

Apparently radio stations, receiver makers, auto makers, and broadcast equipment manufacturers have a different view of things. But then they're actually knowledgeable about the industry so clearly their view isn't valid!

It may not affect you financially, but you clearly have a dog in this fight in terms of your ego, because you keep saying the same wrong things over and over again, apparently in a desperate attempt to have people agree that you're right.

>But it's disappointing to see so
>many of the anti-digital radio folks rely on myths and lies rather than
>on facts and logic.

Forget the out-and-out trolls (and it's disingenous of you to neglect to mention the pro-IBOC ones); there are plenty of neither-pro-nor-anti-IBOC folks who are simply trying to discuss the topic. (And btw, note my change to "pro-IBOC" and "anti-IBOC"; it was awfully arrogant of you to apply the sweeping term "anti-digital" to people who have concerns about a single digital radio format, namely IBOC. Especially when several of them have explicitly said that they would be perfectly happy to see a *good* digital standard. So please, drop the sweeping generalization, okay?)

A number of people here have attempted to have reasonable discussions with you using facts and logic, yet you either completely ignore them (such as John Higdon's postings) or you just toss back the same wrong information again and again (such as that multipath is a major annoyance to analog FM radio listeners).

>Most of those so opposed to digital radio are not opposed to it for any
>valid technical reason, they are opposed to it philosophically.

There you go again, equating concerns about IBOC with some kind of sweeping unwillingness to accept any kind of digital platform.

>With any debate it's important not to lump those that have valid
>concerns in with people like our favorite anti-HD troll.

Or our favorite HD troll? Surely you aren't going to lose further credibility (not that you have much at this point) by neglecting to admit that there are pro-IBOC trolls on these groups, too?

>It would be
>nice if those that do have valid concerns about digital radio a) did
>research rather than demanding that others do it for them, and b)
>verified their statements prior to posting them.

Oh, you mean like actual working broadcasters who have hands-on
experience with digital radio that you don't want to hear about?

What sort of research have you done on digital radio besides reading
online articles? At how many stations have you implemented an IBOC
system and gotten firsthand knowledge of its benefits and challenges?
How have you dealt with its effects on the entire audio chain, or
with phone calls from CEs at other stations about interference within
their protected contours? Please, enlighten us about your real-world
research. As the old saying goes, it's time to put up or shut up.

>Their consistent
>reliance on suspect information undermines their credibility, causing
>people not to take them seriously.

See that mirror over there? You might want to go look in it...

I'm all for digital radio but Ibiquity will screw it up. According to
their specification, the removal of analog bandwidth does not increase
the bandwidth for audio. It goes to some other unspecified use that I
can only imagine isn't for free radio. The current encoding, which is
barely good enough for interim use, remains.

Well said. I agreed with everything in your post. I didn't quote the rest as there's not much point in just repeating everything.

From my point of view, when I first heard about digital radio (many many years ago when DAB was still an aspiration for the future), I thought great. CD quality radio in the car.

But oh what a huge disappointment it is today. Rather than good sound quality, we have the opposite. Audio that is so bad I find it too annoying to listen to it. I ended up on alt.radio.digital, because of the poor sound quality issue. All the other stuff about codecs and transmission systems are, to me, just part of the many reasons why digital radio today sounds so sh*t. And now to add insult to injury, there is talk of switching off FM in favour of these dreadful digital radio systems. It's got to the point where I would be content to 'put up' with digital radio, if only it sounded as good as FM.

A good modern digital radio system might not fix all the problems, but it would at least make good sound quality a feasible option.

Fannie and Freddie, created to increase the availability of mortgage loans, misused the government's support to enrich Fannie and Freddie shareholders and Fannie and Freddie executives by backing millions of shoddy loans. Taxpayers so far have spent more than $135 billion on the cleanup.

Fannie and Freddie allow people to borrow at lower rates because investors are so eager to pump money into the two companies that they accept relatively modest returns. The key to that success is the guarantee that investors will be repaid even if borrowers default -- a promise ultimately backed by taxpayers - Socialized risk, i.e. Socialism.

"Socialism is great!" - Until it runs out of other peoples money.

Fannie, Freddie and other federal programs now support roughly 90 percent of new mortgage loans because lenders cannot raise money (investors are not stupid) for mortgages that do not carry government guarantees. Socialized risk, i.e. Socilism.

"Socialism is great!" Until it runs out of your money, i.e. Serfs.

The Road to Serfdom

[...] "every step away from the free market and toward government planning represented a compromise of human freedom generally and a step toward a form of dictatorship--and this is true in all times and places." [...] "government planning would make society less liveable, more brutal, more despotic. Socialism in all its forms is contrary to freedom."

Pricey. But, I do recall buying a minty 515, with the memory unit, and I think a matching speaker for around $850 or so back in the early 90's or so, via the Ham Trader Yellow Sheets. I almost recall it coming with something else, perhaps some add on box that added sync or something, it might have been some kinda Kiwa box. The add on box was black, and had a few knobs on it. Maybe it was a Sherwood thing.

At any rate, I considered it a steal at the time, but, I never cared for NRD audio, though they were certainly pretty.

Sold it all at a nice profit.

'Eduardo' is a clown 'tard whose mommy sent him away because he was an embarrassment to the family.

She also fronted him the $$ for his Ecuadorian adventures.

Bet on it.

Yes, I realize that I said you could have the last word, and although I
disagree with many of your points, I will respond to only one,
as this post is becoming unwieldy.

Joe from Kokomo wrote:

Spin? What has "spin" got to do with it? The point that I was
illustrating was Walker's sleaze. Even before he became governor, he had
a hard-on to bust the unions, so much so, that he did it *ILLEGALLY* in
Milwaukee, as determined by the courts. A very germane and factual point
to support my statement of Walker's sleaze, not "spin" at all. A matter
of public record that clearly indicates Walker's mind set.

At best, your "spin" statement is disingenuous; at worst, intellectually
dishonest.

So, in reality, you're just pissed because he had a hard-on, right?

Not so. Not by a long shot. If you look, as I stated above, the content on the digital subchannels is just a repackaging of the same crap that's on the baseband. What makes it so 'different' is the classic rock stations have R&B subchannels. While the R&B stations have 80's and classic rock subchannels.

Not very different at all.

Not for the last 18 months, they haven't. And a good number of
FM's have turned off their IBOC transmitters. This in direct
conflict with the contracts with iBiquity. And they're have been
threatened lawsuits. But so far, the only thing that's come of it
have been a lot of threats. And more IBOC transmitters leaving the air.

but since most major stations have already converted the

> won't make it true.

It's not my claim. Test after test, by broadcasters, by
consultants, have been controverted by real double blind listening
tests involving listeners.

The audio quality simply doesn't measure up. Less processing,
yes. But more digital artifacts. More than a low bit MP3.

Deny all you want. Known and documented by iBiquity themselves.

Especially since I'm very familiar with this exact radio. A friend of
mine owned it for over 20 years. I would love to grab it up, but not for
that much! It is an awesome reciever. I wonder how it wound up at
Universal...

From what I recall, there were several production changes. It is
important to establish which version is in your hands first (serial
number) . Did you look inside the receiver to know for sure which
modules are installed ?

Myths and lies?? It's no myth of lie that when I listen to digital radio I hear sound quality so poor that all I want to do is switch it off. For me the question is why does digital radio sound so bad, and a large part of the answer is the use of outdated in efficient technologies. But then I've already explained all of that to you, and you just ignored it.

>
> If there's one good reason to hope for the survival of terrestrial
> radio, which everyone agrees depends on a digital transition,

Why? Nobody has provided any logical reason why radio has to be digital. If digital radio provided real benefits then that would be fair enough, but for me, all it provides is a few extra stations that I didn't need, with sound quality so low that it is too annoying to listen to it. If listening to the radio becomes annoying then it is pointless.

> it's how
> bad the alternatives are for the public and for broadcasters. Satellite

> to pay monthly fees (since the free model is not making the providers
> any money).

You missed out the option is staying with FM. FM is not perfect, but it does at least work and work well. Mobile internet, is a bit of an unknown as far as I'm concerned. I accept that at the moment it isn't good enough, but whether or not it will eventually become good enough with the introduction of newer technologies, is something hard to predict.

> Everyone carrying their own content around on an iPod, SD
> card, or USB stick, in order to get the content and quality they desire
> may work for the listener, but it does not work too well for broadcasters.

So you do admit that people want quality.

> I like radio because it's local, and because it's free. The commercials
> can be an annoyance of course, but that's the price you have to pay. You
> don't get the local component with satellite radio or streaming services
> or on your iPod.

I like radio too, although I do often find the audio processing used on many radio stations can be annoying. Hence I often resort to listening to CDs.

> Most of those so opposed to digital radio are not opposed to it for any
> valid technical reason, they are opposed to it philosophically.

Actually I think the majority of the public don't buy digital radios, because they are content with what they already have. So why spend money on something they don't need.

For me, it's not digital radio that I'm against, it's poor sound quality that I'm against. A lot of the reasons for digital radio sounding too poor, are technical. And as for philosophical, well there is nothing philosophical about not liking poor sound quality.

> The
> exception in the U.S. is the stations presently operating at relatively

>
> With any debate it's important not to lump those that have valid
> concerns in with people like our favorite anti-HD troll.

Well then I belong in the group with valid concerns. I'm concerned that they might replace FM with some digital broadcasts that sound so poor they are not worth listening too.

> It would be
> nice if those that do have valid concerns about digital radio a) did
> research rather than demanding that others do it for them, and

I don't need research to tell me what my ears tell me, that the DAB system we have here sounds dreadful. As for HD-Radio, I have found out as much as I reasonably can, and it all points to more outdated in efficient technology delivering poor sound quality, but with the added disadvantage of being likely to cause interference to FM services.

Oh and BTW. One of the reasons why it was rejected after the trial in Germany, was because it didn't meet interference standards.

> b)
> verified their statements prior to posting them. Their consistent
> reliance on suspect information undermines their credibility, causing

> people not to take them seriously.

I've been frustrated by digital radio for many years now, and spent many hours finding out the facts, so I think I have a pretty good idea what I'm talking about.

One of the things that frustrates me is that digital radio could have been so good, but instead we end up with broadcasters just trying to cram in as many services as they can, using outdated technology, and the result sounds dreadful.

True - but if you like utes, ECSS is probably not terribly important
(that's like S-AM). The bandwidth control would probably be a better
choice.

Well it's nice to know that somebody is actually trying to verify this fact, which seems so obvious when I use my own ears.

Over here in the UK, we have had years of the problem being denied and denied and denied. More recently the BBC seem to have changes tactics slightly, now giving us some bullsh*t about sound quality depending upon distance from the transmitter. The one thing that they never do is proper listening tests, which I suspect is because it would tell them what they don't want to know (or don't want us to know).

When I first got a DAB radio in my car, I tried tuning into the same station on both FM and on DAB, and switched from one to the other, while parked in my garage. The improvement every time I switched to FM was very obvious. And BTW. That was a station using 160k on DAB which is a higher bit rate than the vast majority of DAB broadcasts.

I have two of the ICF-5900's, one with a mechanically defective popup
antenna and the other with a popup antenna that works ... common problem
with these. 'Still both work great, just have to retrieve the antenna
manually.
When I bought my RF-2200, I think the person tried to unload it due to the
band switches etc., not working due to oxidation(a common problem), from
what I've read. A bit of DeOxIt and everything was as new again.
I think you'll like the RF-2200 more, it's a nicer design. RF-2200: Early
production = light grey/latter charcoal.
Stations are so much easier to find on the RF-2200 display(larger and better
laid out). Battery capacity may be a bit less with the 5900(c-cells) as
opposed to the 2200(D-cells). The rotatable lift up ferrite rod antenna
(RF-2200) can sometimes suffer from hard use wearing out the racheting that
holds it upright.
Both are sensitive well made portables. 'Wish I had kept my 2200!

I just wonder when this tumult in the Mid-East will make its way to Saudi Arabia, and also to which county the 'rulers' will flee.

Perhaps they will join Obangus in Kenya?

Yeah, Hollywood. I was fortunate enough to meet John Lennon out in Hollywood in the very early 70's as he was out and about with I think, May Pang (sp), when he was on the run from Yoko.

I was spending some idle time waiting for the Hound to deliver me back to Michigan after spending some time in Ojai.

One other interesting person I met, on an earlier trip, was Sandra Good, of Charles Manson Family infamy. She picked me, and a friend up on the highway heading for SF out of Malibu. As I recall, she was driving a beat up station wagon.

Nah the scumbags aren't going to run to anywhere that isn't going to be able to accommodate their luxurious life styles. Not to worry, the Bush crime family has game planned for such eventualities by purchasing 98,000 acres in Paraguay.

There will be plenty of space and amenities for all their accomplices (the Saudi Royals, the Clintons, the Cheneys, the Obama's, the Rumsfelds, the Greenspans, the Bernakes, the Geitners, the entire US Congress, the World Banksters, the British Royals, et.al.). Hell I would be here for hours if I were to list all the criminals but you get the picture.

Rest assured they will all be fine, it's an honor among thieves thing.

And as always, boycott Louisville, Kentucky. At least one dufus lives there and who knows how many other dufei are running loose there. Even the colleges located there can't find non-dufuses to hire. Just look at Sullivan College who has a teacher that was convicted of using drugs with his students. It even has a University (of Louisville) that has a basketball coach who f**ks woman on the top of public restaurant tables. Very sad.

> Richard E.

Speaking of good digital radio systems, I just did a bit of searching for information on a standard called DVB-NGH. This is a intended to be a standard for broadcasting to hand held devices, most likely based upon the DVB-T2 standard. It's actually being developed as a mobile TV standard, but there is no reason why it couldn't carry digital radio. That should be very good as a digital radio standard. It seems that they plan to have it all standardised around about the year 2013.

DVB-T2 has a mode that with a bandwidth of 1.7 Mhz, which ought to make it suitable for Band III channels designed for DAB/DAB+. Hopefully NGH will also have this option. Whether or not it is actually used, and whether it is actually used for digital radio is however another matter. I'm not especially optimistic about it as broadcasters don't seem to like introducing new standards.

Richard E.

Except for the iphone part. Do you enjoy charging it 3 times a day?

More like once every three days... unless I'm actually talking on the phone
a lot. It's no worse on batteries than any other cell phone I've owned.

Then you obviously aren't using it to listen to the radio all day. You can buy a radio for $10 that'll run for a week on a pair of AA batteries. People charge batteries in the sun to listen to the radio. People who have never seen a power line, let alone an iPhone.

If you trash free radio by making it all digital that will be the end of freedom as we know it.

Digital is not efficient. You can't run a digital radio for a week on a pair of AA batteries.

If you trash free radio by making it all digital that will be the end of freedom as we know it.

Digital is not efficient. You can't run a digital radio for a week on a pair of AA batteries.

That's because you can't fit a pair of AA batteries in those new multiband, all in the earpiece, digital radios available now.

They take some micro battery and you throw them out when the batteries go dead in 15 years 'cause the bands have been outlawed and moved into the teraHertz band. I am talking about thee two way units, though. The high frequencies keeps the wax evaporated from your ears and close proximity to film keeps your doctor seeing what you are thinking when you get a checkup.

Real easy. Remove the front panel from upper and lower PC boards, loudspeaker, and ground leads. Carefully bend 4 tabs on back of encoder, carefully pull back case and contact wheel straight out. Clean contacts with Q tip soaked in favorite cleaner (Deoxit Gold). Watch out for stray cotton fibers. Be careful not to get solvent on "bearing" (glob of grease on shaft ends-no need to mess with that side of things at all. Also carefully clean silver springy fingers (3 down and one up) with contact cleaner. Then I give a short spritz of Deoxit Gold on the wheel face and put it all back together. Deoxit Gold will foam like hydrogen peroxide when it contacts greasy oxides. This in normal.

So far so good. Works like brand new. Now it's time to take apart the remote.

This week I built the OHR 100a 40m transceiver:

http://www.ohr.com/ohr100a.htm

First went on the air with it last night and spent a fair amount of time with it today. I'm getting about 7 watts out and have been making lots of contacts up and down the East Coast. Longer distance contacts are of course possible, but I really built it because (a) I wanted to build something and (b) I wanted a low power rig that I could use for casual operating on the 40m band.

It was pretty easy to build, but I still feel like I accomplished something, especially when it passed the "smoke test". It has a bandwidth knob that's incredibly convenient. I can go from 1200 hz bandwidth to 400 hz with the turn of a knob and without going through a bunch of menus. It also has an RF gain control, which many kit rigs lack.

Operating this kind of minimalist radio is a different experience. You have no S-meter. You have no "spot" button. You have no digital frequency readout and only a very crude analogue dial. It's amazing how little you *miss* these things when you're operating...or so it seems to me. However, you can add these options as external accessories if you're so inclined. (OHR sells kits for them.)

I have no special technical background and very little technical experience, but building these kits is great fun and in keeping with the spirit of the hobby. You learn a lot, and you have a new radio to show for it when you're done. You do need to know how to solder, and you need a multimeter. Aligning the rig also required a frequency counter, though I suspect you could get by without the counter assuming you have another receiver nearby.

Go find a kit you like and build something!

'cept you don't edver change LED bulbs. They last over 100,000 hours. I
have a 12 Watt LED floodlamp. Very cool (hihi)

'cept they don't last that long in real usage.

I have a 14W pot lamp and you will burn your hand on it in the fixture.

The efficiency of LED bulbs, including the lens and packaging and the
ballast is about 15- 22 %...the rest is heat and LED elements can't take it.

That's what all the huge heat sinks are on the bulbs for. Close them in..in
real applications and they burn out.

Ask a traffic signal guy. The LED traffic signals lights are replaced every
3-5 years depending on how many segments are burned out.

It's an LED hoax by the manufacturers.

- 'cept you don't edver change LED bulbs.
- They last over 100,000 hours. I
- have a 12 Watt LED floodlamp.
- Very cool (hihi)

Dave : Nah - The LEDs may last for 100K Hours
-but- the other Parts of the Bulbs themselves fail.

Have a few that have been running for 5+ Years
and others that Fail after 1~2 Years.

Talking $10+ LEDS and ~$45 LEDS that Do NOT
Last 100K Hours.

For most consumers the newer Commercial Cold
Cathode CFL Light Bulds may be the better 'choice' :
http://en.wikipedia.org/wiki/Cold_cathode
Rated up to 25K Hours -versus- 8K Hours for a regular
CFL Bulb. Plus a fraction better on the Power usage.
Plus Plus Less Mercury Too...

That's true. And what many people don't appreciate is the local aspect of radio. Those that do appreciate it are the ones trying to move forward to improve terrestrial radio to make it relevant. One station that can offer a choice of different content has a big advantage over its competition.

Ironically, one thing the web does really well is to deliver news, while one thing it does relatively poorly is to stream music.

Then you obviously aren't using it to listen to the radio all day. You
can buy a radio for $10 that'll run for a week on a pair of AA
batteries. People charge batteries in the sun to listen to the radio.
People who have never seen a power line, let alone an iPhone.

If you trash free radio by making it all digital that will be the end of
freedom as we know it.

Digital is not efficient. You can't run a digital radio for a week on a
pair of AA batteries.

Preaching to the choir there... I don't bash analog radio. I believe it
should exist permanently. Too many problems with digital, not the least of
which is that it's nowhere near as robust as analog, and you have to do too
much to detect and decode it. Once you are absolutely FORCED to buy
someone's technology to listen to radio, it's no longer a true public
medium.

And once HF is all DRM, that will pretty much put an end to all that remote listening off the power grid. Again, not robust enough. When analog fades a bit, you can still use your ears to figure out what's being said/played. With DRM, if it fades, it's gone. Nothing.

BTW, when I DO listen to the radio on my iPhone, I can play it for many hours easily. I've yet to run the battery completely down on the phone (4G). Now, talk time... THAT eats the battery pretty good... but I keep a backup with me that plugs right into the 40 pin jack and runs the phone for several hours of talk time. (never used it yet, either).

That's true. And what many people don't appreciate is the local aspect
of radio.

You're assuming more than a tertiary "local aspect."

By far most stations have perhaps, at best, a morning and evening "drive
time" program. Other than that, the only local content seems to be
commercials. I can't say that I've heard a newscast on a (non-news/talk)
commercial station in many years. Even our AFN stations have dropped all
local content except for emergency command information. And figure that the
FM band is starting to get really crowded with sports/talk/religious
stations... and who needs to hear Rush, Jim Rome and sanctimonious self
righteous preachers in digital?

40 meters is a fun band. When I was into that sort of thing, it was great fun to check into the net in the wee hours that was devoted to working all states.

I have a WAS certificate for 40 meter CW.

If I were to get on HF ham radio, and I may do so again, I think 40 would be where I'd hang out.

A lot of public radio stations have gone all news/commentary/talk on analog/HD1 and moved music to HD2, often classical and jazz. It doesn't make sense from an audio standpoint to have the music on HD2 and talk on analog/HD1, but the market for news/commentary/talk has expanded as listeners have switched to other ways of listening to music content. If everyone had an HD receiver then they'd be more likely to swap where talk and music reside.

As I understand the HD-FM spec, the maximum bitrate for stereo audio is around 98kbps. Upper and Lower secondary channels replace the analog in all-digital, and it's about the same bps, but at lower power for the secondary channels.

So all-digital does allow for more "virtual CD" quality audio channels, but no, you cannot combine multiple audio channels for even higher quality audio.

The big advantage of all-digital is that raising power levels no longer will interfere with analog, presuming all stations do a complete digital switchover. This is many years in the future of course.

You had to have the right speaker on an external amp, and on SSB, it wasn't bad at all anyway. As a non program listener, I couldn't care less about the wooly audio. My friend had other receivers if he wanted to listen to that AM stuff, and so do I. You would be shocked at some of the parts I got for mine recently, without resorting to cannibalization of another 515. I just made a few phone calls. Other receivers have long come and gone, but my 515 and 525 stay around. I bought my 515 in 1984, and my present 525 in 1989. My R5000, R71a's, Drake R7A and R8A, and several ham rigs have all gone away. Some, like the R8A annoyed me due to the el cheapo encoder failing and horrible ergonomics, along with generally disappointing me, performance wise, others, like the R5000, just didn't grab me, and the fact it ran insanely hot on AC power, made it go away. It didn't have the bouncing keypad yet, but I knew it was coming.

I run my receivers on a decent quality PC UPS, and have surge protectors on all the antenna lines coming in. The radios get their inputs shorted when I'm not listening. With those precautions, the main worry I have is electrolytic caps failing. All the problems my 515 has ever had were cold solder joint or interconnect caused, and it's been problem free for about the last 20 years. The 525 has a dimming display, but it can be "rejuvinated" by simply leaving it on for a while. It doesn't affect anything anyway.

Thank you for finally acknowledging that. I've only had to mention it
about five times. And YOU'RE the "expert"!

From the actual iBiquity handbook the rate is 96Kbps. There is no
"98Kbps" spec in the system. So going with the real figure, we find that
the bit rate is approximately one-fifteenth that of an ordinary CD, the
CD including forward error-correction. Amazing! "Virtual CD quality"
with seven percent of the data used by the CD. And using a ten-year-old
codec at that. You don't have to be an audio engineer to discover why
"HD Radio" sounds the way it does.

> The big advantage of all-digital is that raising power levels no longer
> will interfere with analog, presuming all stations do a complete digital
> switchover. This is many years in the future of course.

But since there will be no improvement over the audio quality it
provides today, what does that buy you? And wait until digital start
interfering with other digital stations. Even though you're not willing
to admit it, the allocation table on the present FM band was designed
for analog, not digital.

It's a good thing it will never happen because it will never work, at
least not the way the stations expect.

I was listening to V02 aka 'cuban lady' number station just now, on 5885 khz and where it would have been the usual "final" call (or as some of you like to call them, "goodnight") it just went into some nasty electronic noise (kind of sounded like an old 56k modem) then went off air.

Did anyone else catch that!?

Strange!

Well over here a broadcaster claims that a 64K Mono channel offers
superior sound quality thats Crystal Clear;!...

Who was it who said tell the people lies often enough and they become
the truth .. Dr Goebbels was it or someone similar?..

Now what do I do?

I spent so much effort gathering these important items.

http://groups.google.ca/groups/search?hl=en&as_q=&as_epq=GymyBobism&as_oq=&as_eq=&num=100&scoring=&lr=&as_sitesearch=&as_qdr=&as_drrb=b&as_mind=1&as_minm=1&as_miny=2003&as_maxd=1&as_maxm=1&as_maxy=2008&as_ugroup=&as_usubject=&as_uauthors=m+II&safe=off

My 'GymyBobism' collection...updated daily:
==========
some '#' bracketed text added for clarification
all cut and paste, NO modifications of ANY kind
100 % Pure GymyBob. Accept no substitutes!

We need less morons like another clone of Moron II here.
My fifteen minutes of FAME!

Your car alternator will charge your car batery up to 15.4 volts in
cold weather.

NTSC redefined it slightly off 60Hz so that power supply ripple
will move on the screen (two slightly black bands that scroll
up/down your screen

You sure spent a lot of time trying to convince me you don't knwo what
I am talking about...LOL

Voltage does not indicate state of charge well.

At 11.6 volts a 12v battery is about 50-70% charged still.

Polish solar panels are what americans called "flashlights"

There should be subsidies for solar panels but control of prices to boot.

Propane will disapate and freeze when it evaporates.

Gasoline is not nearly as volatile as hydrogen.

When I use pot I imagine everythging is perfect.

Many people have browsers that economize the download

Just another threading error creating confusion

Learn how to thread or sit back and watch for a few years.

Try to stay on topic and on thread too bean brain.

Perhaps try Outlook Express or another browser that knows how to
thread posts.

Bottom posting was the was in the 70s and 80s before threading
browsers were available cheap like OE

Another Forte Agent person that doesn't understand threading.

You use Mozzilla and haven't learned to thread.

Try Outlook Express so you can understand threading maybe.

I have been noticing many threading errors everywhere on Usenet lately.

People with OE don't seem to have the petty problems with subject
lines changing, intermingled posts and downloading binary files with
mixed posts, random pieces and many other problems all the nonOE
people have.

Bottom posting has been obsoletely by threading browsers.

Forwarding does not include headers.

Call your damn ISP and tell them your browser is multiple posting.

90% of the people in America have never operated a computer.

Let's say youre solar cell was trying to put out
14.3 volts DC and you stuck a 10 ohm meter in series with a charged
13.8 volt DC battery.

Your troll was too obvious. Try to engage the mark in conversation
first so there is, at least, some stake, like friendship for the
person listening. When the friendship is well developed then attack.
Not too obvious at first or you will lose your audience. This will
enhance your troll points.

I think outside opinions are worth much more than sales hype from the
company that made the product.
Referring to *factory* charging specifications for the batteries
they make ##

This is power grid induction through capacitive proximity

You can get fooled with another ground in the house finding it's way
back to the transformer neutral.

A thought I have is rain water from a roof on a three story home
through a micro-turbine.

Setback thermostats only work efficiently for small differentials,
dependant on the time duration.

Breakers are good for one time usage of one fault and then they need
to be replaced for any warrantied usage.

If the breaker interupts a fault, it should be replaced.No warranty
will honoured after that.

I don't have a link at this time

There are no hydrogen molecules in water and the oxygen in water isn't
flammable either.

Water is inert and contains no energy to be used. Get some basic chemistry
first.

Quite simply put, for some of the boneheads here.

NiCads and NiMh batterries are designed to take a current charge forever.

Oh yeah, I can charge a battery and use it six months later fully
charged. The nicads will be cooked because you keep them on charge,
just in case you need them but when you remember them six months
later they are cooked and won't last 5 minutes in the camera.

It takes a complete idiot to deny they can short out all by
themselves. Three, loose in a bag can short themselves out.
referring to AA batteries doing the physically impossible

Did they have electricity back in 1994?

I have been around so long with this stuff I believe I invented the
diode in 1941 but I am not familiar with the solar panel usage
requirements of them. (no P & N substrate explanations please. I wrote
the GE manual...LOL)

NOTE: do not pass ground wires through metal holes or cable clamps
with two screws on a metal surface.

There is **NOT*** enough energy in a lightning bolt to power your
house for more than an hour...if that. Do the math.
The figures escape me but let's say it puts out a roughly MWatt of
power for 100 nanoseconds?
100 x 10-9 x 1 x 106 / 3600 (sec/hr) = 0.0027 wH
oooops.... Wouldn't light your home for a 1/2 second.
OK..OK.. multiply the figures time 100 or 1000. Now it would light a
100W bulb for 1 second.

The IEEE-232 standards were never followed or known by many.

Fossil fuels are still renewable and being cxreated as we speak.

Children are venerially created.

If you want to discuss this then fine, otherwise go fuck yourself like
your mother did.

Can you let go of my dick before it explodes on ya, goofball?

Petroleum is not related to Natural gas.

I would rather work at my $100/hour job than at chopping wood for hours to save $3/hour

I have no license, I wire and inspect other's wiring for a job and work for a medium size electrical utility.

As a design engineer of transformers for 10 years I happen to know you are full of shit.

I am a Protection & Control Tech by profession and have experience with control systems

Try spelling "bus" correctly! Maybe your brain will start again. Probaby not, you fucking loser.
Referring to the correctly spelled word 'buss' as used in real electrical terminology
http://tinyurl.com/5ctml

X10 signals are transmitted just after the voltage waveform zero crossing. This is in order to avoid conflicts with SCR and Triac peak waveform switching spikes from load type devices such as lamp dimmers.
control module misinformation

Besides when they on any line they will pull of the meter as a disconnect point.
speaking of power line guys miles away removing YOUR electrical meter for THEIR safety

My workplace has been throwing out huge digitizing pallettes (like 24 x 36" units)
in alt.sewing.mach-embroider

The majority prefers top posting.

Not one of your suggesters listened to what the OP requested...LOL

Get your tear ducts flushed by a knowledgeable optometrist.

Not many materials have the huge exponential resistance/heat curve aluminum does. Overload doesn't make it glow like copper...it flashes and explodes.

A bathroom fan motor would never push hot air down ten feet or cold up ten feet.

Bathroom fans have a hard time pushing 55 cfm through a 3-4" pipe 20 horizontal feet. They are made to vent smells and humid air horizontally only.

Why not spend the money on a contract with the grid company and get an exclusive line to your house and never have brownouts.

Usenet rules dictate top posting for readability

Many cell modems are set up to filter bottom posts out.

Cell modems do not cut off anything.

What security flaws.
##referring to Outlook Express##

10 pounds per gallon Imperial. That gallon is totally unique to the US....ooops..I think all gallons are unique to the US now.

The standard Imperial gallon the whole world used weighs 10 pounds exactly.

The copper isn't worth more than 5 cents per pound. It is classed a mixed copper and nobody wants it.

Hey moron! The copper is considered "mixed" copper and is worth about $0.02 per pound, if he seperates it all.

Just don't ever lose weight. Toxins are stored in your fat cells.

Did you know, **NO***, I repeat ***NO*** death has ever been related to PCBs?

Insulated square copper wires from a dry transformer are not 99% copper and take a lot of work to remove the insulation.

I have tonnes of insulated copper wire if you want it. I think you could almost have for the picking it up. How many bins can you take per year

50 lbs? We have it by the bin full. Mostly #6 to 650 MCM. I beleive you would have to leave a bin and then pick it up full later to compete with the current scrapper.

Can't this tranformer be used by somebody to generate a second 120V from a single phase 120V inverter? It sounds pretty beefy.

BTW: once you knock the wedge out of the coil form the laminations will be easier to get out. This keeps them from buzzing until the varnish and other impregnations go into it.

All you guys have a bad Christmas or Jewish and didn't see Santa or something?

Run each signal twisted with a ground for noise. RD twisted with gnd as a pair, TD twisted around ground as a pair etc... This means signal/logic ground not power ground or case ground, if they are different. Do not
connect the other ends of the ground conductors.

Tar pitch in a flourescent ballast does ***NOT*** contain PCBs and probably never did.

Religion is not genetic or even herodigious

I believe the warmest part of the lake is just below the ice. As the water frezes it rises to the top and joins the other ice formations.

Gel cell won't cut it when it comes to putting out 100A or more. They cook in one spot and the rest of the electrolyte doesn't circulate

fast enough.

There is nothing standard about USanian measurements. They changed their sizes to avoid trading with the rest of the world. This worked for a few centuries but the rest of the world moved on to the metric system to avert the confusion the US caused.

Ever put your ohmmeter (do I need to explain an ohmmeter also?) across a capacitor? It measures infinity after charging to the supply voltage because the electrolyte is an insulator.

Electrolytes are not conductors of electricity in a capacitor.

If the electrolyte conducted it would be a resistor.

I doubt they are 4 farads. More likely 4 microfarads uf.
referring to 4000mfd caps

Sometimes it is an ego boost to have these so-called "professionals" come and beg for information because they can't our toys do what the good guys can but I would never hire them given a choice.

Do you measure altitude in degrees? Many aeronautical people would disagree with you.
referring to solar azimuth/altitude thread

My house is filled with motion detectors. They don't all operate lights. They mostly signal my house control computer and it decides what to do and when.

Enlighten please (like it really matters...LOL)

I will hand stitch my embroidery before I would pay that kind of money...LOL

A 50Hz transformer needs double the iron a 60Hz transformer needs for the same VA capacity.

Does it test CTs with real current or just voltage?

It doesn't really matter where the secondary current comes from, secondary exciting or primary current exciting, the voltage developed or excited across it will be about the same.
talking about an OPEN circuit CT transformer

High voltage spikes want to keep going at the end and this is where your saturating core transformer core is located behind the fuse.

Moving a kill-a-watt unit around is like using it on somebody else's house and telling the person's load.

oooops. A flourescent with a filament?
not knowing how most fluorescents start up

You are a stupid basterd.

Ever considered anxiety medication? Chest pains for a man is a classic symptom.

When confronted with many websites stating the otherwise he won't address the issue but repeats his crap again like a child stamping his feet.
Oh, the Irony!

What are you doing up at this ungawdly hour? I just got finished embroidering about 10 items, including a flight bag for golf clubs.
in alt.sewing.mach-embroider

I just love women with front loading bobbins.
in alt.sewing.mach-embroider

I doubt a 6 needle machine would be faster than a 1 needle machine unless you do repetitive patterns.
in alt.sewing.mach-embroider

I had many problems with this and damaged my machine a few times. It was the needles. Find ones that have very little "hip" bump around the eye of the needle.
in alt.sewing.mach-embroider

I have found doctors absolutely ignorant and totally obstinet on these kind of issues.

I put my first child on Ritalin for a year or so when quite young. It beat going to prison for beating him black and blue.

I made a big mistake and should have "drugged" all of my children the same.

I did the chem.cut medication stuff for a few years with my first child and then found Naturopathic Doctors using homeopathy to get more lasting relief.

Homeopathics saved me thousands of dollars for operations I did not have on my children

Accupunture worked for my 1 and two year old children for ailments after the medical doctors could do nothing for.

Placebo is a completely natural cure for many ailments.

Polio Vaccine? They stopped giving that one long before HIV was invented.

You have no idea what you are talking about and either does anybody else here.

See if you can replace it with a thermal acting unit. They have a rachet on a shaft that holds thew contacts closed.
confusing motor overload with breaker

What are you doing in my group?

Milk is just plain poison for humans.

I am not a chemist but I know that cow's milk calcium molecules are a huge irritant to human digestion and usually results in calcium deficiencies

See an accupunturist for the pain and circulation
See a chiropractor to keep the structure good.
See a naturopathic doctor for the chemical imbalance.
See a medical doctor for a some poison that will make her life shorter.

Even an honest Doctor will take yoy they arte totally ignorant of nutrition.

The medical doctors will play the time game and probably just let him die after removing half his organs because they may be a problem.

Some things mankind should just not eat too much of and it isn't meat typically and this may not be consistent for all people.

Do not listen to the stories of addiction. Yes, they are tough to stop but so is insulin for a diabetic. I have stopped taking mine and it wasn't that bad but after months of regressing I chose to return like the other half the population.

Make sure your wrists are well warmed up before putting sudden jerky movements to them.

Make up your mind before you mouth off like the usual Internet piece of shit. This is a rough group and if you had followed the usual recommendations you would have known that and have nothing to say about it.
in misc.kids.health, alt.support.breast-implant, misc.health.alternative

Bad practice to ground yourself when working on electronics. It increases the chance of injury or death by electrical shock and also increases the chance of static discharge to the circuit chips. Ground is a potential too.

Oink...Oink...just take it out. What could be simpler?
in soc.support.fat-acceptance, alt.support.big-folks

Sometimes it is an ego boost to have these so-called "professionals" come and beg for information because they can't our toys do what the good guys can but I would never hire them given a choice.

Do you measure altitude in degrees? Many aeronautical people would disagree with you.
referring to solar azimuth/altitude thread

My house is filled with motion detectors. They don't all operate lights. They mostly signal my house control computer and it decides what to do and when.

Enlighten please (like it really matters...LOL)

I will hand stitch my embroidery before I would pay that kind of money...LOL

A 50Hz transformer needs double the iron a 60Hz transformer needs for the same VA capacity.

Does it test CTs with real current or just voltage?

It doesn't really matter where the secondary current comes from, secondary exciting or primary current exciting, the voltage developed or excited across it will be about the same.
talking about an OPEN circuit CT transformer

High voltage spikes want to keep going at the end and this is where your saturating core transformer core is located behind the fuse.

Moving a kill-a-watt unit around is like using it on somebody else's house and telling the person's load.

oooops. A flourescent with a filament?
not knowing how most fluorescents start up

You are a stupid basterd.

Ever considered anxiety medication? Chest pains for a man is a classic symptom.

When confronted with many websites stating the otherwise he won't address the issue but repeats his crap again like a child stamping his feet.
Oh, the Irony!

What are you doing up at this ungawdly hour? I just got finished embroidering about 10 items, including a flight bag for golf clubs.
in alt.sewing.mach-embroider

I just love women with front loading bobbins.
in alt.sewing.mach-embroider

I doubt a 6 needle machine would be faster than a 1 needle machine unless you do repetitive patterns.
in alt.sewing.mach-embroider

I had many problems with this and damaged my machine a few times. It was the needles. Find ones that have very little "hip" bump around the eye of the needle.
in alt.sewing.mach-embroider

I have found doctors absolutely ignorant and totally obstinet on these kind of issues.

I put my first child on Ritalin for a year or so when quite young. It beat going to prison for beating him black and blue.

I made a big mistake and should have "drugged" all of my children the same.

I did the chem.cut medication stuff for a few years with my first child and then found Naturopathic Doctors using homeopathy to get more lasting relief.

Homeopathics saved me thousands of dollars for operations I did not have on my children

Accupunture worked for my 1 and two year old children for ailments after the medical doctors could do nothing for.

Placebo is a completely natural cure for many ailments.

Polio Vaccine? They stopped giving that one long before HIV was invented.

You have no idea what you are talking about and either does anybody else here.

See if you can replace it with a thermal acting unit. They have a rachet on a shaft that holds thew contacts closed.
confusing motor overload with breaker

What are you doing in my group?

Milk is just plain poison for humans.

I am not a chemist but I know that cow's milk calcium molecules are a huge irritant to human digestion and usually results in calcium deficiencies

See an accupunturist for the pain and circulation
See a chiropractor to keep the structure good.
See a naturopathic doctor for the chemical imbalance.
See a medical doctor for a some poison that will make her life shorter.

Even an honest Doctor will take yoy they arte totally ignorant of nutrition.

The medical doctors will play the time game and probably just let him die after removing half his organs because they may be a problem.

Some things mankind should just not eat too much of and it isn't meat typically and this may not be consistent for all people.

Do not listen to the stories of addiction. Yes, they are tough to stop but so is insulin for a diabetic. I have stopped taking mine and it wasn't that bad but after months of regressing I chose to return like the other half the population.

Make sure your wrists are well warmed up before putting sudden jerky movements to them.

Make up your mind before you mouth off like the usual Internet piece of shit. This is a rough group and if you had followed the usual recommendations you would have known that and have nothing to say about it.
in misc.kids.health, alt.support.breast-implant, misc.health.alternative

Bad practice to ground yourself when working on electronics. It increases the chance of injury or death by electrical shock and also increases the chance of static discharge to the circuit chips. Ground is a potential too.

Oink...Oink...just take it out. What could be simpler?

We need less morons like another clone of Moron II here.
My fifteen minutes of FAME!

Your car alternator will charge your car batery up to 15.4 volts in
cold weather.

NTSC redefined it slightly off 60Hz so that power supply ripple
will move on the screen (two slightly black bands that scroll
up/down your screen

You sure spent a lot of time trying to convince me you don't knwo what
I am talking about...LOL

Voltage does not indicate state of charge well.

At 11.6 volts a 12v battery is about 50-70% charged still.

Polish solar panels are what americans called "flashlights"

There should be subsidies for solar panels but control of prices to boot.

Propane will disapate and freeze when it evaporates.

Gasoline is not nearly as volatile as hydrogen.

When I use pot I imagine everythging is perfect.

Many people have browsers that economize the download

Just another threading error creating confusion

Learn how to thread or sit back and watch for a few years.

Try to stay on topic and on thread too bean brain.

Perhaps try Outlook Express or another browser that knows how to
thread posts.

Bottom posting was the was in the 70s and 80s before threading
browsers were available cheap like OE

Another Forte Agent person that doesn't understand threading.

You use Mozzilla and haven't learned to thread.

Try Outlook Express so you can understand threading maybe.

I have been noticing many threading errors everywhere on Usenet lately.

People with OE don't seem to have the petty problems with subject
lines changing, intermingled posts and downloading binary files with
mixed posts, random pieces and many other problems all the nonOE
people have.

Bottom posting has been obsoletely by threading browsers.

Forwarding does not include headers.

Call your damn ISP and tell them your browser is multiple posting.

90% of the people in America have never operated a computer.

Let's say youre solar cell was trying to put out
14.3 volts DC and you stuck a 10 ohm meter in series with a charged
13.8 volt DC battery.

Your troll was too obvious. Try to engage the mark in conversation
first so there is, at least, some stake, like friendship for the
person listening. When the friendship is well developed then attack.
Not too obvious at first or you will lose your audience. This will
enhance your troll points.

I think outside opinions are worth much more than sales hype from the
company that made the product.
Referring to *factory* charging specifications for the batteries
they make ##

This is power grid induction through capacitive proximity

You can get fooled with another ground in the house finding it's way
back to the transformer neutral.

A thought I have is rain water from a roof on a three story home
through a micro-turbine.

Setback thermostats only work efficiently for small differentials,
dependant on the time duration.

Breakers are good for one time usage of one fault and then they need
to be replaced for any warrantied usage.

If the breaker interupts a fault, it should be replaced.No warranty
will honoured after that.

I don't have a link at this time

There are no hydrogen molecules in water and the oxygen in water isn't
flammable either.

Water is inert and contains no energy to be used. Get some basic chemistry
first.

Quite simply put, for some of the boneheads here.

NiCads and NiMh batterries are designed to take a current charge forever.

Oh yeah, I can charge a battery and use it six months later fully
charged. The nicads will be cooked because you keep them on charge,
just in case you need them but when you remember them six months
later they are cooked and won't last 5 minutes in the camera.

It takes a complete idiot to deny they can short out all by
themselves. Three, loose in a bag can short themselves out.
referring to AA batteries doing the physically impossible

Did they have electricity back in 1994?

I have been around so long with this stuff I believe I invented the
diode in 1941 but I am not familiar with the solar panel usage
requirements of them. (no P & N substrate explanations please. I wrote
the GE manual...LOL)

NOTE: do not pass ground wires through metal holes or cable clamps
with two screws on a metal surface.

There is **NOT*** enough energy in a lightning bolt to power your
house for more than an hour...if that. Do the math.
The figures escape me but let's say it puts out a roughly MWatt of
power for 100 nanoseconds?
100 x 10-9 x 1 x 106 / 3600 (sec/hr) = 0.0027 wH
oooops.... Wouldn't light your home for a 1/2 second.
OK..OK.. multiply the figures time 100 or 1000. Now it would light a
100W bulb for 1 second.

The IEEE-232 standards were never followed or known by many.

Fossil fuels are still renewable and being cxreated as we speak.

Children are venerially created.

If you want to discuss this then fine, otherwise go fuck yourself like
your mother did.

Can you let go of my dick before it explodes on ya, goofball?

Petroleum is not related to Natural gas.

I would rather work at my $100/hour job than at chopping wood for hours to save $3/hour

I have no license, I wire and inspect other's wiring for a job and work for a medium size electrical utility.

As a design engineer of transformers for 10 years I happen to know you are full of shit.

I am a Protection & Control Tech by profession and have experience with control systems

Try spelling "bus" correctly! Maybe your brain will start again. Probaby not, you fucking loser.
Referring to the correctly spelled word 'buss' as used in real electrical terminology
http://tinyurl.com/5ctml

X10 signals are transmitted just after the voltage waveform zero crossing. This is in order to avoid conflicts with SCR and Triac peak waveform switching spikes from load type devices such as lamp dimmers.
control module misinformation

Besides when they on any line they will pull of the meter as a disconnect point.
speaking of power line guys miles away removing YOUR electrical meter for THEIR safety

My workplace has been throwing out huge digitizing pallettes (like 24 x 36" units)
in alt.sewing.mach-embroider

The majority prefers top posting.

Not one of your suggesters listened to what the OP requested...LOL

Get your tear ducts flushed by a knowledgeable optometrist.

Not many materials have the huge exponential resistance/heat curve aluminum does. Overload doesn't make it glow like copper...it flashes and explodes.

A bathroom fan motor would never push hot air down ten feet or cold up ten feet.

Bathroom fans have a hard time pushing 55 cfm through a 3-4" pipe 20 horizontal feet. They are made to vent smells and humid air horizontally only.

Why not spend the money on a contract with the grid company and get an exclusive line to your house and never have brownouts.

Usenet rules dictate top posting for readability

Many cell modems are set up to filter bottom posts out.

Cell modems do not cut off anything.

What security flaws.
##referring to Outlook Express##

10 pounds per gallon Imperial. That gallon is totally unique to the US....ooops..I think all gallons are unique to the US now.

The standard Imperial gallon the whole world used weighs 10 pounds exactly.

The copper isn't worth more than 5 cents per pound. It is classed a mixed copper and nobody wants it.

Hey moron! The copper is considered "mixed" copper and is worth about $0.02 per pound, if he seperates it all.

Just don't ever lose weight. Toxins are stored in your fat cells.

Did you know, **NO***, I repeat ***NO*** death has ever been related to PCBs?

Insulated square copper wires from a dry transformer are not 99% copper and take a lot of work to remove the insulation.

I have tonnes of insulated copper wire if you want it. I think you could almost have for the picking it up. How many bins can you take per year

50 lbs? We have it by the bin full. Mostly #6 to 650 MCM. I beleive you would have to leave a bin and then pick it up full later to compete with the current scrapper.

Can't this tranformer be used by somebody to generate a second 120V from a single phase 120V inverter? It sounds pretty beefy.

BTW: once you knock the wedge out of the coil form the laminations will be easier to get out. This keeps them from buzzing until the varnish and other impregnations go into it.

All you guys have a bad Christmas or Jewish and didn't see Santa or something?

Run each signal twisted with a ground for noise. RD twisted with gnd as a pair, TD twisted around ground as a pair etc... This means signal/logic ground not power ground or case ground, if they are different. Do not
connect the other ends of the ground conductors.

Tar pitch in a flourescent ballast does ***NOT*** contain PCBs and probably never did.

Religion is not genetic or even herodigious

I believe the warmest part of the lake is just below the ice. As the water frezes it rises to the top and joins the other ice formations.

Gel cell won't cut it when it comes to putting out 100A or more. They cook in one spot and the rest of the electrolyte doesn't circulate

fast enough.

There is nothing standard about USanian measurements. They changed their sizes to avoid trading with the rest of the world. This worked for a few centuries but the rest of the world moved on to the metric system to avert the confusion the US caused.

Ever put your ohmmeter (do I need to explain an ohmmeter also?) across a capacitor? It measures infinity after charging to the supply voltage because the electrolyte is an insulator.

Electrolytes are not conductors of electricity in a capacitor.

If the electrolyte conducted it would be a resistor.

I doubt they are 4 farads. More likely 4 microfarads uf.

Once again, it will be time to shift your GMT clock.

Remember, on March 13, set your GMT clock back one hour as we observe DST
here
in NA.

Spring Back.... Fall Forward

Little early for April Fools, aren't you? :)

There's a 40m gray line opening to East Asia around now. Sometimes S. America.

Reminds me I haven't seen any Chinese hams on the air for a couple weeks. Must be the revolution.

KPFT is now carrying KTRU on an HD2 stream. Rice sold KTRU's frequency
to the University of Houston for a classical station.

Using incandescent bulbs insures the release of mercury as a byproduct of burning coal. Coal plants also release more radiation than nuclear plants. I have been using CFLs for 20+ years. I have broken maybe 3, all in my drop light. I am now using an indestructable LED lamp in my drop light.

2680. OT: Budget Priorities Disconnect between Public and Politicians

Newsgroup: rec.radio.shortwave
Date: 2011-03-07 14:44:06 UTC
From: dave <dave@dave.dave>
Message-ID: <4d74eefc$0$5668$bd467cd0@news.dslextreme.com>
Source record: 221632

Monday, March 07, 2011

Itï¿½s not just House Republicans and Democratic President Barack Obama who donï¿½t see eye-to-eye on spending priorities for the federal government. The American public has ideas that diverge from both political camps about whatï¿½s most important to spend (and not spend) tax dollars on, according to a study by the Program for Public Consultation, based at the University of Maryland.

After comparing the budget plans of Obama and House Republicans with responses from citizens, it was found that the public is willing to make deeper cuts in defense spending than either group of politicians. The public also is willing to slash money for intelligence, while the White House favors modest increases.

The public would prefer to double spending for energy conservation and renewable energy, while the GOP has called for cutting funds for these efforts. The House majority also wants a deep cut in funding for the Environmental Protection Agency. The public, meanwhile, wants a modest increase in spending on pollution control.

Funding for job training would double, if the public had its way. Obama prefers a small cut, and Republicans want to chop it in half.

On tax increases, the public supports raising income taxes on those making more than $100,000 annually. The GOP wonï¿½t stand for any tax hikes of any kind, while Obama prefers higher taxes for individuals making $250,000 and above.

You'd think , but DAB isn't that simple. I'm sure people more in the know
can correct me but AFAIK it doesn't simply send 2 channels of data for left
and right. I think like FM it sends mono data then some sort of difference
data which uses up much less bandwidth so a 128K DAB signal has a mono
component of something like (I'm guessing) 100K. I think this is why a lot
of people complain about the stereo image of DAB being very flat.

I'm sure wikipedia has more info.

>crystal clear to most people. I listen to 32 K web streams which are
>great for all but most critical applications.

DAB uses the MP2 codec from the late 80s. 32K would be unintelligable.

2684. FYI: Ordering replacement parts from Sony for ICF-7600GR receiver - Sony now has it's act together

Newsgroup: rec.radio.shortwave
Date: 2011-03-07 15:32:00 UTC
From: Jim <nospam@nospam.com>
Message-ID: <e3u9n6lmlp4700rqhv5n9mtl06fub3gkai@4ax.com>
Source record: 221637

I had to order a replacement power jack for the receiver, and called them over a month ago, they told me part was on back order for a month or so. I called them this morning, part will be in stock next week, and the ordering experience was pleasant and non-irritating, even though the order reps are in the Phillipines (bummer for our people).

I called 1-800-222-7669 (number was given to me by Universal Radio even though they are not Sony Reps). You get a menu, English or spanish, and a few other menus, with no delay between menus. Finally ou get to the rep, and the wait was no more than 10 seconds or so.

Rep spoke good English, and the whole ordering took about 5 or 6 minutes, not bad at all. There was a customer survey after the order and I gave them high marks in all categories, unlike most others I have experienced before, even when they were located in Georgia.

FYI, the DC Power Jack costs $4.11 + 2.50 Shipping + .59 cents sales tax. Part Number is:

1-580-681-21, J203, Jack, DC (Polarity Unified Type) (DC in 6V)

Jim

Virtual CD quality at 98kb/s? Not even aac can manage that, aac+ wouldn't either as it's designed for low bit rates rather than for high quality.

Just another example of spin, that doesn't add up when you look at the facts.

I think Tony forgot to mention that DAB uses the mp2 codec, which is
very in-efficient compared to modern codecs.

At 128k in stereo, the sound quality is not much better than aac+ at 32k
in stereo. So I would expect aac+ 32k in mono to sound significantly
better than mp2 64k in mono.

Yeah, it's too bad that so many universities are in such dire straits
that they're giving up their radio stations, something that they can't
readily get back when the economy recovers.

<http://www.kpft.org/index.php?option=com_idoblog&view=idoblog&Itemid=145>

It's interesting in that article that they mention what the biggest
attraction of digital radio actually is to broadcasters: "It also allows
a station to offer multiple stations to the public without obtaining a
new FCC license." While the better quality audio is often touted, the
reality is that that's just a side benefit of the digital system, the
read advantage is the multiple channels.

You're on the right lines, but I'll correct you :-)

Mid side is not available in mp2, instead is has a intensity stereo, and
it only uses it in the higher frequencies. The lower frequencies are
still in discrete stereo. The Intensity stereo as the name suggests, is
basically mono, with a parameter to select the difference in volume
between left and right channels. As far as I understand each audio sub
band would have it's own intensity stereo parameter.

A lot of the reason for the poor stereo image is that intensity stereo
doesn't preserve any of the phase information between the channels. Or
then again, perhaps it just that whole system is cr*p. :-o

I suppose, but I don't recall any bullets flying. As I recall the perimeter was fairly well lit up, and any bullets flying were provided by the Cubans. Not to say that some retaliatory fire might have happened.

A partial solution could be implemented by banning ALL corporate and
union contributions to political parties.

A cap of 1000 dollars maximum contribution per year per person levels
things out even better. It would be tax deductible, of course. No
contributions in another person's name either.

Not too surprisingly, the recipients of all the present day
contributions think this is a bad idea. Graft and corruption will do
that to people.

Give me a break, Bruce. By any stretch of anyone's imagination, even yours, I'd be a much better President than the totally absurd idiot we have there now...

I'm still guessing that you are a member of a public sector union who gets the privilege of posting to this venue on the time that the People of California and or your City/County pay you to do your job?

Actually if you check OpenSecrets you will find "big business" gives far
more equally to Dems and Repubs than unions do. To say only Rebubs are the
recipients of "big business" money is quite wrong.

And in reality they split the bandwidth in two when broadcasting two services. One of them may have more than half, so the other one will be crippled even more.

A 128 k DAB stream uses mono with a bit of panning information to derive
the stereo.
Stereo is only available on DAB from 192 kbps. upwards.

> I listen to 32 K web streams which are
> great for all but most critical applications.

They could be 32k AAC+ which is not like FM or anything but some people
can enjoy music at that rate.

Wooly was what the first reviewer called it, if I remember correctly. On an external amp, on an old speaker I found in my basement when I moved into this house, it's pretty good. Best audio of any of my present stuff is:

1. Hammarlund HQ-100 modded to the point of insanity, it sounds great.
2. Kenwood TS-850SAT very nice all around, sounds crappy on the internal, but on an outboard speaker, it sounds almost as good as the HQ.
3. Homebrewed SW reciever I bought at a garage sale after the old ham who built it died. Not enough power output, but it sounds really good on headphones.
4. Allied SX-190, after the speaker was replaced, it dried up from old age.
5. NRD-525, Kiwa ultimate rejection mod, 500hz and 1KHZ filters added.
6. NRD-515, Gilfer mods, added filters and the arrestor diodes clipped. That alone improved the audio a little.
7. A couple of crappy AM only multiband portables. Bad at everything.

I'm too poor to have a big collection (or power up boatanchors). I have
the K3, an R75, the Drake SW2, a Lowe HF-150 (with Keypad and serial
cable), an RF-B45, an Eton E10, a Yachtboy 300, and a Sangean ATS-606P
that I've misplaced somewhere. The Panasonic has the best audio. Oh
yeah, I have a National NC-125 and a Hallicrafters stereo hifi
receiver/shortwave out on the patio. I also only have a very few
scanners. I have left a trail of Trutone, Zenith, Hallicrafters,
Blaupunkt, Grundig, RCA, Realistic, etc. behind me. Not to mention 2
R-390As and a dual channel version of the RA-17.

2721. Radio Transmitter inadvertantly OTA = QSL?

Newsgroup: rec.radio.shortwave
Date: 2011-03-07 20:08:07 UTC

So - if you are listening to a station and trying to QSL them, and they have an unscheduled shutdown, and that shutdown comprises the bulk of the listening period - can that detail bag you a QSL? I ask because this morning (late night local time here), R. East New Britain (PNG) 3,385 kHz went completely OTA for a long period of time from 0808 until nearly 45 minutes later when it just as quickly came back up. That would be a VERY easy detail to report... ?

R. Milne Bay 3,365 kHz, meanwhile, was on that entire time with country music and lots of discussion of stuff by male program hosts.

Thanks for any insights...
Bruce

On a very loosely related note, a strong carrier also on 90 meters
(3,340 kHz), probably a religious broadcaster from Honduras, has also
been noted every night recently. Little or no modulation, however,
detected here. Similar signal to 3,290 khz but without the strong
adjacent channel QRM.

One more - have been hearing something quite well on 4,750 kHz lately
after 0900, but language and music is stumping me. Does not *sound*
like China scheduled for that frequency - could be RRI or Bangladesh,
but impossible for me to tell. Reception of this has been startlingly
good, crisp and clear audio, good signal and CODAR not a problem.

One more - V. Mongolia 12085 Khz has not been punching through the
Arctic very well lately - weak carrier, modulation at the edge of
audibility even with R. Australia 12080 passbanded out of the way.
Not enough to even get a recording.

Bruce

That won't be required once they move to all-digital at higher power levels.

OTOH they may decide to add more lower bit rate channels rather than
have two higher bit rate channels.

I always sent a detailed reception report, and most times it included a report
of the country music they played. They love country music in PNG.

Both stations QSL'd here many years ago.

20+ PNG stations QSL'd.

I agree - I always send the most detailed written report I can as
well; not doing so is cheating (in my book). However, if you what you
have is just faint muffled speech to listen to and report on, a
recording might be helpful as well. It helped on PMA The Cross - it
made the difference. Last few days, of course, 4755.4 has been MUCH
stronger, details easy.

I heard the country songs they played - not being a country song guy,
I didn't recognize a single one - all I could do was describe them.
Another place where a recording could help. Still, I only use them as
backup for the report.

Bruce

Many tunes I used to recognize, maybe even gave snippets of lyrics. These days of course, it is so much easier to look up the snippets and find out the actual song.

Good luck in your quest to QSL the PNG's.

Another thought. I'm not a country song guy either, but, somehow, the lyrics I always think up are somehow country oriented, but can be translated in other ways.

I love BMI.

My favourite tune? Ramblin' Rose performed by Nat King Cole.

I hope everyone here gives a thought tonight for the people of Libya, regardless of whose side one might be on.

I made countless calls today, and spoke with my Arabic interpreter as well, trying to get the Obama regime to step up the effort to evacuate the many folks in the area who simply want to avoid the problems in the region.

I know, that there are countless people, innocent victims, who will die in the area, through no fault of their own.

We, as I pointed out earlier today, did a much better job of evacuating Saigon, and certainly South Vietnam, many years ago.

Ramblin' Rose is a GREAT song. One of my Dad's favorites - he did not like to sing, but he hummed this song all the time :-).

Clear Channel, Cumulus, Citadel, etc., understand what sells advertising time to generate revenue.

Terrestrial radio, whether it's analog or digital, is local. You can't say that about satellite radio or services like Pandora. Even a music station will have some local advertisers, local weather, traffic, and sometimes some news.

It would be interesting to see an update of Nielsen's 2009 study that looked at daily average use of audio, and the sources of that audio. In 2009, terrestrial radio had the highest average daily use, and the greatest reach, by far, of any audio source.

Where do you get that revisionist bullshit from? The Vietnam
'evacuation' was a bloody fiasco. Washington abandoned THOUSANDS of it's
former helpers. They were all killed by the 'Cong. It was, without a
doubt, one of the most dishonourable actions in military history.

Talk show regarding electricity rates. Parallel to 1010 AM web stream.
Not terribly intelligible.

Drake SW2 80m horizontal loop 43.4, -118.4

Usually pretty easy here after 10 PM.

Along with much of Cole's other output, yes!

A kind thought, but I am not sure why we have to be the policemen of the world, especially when money is so short in our own country and the tea-baggers (read Republicans) want a smaller, more frugal government.

> I know, that there are countless people, innocent victims, who will die in the
> area, through no fault of their own.

Sad but true. :-(Same as we did nothing in Rwanda, the killing fields of Cambodia, etc, etc.

> We, as I pointed out earlier today, did a much better job of evacuating
> Saigon, and certainly South Vietnam, many years ago.

Well, yes, because we had a MAJOR interest in and a large number of OUR people (and supporters) in Vietnam -- and even then, we did a relatively poor job; IMHO your analogy is poor because it's hardly the same situation in Libya. No American soldiers there, no large number of locals on Uncle Sam's payroll like in Vietnam.

Actually I didn't look that closely, I was wanted to point out that
Europe is never likely to adopt HD-Radio over here, and mention the
interference problems. As far as I remember there was one trial in
Germany, and it was rejected.

Yes DAB is a big flop, and HD-Radio is even more of a flop, and yet a certain SMS keeps singing about how successful it is. It amuses me that somebody can describe something doing even worse than DAB as a great success.

Richard E.

Actually it's interesting that the queries about DAB receivers are far
lower than queries just about DAB. It would seem that people want to
know what DAB is, but don't want to buy it.

Richard E.

It would be interesting to see an update of Nielsen's 2009 study that looked at daily average use of audio, and the sources of that audio. In 2009, terrestrial radio had the highest average daily use, and the greatest reach, by far, of any audio source.

Did Neilsen go around and talk to the ~100,000,000 kids with mp3 players that don't even own a radio?

Actually I didn't look that closely, I was wanted to point out that
Europe is never likely to adopt HD-Radio over here, and mention the
interference problems. As far as I remember there was one trial in
Germany, and it was rejected.

I, too, don't think IBLOCK would even be considered outside of the Americas.
The 9KHz channel spacing in the rest of the world (100 or even 50 KHZ on FM)
would preclude its use. If it destroys 3 channels each direction in the US,
it would easily destroy 4 of those narrower spaced channels... and the band
is pretty crowded, especially at night on AM. Here in Korea, I get a station
each and every 9KHz channel on AM at night, and the absolute widest spacing
of FM channels here is 300 KHz, and when the e-skip/tropo is in, the Chinese
take over the band, with something every 100KHz, often wiping out local
Korean stations. No room there for an IBLOCK signal.

2762. Experian Does Not Require "Permissible Purpose" Says Judge

Newsgroup: rec.radio.shortwave
Date: 2011-03-08 03:46:29 UTC
From: Anne Onime <anonymous@rip.ax.lt>
Message-ID: <09112aeb521c74c13349dc731b1a8c00@rip.ax.lt>
Source record: 221715

Hintz v. Experian Info. Solutions, Inc., 2010 U.S. Dist. LEXIS 109202 (E.D. Va. October 13, 2010)

Facts: Plaintiff filed suit against Experian Information Solutions, Inc. (�Experian�) and Marauder Corporation (�Marauder�) alleging numerous violations of the FCRA. Specifically, Plaintiff claimed that Experian improperly allowed Marauder to access Plaintiff�s consumer report, that Marauder made an unauthorized collection inquiry for Plaintiff�s report regarding a debt Plaintiff disputed, and that as a result, Plaintiff�s credit score decreased. In addition to monetary damages, Plaintiff also sought injunctive relief. Experian filed a Motion for Judgment on the pleadings. The Court denied Experian�s Motion as to every claim except for Plaintiff�s claim for injunctive relief, which was dismissed. The Court found that Plaintiff had properly plead all of his other claims for relief.
Reasonable Procedures. With respect to Plaintiff�s claim under § 1681e, Plaintiff must allege that Experian had reasonable grounds to believe that Marauder would not use Plaintiff�s report for a permissible purpose and did not maintain reasonable procedures to prevent impermissible uses of Plaintiff�s report. The Court found that Plaintiff�s Complaint plead sufficient facts to survive Experian�s Motion. Plaintiff stated that Experian provided Marauder with Plaintiff�s report after Experian was notified that Marauder had been improperly threatening Plaintiff and that the alleged debt was invalid. Thus, viewing the Complaint in the light most favorable to Plaintiff, the allegations established that Experian had reasonable grounds for believing that Marauder was using its access to Plaintiff�s consumer report for an impermissible purpose. Further, despite knowledge of Marauder�s behavior, Experian continued to provide Marauder access to Plaintiff�s consumer report.
Permissible Purpose. Pursuant to § 1681b, a CRA may only provide a consumer report to a person if it has reason to believe that the person "intends to use the information in connection with a credit transaction … review or collection of an account of the consumer … or otherwise has a legitimate business need for the information." For the same reasons noted above, the Court denied Experian�s Motion on this claim.
Reinvestigation. Plaintiff also claimed that Experian failed to conduct a reasonable reinvestigation on his dispute. Plaintiff alleged that his credit file contained inaccurate information. Specifically, Plaintiff alleged that the debt listed on his consumer report was invalid because he returned the product at issue pursuant to a free trial period. Plaintiff claimed that Experian failed and refused to take the time to review the information that it received about Marauder from numerous sources, including Plaintiff, and to recognize that the derogatory information that Marauder was posting about Plaintiff on his consumer report was false, invalid, and causing him harm. The Court found that Plaintiff's allegations stated a claim and denied Plaintiff's Motion.
Injunctive Relief. The Court found that injunctive relief was not available under the FCRA and granted Experian's Motion with respect to this claim.

I think that allowing the UK to name its streaming "HD radio" (notice
not "HD Radio") was as ploy to influence such tools as Google Trends.

> R-390As and a dual channel version of the RA-17.

I've had a couple of the same ones you've had. The HF-150 came and went
very fast, as no matter what I did, I couldn't keep the nearby AMBC
station from hashing it up. I had two filters that knocked down
everything below 2MHZ down about 40DB in series and it still was audible
in the background. A friend who lives out in the middle of nowhere
bought it and it's still going strong. I had an RF-B45 for a few months.
It was ok, but the drift drove me nuts, and the filters were less than
great. I never had one of the huge tube radios though. When I had money
to buy one, I couldn't find one I liked, and when I found one I liked, I
had no cash for toys. I almost bought an HQ180a a local guy had for sale
a while back, but I had no place to put it where it could be used.

I need a replacement volume control for my Sony AIR-8 HH receiver.

The Sony part number is 1-230-537-11
The Bournes part number is PTP901-025K-203A2

This is a 20K control, A taper, with a push-lock shaft, and there doesn't seem to be a single supplier that has one, or even close. I did find someone that can supply a 50K version of it, which would work fine... but the minimum order is 100 pieces... and I only need two of them (going to replace the squelch control, too), and have no idea what I would do with the other 98 controls (~$200 worth...)

I'll post a pic in alt.binaries.pictures.radio .. if anyone, by some stroke of purest
serendipity, has something that will work in their parts stash.. I would sure appreciate your selling one to me (or two).

TIA for looking. I'll keep my fingers crossed.

You're almost certainly correct. I tried all kinds of chokes and stuff
and nothing seemed to help much. The signal level at one point was
insanely high, my 515's S-meter would be around an S-7 to an S-9 with no
antenna connected. I could take my finger and move it towards the
antenna connector and as I got close to it the meter would peg.

Some of the radios I've had were almost immune to it, the 515 being one
of them, once you got past 5 MHZ or so. The filter took out enough to
make it almost disappear. There was one hugely strong image without the
filter, but with it, it was barely audible above the background noise in
warm weather. Some were pretty bad, like the HF-150.

The station eventually redid it's ground system, and the signal level
here dropped to about a third of what it was at it's peak. The high
tension wires that passed next to the station and then pass by my
neighborhood were acting like some sort of antenna. It was about 5 years
from the first time I called to complain about it, until it was fixed.
The first thing I ever heard it in the background of was when we bought
a new answering machine, and every message had country music in the
background of it. It's a daytime only station, so nights were no
problem.

Extreme RFI is certainly very difficult to deal with ! Very FEW
receivers can withstand it . NRD-505 seemed to do a little better in
that department than most mass produced sets . But there weren't that
many of them made due to price/demand ratio . Oh, well ...

There is a Point a 'New' Generation that has grown-up
with "Digitized" [MP3] Music in their Ears -and- Only
Knows and Honestly Thinks Loud "Digital" Sounds
Blasting in their Ears -is- Good High Quality Music.

To this 'New' Generation of 'Digital' Is Good Music
Listeners {Audio Content Consumers} Does IBOC
HD-Radio just sound pretty good (ok) to them ?

Has iBiquity done it's research and given the next
'New' Generation of Radio Listeners {Audio Content
Consumers} Something That They Expect in a 21st
Century "Digitized" [MP3] Music {Sound} World ?

Since most of us here are thinking like Old School
{20th Century} Analog Radio Listeners -circa-1950s
~ 1970s :
? Are We The Future of AM & FM Radio ? [NO!]
? Do We Know What Today's Younger Audio
Consumer Want and Expect ? [WHO KNOWS!]
? Has The Radio Industry Done It's Job -and- Are
They Giving The 'New' Generation of Radio Listeners
What They Are Asking For ? [WE DON'T COUNT!]

yes 'i' remember way back when...

dave,,, Dave... DAVE ! ! !
-lets-get-our-facts-straight-

1 - The US Constitution "Requires" That Spending Bills
{Budgets} Originate {Start} in the US House of {Peoples}
Representatives.
-not-the-dictum-of-the-us-president-

2 - The US House of {Peoples} Representatives has Passed
a Budget {Spending} Bill to Fund +95% of All the US Federal
Governments Operations; Functions and Activities.
-the-bottom-line- The US House of {Peoples} Representatives
Has Done It Job and Passed a Budget [.]

3 - It is now up-to the US Senate to Authorize and Reconcile
The The US House of {Peoples} Representatives Budget Bill.
-note- The US Senate Has Not Done So.
-the-bottom-line- The US Senate Has "NOT" Done It Job and
Passed a Budget To-Date [.]

4 - Once Both the US House of {Peoples} Representatives
and the US Senate Reconcile the Budget Bill -then- It Goes
To The US President.

5 - The US President Can Sign the Budget Bill {Authorize
the Spending} -or- VETO the Budget Bill {NOT Authorize
the Spending}
-the-bottom-line- The US President Has "NOT" Done His
Job and Passed a Budget To-Date [.]

Clearly Should the US President VETO the Budget Bill
{NOT Authorize the Spending} : It Is The US President
That Will Be SHUTTING DOWN THE US FEDERAL
GOVERNMENT.
* NOT the US House of {Peoples} Representatives
* NOT The US Senate
.
Shutting Down The US Federal Government : Blame "BO" {Obama} !
* Blame Prez Obama For Sacrificing the 95% for the
Liberal Special Interest 5%
* Blame Prez Obama Putting the Democrat Special Interest
5% Ahead of the Vast "Majority" 95% of the Budget
* Blame Prez Obama For Shutting Down The US
Federal Government
* Blame Prez Obama It All "BO"s Fault
.
Note # 1 : US House of {Peoples} Representatives is
Controlled by the Republicans and the Have Passed
a +95% Budget Bill -they-did-their-job-
.
Note # 2 : US Senate is Controlled by the Democrats
and the Have NOT Passed a Budget Bill
-they-have-not-done-their-job-
.
Note # 3 : US President Obama a Democrat Has
Threatened To VETO a +95% Budget Bill and Shut
Down the US Federal Government

Thanks, Interesting - the other night when I heard this frequency active, the music they played sounded like - well, what I would characterize as Eastern Pops, for lack of a better term. I don't know Indonesian or any Bangladesh language well, so I could not tell tem apart if my life depended on it. So, I could not decide between it and Bangladesh, which also shows up on this freq at this time. It certainly was a good signal, better than any I have ever received from RRI. If I had heard what you heard, it might have been easier I guess :-)

It depends what they're comparing it against! My kids certainly can tell the difference between analog radio or a poor quality MP3 that they download versus the same music from a CD or from HD Radio or from a higher bit rate MP3.

There's also a good explanation of the advantages in terms of audio quality of digital radio by the late Cambridge Sound Works Designer Fred Pinkerton:

"There are a number of limitations with conventional analog FM broadcasts. Before broadcast, an analog FM transmitter must chop off deep bass sound and high treble sound to fit the allocated FM band "slot," reducing fidelity. In addition, analog processing for broadcast compresses the dynamic range of the music. An analog FM broadcast has little difference in overall level; the "quiet" passages aren't much different than the "loud" passages.

An analog FM receiver also has limitations. Reflected analog FM signals can interfere with the main FM signal inside the receiver, causing distracting bursts of static called multipath interference.

Finally, an analog receiver generates its own background noise if the FM signal it receives is weak, further reducing the fidelity of the music.

For all these reasons, conventional analog FM technology cannot reproduce the CD-like fidelity you experience with HD Radio technology.

An FM broadcast featuring digital HD Radio technology sounds better because it: Has full bandwidth bass and excellent treble sound; Has much better dynamic range. It better duplicates the full "soft to loud" range of an audio CD; Is immune to multipath interference; and In addition to sonic advantages, HD Radio technology provides useful text data to support the current program stream and most importantly, provides additional programs on the same FM channel (referred to as ï¿½multicastsï¿½), also with displayed data support."

Jeezzzz... You can process AM, FM, DAB, HD, Satellite, Cable, Internet,
TV sound most all audio channels !. FM does not -have- to be processed.
It does get processed to make it all LOUDER but so to can any other
broadcast medium;!..

>
>An analog FM receiver also has limitations. Reflected analog FM signals

This is basically what I do, mentally. Those domestic Aussie services are down in the 120m freq region where I get blasted 24-7 by horrid electrical noise and mixing products from those several blowtorch local MW stations a couple miles away. Those freqs are essentially a locked closet to me. I can hear a couple of the Korean outlets where they pop up, and WWV is easy of course - the mass of noise there just blows everything else away.

I can accept that the high treble has to be cut off, as FM doesn't support anything above 15Khz, but the same normally has to be done with low bit rate digital sound. It might be a different case with a codec that uses SBR, which HD-Radio does, in that case what you get is a faked top end, so you till end up loosing clarity at the top.

So basically the limitation of FM high end treble is no worse than low bit-rate digital.

As for chopping off the Bass, I don't see any reason why that has to be done.

> In addition, analog processing for broadcast
> compresses the dynamic range of the music. An analog FM broadcast has

Which has nothing whatsoever to do with the actual FM broadcast system. It is unfortunate that most of the broadcasters decide to compress the audio in this way, but there is no reason why that have to do it, and there is no reason why they can't also do it with digital broadcasting. From what I've heard of DAB here in the UK, they also use pretty bad dynamic range compression.

>
> An analog FM receiver also has limitations. Reflected analog FM signals
> can interfere with the main FM signal inside the receiver, causing

Can cause multipath distortion. As I've said before FM sounds bad some
of the time. Low bit rate digital sounds bad all of the time.

>
> Finally, an analog receiver generates its own background noise if the FM
> signal it receives is weak, further reducing the fidelity of the music.

Once on my way home from work, the DJ on an FM station turned the faders
right down, just for a joke. What do you think I heard from my FM radio?
Absolutely nothing. There was absolutely no audible noise. Yes FM can
produce noise under less than ideal conditions, but under typical
conditions the noise level is too low to be audible.

Also add to that, when the signal does get weak, modern FM car radios
often use additional techniques to avoid noise. Gradually reducing the
stereo image, if the signal gets weak and or reducing some of the treble.

>
> For all these reasons, conventional analog FM technology cannot
> reproduce the CD-like fidelity you experience with HD Radio technology.

CD-Like ???????
Although FM is not as good as CD, it's a great deal closer to CD than
HD-Radio or any other low bit rate digital radio broadcast.

>
> An FM broadcast featuring digital HD Radio technology sounds better
> because it: Has full bandwidth bass and excellent treble sound;
Utter bullsh*t

> Has much better dynamic range.
> It better duplicates the full "soft to loud" range
> of an audio CD;
Nothing to do with the broadcast system, and I bet many stations also
compress the dynamic range on HD-Radio.

> Is immune to multipath interference;
It mitigates against multipath. FM multipath is greatly over exaggerated
by pro digital radio people, but in reality the problems of low bit
rate compression are far worse than typical FM multipath.

> and In addition to
> sonic advantages, HD Radio technology provides useful text data to
> support the current program stream
Which is of little actual use. FM RDS is perfectly adequate for these
limited needs.

> and most importantly, provides
> additional programs on the same FM channel (referred to as
> ï¿½multicastsï¿½), also with displayed data support."

Extra un-necessary broadcasts, leading to even lower bit rates, leading
to even lower sound quality. Not that HD radio was ever capable of, and
will ever be capable of good sound quality.

Richard E.

We are really lucky to have this station so easy to hear from that
nation. I have had several good receptions of this transmitter now,
almost every night, and a couple nights ago it was practically
armchair. Easy copy on the IDs, crisp audio, decent propagation, and
blessed low noise with that new antenna I put up :-) Glad you are
getting them too!

Again there is a 'New' Generation that has grown-up
with "Digitized" [MP3] Music in their Ears -and- Only
Knows and Honestly Thinks Loud "Digital" Sounds
Blasting in their Ears -is- Good High Quality Music.

Their "Gold Standard" is iTunes Digital Music and to
this 'New' Generation of 'Digital' Music Listeners
{Audio Content Consumers} : What You or I and 'others'
would say is not good to poor sounding music is still
very good to great to them.

? Do We Know What Today's Younger Audio
'Content' Consumers Want and Expect ?
http://groups.google.com/group/rec.radio.shortwave/msg/1cd74643496f82dd

They are the Loud & Tinny Ear-Bud Generation ! ~ RHF

This is very true. I see it with my own kids, as soon as we get in the car I get "can I plug in my iPod?" though paradoxically they do not want the music very loud, either for their music or the classical and rock CDs that I play.

The difference between a CD and an MP3 is much more distinguishable on a home system with good speakers than on a vehicle's stereo or on junky ear buds.

By the same token, I've had people in my car and house when I'm playing HD Radio and they think that it's a CD.

One station in the Bay Area, KDFC, recently experienced an ownership change and transmitter change and as a result many of its listeners have to listen to it by streaming it online rather than OTA in FM or in HD. Here's what one listener stated <http://www.mercurynews.com/peninsula/ci_17562681?nclick_check=1>:

"KDFC is gutted. The hiss-free power and dynamic range of its HD-radio signal at 102.1 FM reaching my home here in Palo Alto was nothing short of astounding before K-FOX sunk its vampire fangs into it -- CD-quality for sure.

I had bought an HD radio midway through 2010, expecting something good. What I got was GREAT. Holy Shostakovitch! It was comparable to the difference between regular TV over an old glass-tube rabbit-ears set versus the high-def video signal on a new HD receiver. Light-years better.

Bill Lueth can say what he wants about listening to 90.3 over the Web. It's nowhere close -- a thin, tightly compressed apparition of its former wide-open HD glory. And even with a good roof-top antenna, listening on 89.9 is hopeless."

This was interesting because it validates what most people here have been saying for a long time:

1) Streaming radio over the web results in lower audio quality than OTA.
2) Streaming radio over the web works at home, albeit at lower quality, but isn't a solution for many (most?) mobile users.

It was also interesting because while you often hear reviewers praise the CD-like sound quality of HD or DAB+, here's a listener that actually understood _why_ it sounds better. If there's one problem with analog FM, it's the loss of dynamic range. With an AAC+ Codec (DAB+ and HD are both based on AAC+) you can achieve high quality audio with better dynamic range with as low as 64kb/s encoding.

Of course the loss of the higher quality signal was completely related to money. Anyone that's ever listened to digital radio is thrilled with the audio quality, but that doesn't mean that the station that's broadcasting the content they want in higher quality digital audio is going to survive.

No, but they do count you as a radio listener, even if only by virtue of hearing it from behind the counter at a news stand for 30 seconds. That means you consumed radio.

Obviously ratings only count lemmings.

It weighed more than the R-390As, and had an outboard power supply! It
had a "Westinghouse" GI contract number plate, but it was terribly
British inside. Rock stead PTO Wadley Loop. 35mm filmstrip bandspread
with 100Hz resolution. Damn thing weighed 130 pounds!

Aha so that would be 128 Kbps AAC? Now how do you suppose that will
compare to 40 or 48 kbps from HD radio using an older codec?

I have a 1 KW station on 1220, about a mile and a half away. It will
desense the Lowe on MW, unless I use my trusty MFJ-956 tunable bandpass
filter. The Lowe has the most wooden Grundig warmth of any radio I own.
I'd like to find a drunk AM station owner and double my money on the thing.

It's hard to say, but I know of at least a few young people who do seem to appreciate real quality. Even a guy in his 20s who isn't keen on 320k mp3 and prefers FLAC.

>
> Their "Gold Standard" is iTunes Digital Music
The default for ITunes is aac@128k. That is a dam sight better sounding that low bit rate digital radio systems.

I think may well be a lot of youngsters who think that loud = quality, but I wouldn't put them all into that group. After all, the difference between a CD, and lets say, a YouTube video, is very obvious. I don't think all that many young people are going to be too ignorant to notice the difference. Especially with young ears that can pick up a lot more detail than older ears.

HD FM still might have some commercial success, though I doubt it. Many folks stand to make money if it succeeds, and a sizable subgroup of them (for reasons completely opaque to me) have a deep seated hatred of radio. So, it might be successful at least for a while, though even that's a stretch. HD FM does not address any of the real problems facing FM, so what do you expect? Comparing analog radio to betamax and 8-track cassette decks is appropriate, but then is the solution really to produce a better betamax tape or better 8-track? There's clearly a lot of money and a lot of passion behind this movement, because there's no common sense whatsoever.

Actually thinking back to when I was a young teen. I had my little am transistorised radio that I used to listen to nearly all the time. This was long before we had CD, in fact before I even had access to vinyl.

Then on holiday in Wales, one of mum and dads friends had a good FM system in his car, and I remember sitting in that car listening to Radio 1 and thinking it was absolutely amazing.

After that I always listened on FM when I got the chance, and the next radio I got was an FM boom box.

Basically it is true that if you haven't heard quality, you don't necessarily realise what quality is. However most young people these days have IPods, and actually IPods can produce very good sound quality. I know because I have one. A lot of young people download music for their IPods, and actually most downloaded music these days varies from pretty good quality to very good quality.

Now it is true that most modern pop CDs don't sound nearly as good as CDs from before the loudness war. However, even with these loud modern CDs, you can hear the difference between a good mp3, or the same track played on low bit rate digital radio. If I can hear the difference with

my 44 year old ears, then I would think most 20 year old ears would also hear the difference.

[...]

This is a problem that civilized societies have been dealing with
since long before the time of Plato.

If you outlaw any but tiny contributions, and take away the ability
of, say, a modest factory owner or Internet entrepreneur to have an
influence on the process, you disenfranchise one class of "player"
in today's system (and one of the smallest, most independent classes
at that). Then the influence of the billionaire media elite's
coverage of the candidates will become proportionally more important
in deciding the outcome of the nomination and election process --
and the billionaire media elite are the very fount of the
oppressions we suffer today.

My solutions are similar to some proposed by Plato, and actually
implemented by the founders of the United States and their early
successors:

1) The powers of government must be strictly limited to a very
small, almost vanishingly small, sphere of our lives. This
limitation must be absolute, and no talk of "emergencies," economic
or even existential should be allowed to erase them. Then, at least,

freedom will be preserved and the inherent corruption of politics will be limited in extent.

2) The concept of "one biped, one vote" is inimical to freedom and must never be allowed to prevail again. There must be tests by which a potential voter proves his or her knowledge of civil society (including the sanctity of the limits on the state described above) and history and basic literacy before she or he is allowed to register. This will prevent the oligarchs and their media from using the emotions and the gullibility of the unwashed to push their agenda, as they invariably do today.

3) The current empire's policy of forcing disparate peoples with widely different values and cultures to live under the same government must come to an end. Self-determination and freedom are impossible under such circumstances. This means an end to making war to force so-called "democracy" on unwilling populations who want no part of the money-men's _de facto_ "American" empire. It also means a reversal of the oligarch's policy of importing non-Western populations into Western nations.

After all that is done, there is a _chance_ that the political process here could be intelligent, honest, and free.

It would also be helpful if we had a constitutional amendment requiring that any candidate who could collect a reasonable number of signatures would be given exactly equal amounts of media time as the other candidates, including the ability of each to produce programs making his or her case to the voters. The same production facilities would be provided to the Green party and the American Third Position party as to the Republicans and Democrats. This would spell the end, I hope, of the inherently tyrannical "two-party system."

Another thing to possibly consider would be to simply not permit election advertising of any kind. That's where the corrupt money goes and that's what fools the rubes, right? What could the corrupt money-men buy with their "campaign contributions" anyway, if not advertising? Advertising is unnecessary if the candidates get the free airtime described above.

Of course, that wouldn't prevent slick operators from just passing money under the table _after_ the elections are over to buy the legislation they want. But if the limits on the scope of government I mentioned above were in place, there wouldn't be much for the oligarchs to buy. And for those who might be tempted to get around these restrictions, the approach taken by Vladimir Putin toward Russia's oligarchs is most instructive.

With every good wish,

Kevin Alfred Strom.

The 850 with the DSP-100 can sound unbelievably good with a few
mods. Listen to what it sounds like on SSB at NU9N:

http://www.icycolors.com/nu9n/mp3/N2VU_Donald.mp3

http://www.icycolors.com/nu9n/mp3/VE6CQ_Rick.mp3

With all good wishes,

Kevin, WB4AIO.

Same here wasn't till I went to hear a live orchestra, well dance band,
I realised what real sound was!. Than some years later my aunt in London
married a BBC engineer. Had a BTR2 in their living room, amazing machine
to see it going let alone the Lockwood Autograph speakers!!, most
impressive:))...

Say cuzz, can you listen to Cymru (Cymru'r) Byd radio in Cardiff,Wales?
Years ago, I could listen to that radio station with my WebTV.Do they
still shut down at 12:00 AM midnight (Wales/UK time zone.Six hours ahead
of Missy Sippy time zone) and crank it up again around 7:00 AM - 7:00
AM?

Err...not exactly. And HD radio uses an old version of AAC+.
Oh by the way: HD radio uses lower bitrates. So it does not achieve high audio quality, even if 64 kbps would be the norm.

No gain in having daylight saving time in any equatorial region. It's
only in the temperate zones where any summer daylight advantage can be had.

You're right, my mistake.

I should not generalize what is the case in the U.S. in terms of streaming radio station audio with what is actually possible, and what apparently is being done in the U.K.. Just as those that have never heard digital radio in the U.S. should not equate it with the U.K.'s DAB digital radio.

Steven, why do you keep saying that, despite many people having said just the opposite in thread after thread that you've participated in? Really, why do you do it? Do you read other people's postings selectively and not see the parts that don't agree with your worldview? Do you think that repeating an untruth time after time will make it true? What are you doing?

Patty

I don't leave it on constantly. A couple hours in the morning. A few in the evening. I have lots of CFLs I've never changed.

Traffic lamps are turned on and off hundreds of times a day. That is not really comparable to the illumination duty cycle in most peoples' homes..

> & FM HD-Radios in Production and Proven Transmitters.

This is true. Whatever digital standard succeeds in other countries, the key is that both the receiver and transmitter sides need to be economical. iBiquity has already stated that they can adapt HD Radio to the 100 Khz channel spacing, and in fact it was already successfully tested in Switzerland. But if DAB+ on a new band(s) actually takes off in Europe then there will be no need for HD IBOC.

Wrong: There is no lower limitation, you must protect the 19 KHz pilot,
so 17K is about your maximum frequency, which is an overtone of a
cymbal, and sounds way better on analog than digital.

In addition, analog processing for broadcast
> compresses the dynamic range of the music. An analog FM broadcast has
> little difference in overall level; the "quiet" passages aren't much
> different than the "loud" passages.

Therefore, so listeners won't notice the switch, the HD is made to sound
as crappy as the analog.
>
> An analog FM receiver also has limitations. Reflected analog FM signals

> distracting bursts of static called multipath interference.

Not really bursts of "static"; the signal of interest nulls and the AGC
brings up the background noise. Sometimes the nulling can be nullified
by careful receiver design, low synchronous AM in the transmission path,
and true circular polarization.

It is when you are listening to DAB. I presume it's caused by some of
the sub bands failing randomly as the signal gets a bit too weak.

I tend to agree. Young people are still basically human beings, not really any different from the way we were when we were younger.

It is possible that some young people, who are only just discovering music, might not yet discovered good sound quality. However, most of them end up getting IPods, IPods can actually provide surprisingly good sound quality, and even the standard ear buds sound reasonably good. Not exactly audiophile quality, but good enough I think, that they will not like changing to low quality such as that delivered by HD-Radio.

Richard E.

One of my Sons who the Schools 'claimed' to have
what is now called ADD/ADDH and they wanted to
put him in a 'Special' Class and 'Med' Him all up.
http://add.about.com/
Back then when KDFC was a wonderful sounding
Analog Classical FM Radio Station
http://en.wikipedia.org/wiki/KDFC-FM
And alternative Medicine Practitioner suggested
Playing Classical Music at a very low sound level
at night while he was sleeping; so we did and it did
seem to work after a few weeks. Something to do
with occupying the Mind with Sounds that cause it
to subprocess them; and allowing the rest of the
Mind to Function more Normally.
http://www.naturaladhdcure.com/holistic.html

Sorry to hear that KDFC is no longer on 102.1 MHz
in the SF Bay Area. But then again KKSF 103.7 MHz
http://en.wikipedia.org/wiki/KKSF
and KBLX "The Quiet Storm" on 102.9 MHz
http://en.wikipedia.org/wiki/KBLX-FM
before it both are no longer the Music Formats that
they once were either. Still have most of the KKSF
"Smooth Jazz" Cassettes and CDs from the good
old years.

- I think may well be a lot of youngsters who think that loud =
quality,
- but I wouldn't put them all into that group. After all, the
difference
- between a CD, and lets say, a YouTube video, is very obvious. I
don't
- think all that many young people are going to be too ignorant to
notice

- the difference. Especially with young ears that can pick up a lot
more
- detail than older ears.
-
- Richard E.

Not after a few Years of Blasting their Ears with
Very Loud Sounding "Pop" Music via Ear Buds !

Dave this is the description of the SWL Antenna
used with the GS800-M Radio :
.
RHF's Shortwave Radio Listening (SWL) Antennas
in Twain Harte, CA -USA-
http://groups.google.com/group/shortwave-listener-qsl-reports/msg/1159a1a236de671d
.
SWL ANTENNA # 1 :
Horizontal Antenna* 100 Foot Long make-up of Five
1/4 WL Antenna Elements made from 5-Wire Rotor
Cable with each individual Wire "cut-to' a specific
Shortwave Radio SW "Metre" Band :
http://www.google.com/group/rec.radio.shortwave/msg/aea23fa41d6f5241
1 @ 98 Feet ~ 120m SW Band ~ 2.4 MHz : 5/7/10/12/14/17/19
2 @ 71 Feet ~ 90m SW Band ~ 3.3 MHz : 7/10/13/17/20/23
3 @ 59 Feet ~ 75m SW Band ~ 4 MHz : 8/12/16/20/24/28
4 @ 48 Feet ~ 60m SW Band ~ 5 MHz : 10/15/20/25/30
5 @ 39 Feet ~ 49m SW Band ~ 6 MHz : 12/18/24/30
All Joined together at the Feed-Point End and Fed
into an RF Systems MLB and Earthen Ground Rod
into a RG-6/UQ Feed-in-Line to the Rx.
http://www.rf-systems.nl/MLB.html
http://www.universal-radio.com/catalog/sw_ant/1484.html
Note - Antenna's Far-End pointed at 30° ~ NEN
http://groups.google.com/group/shortwave-listener-qsl-reports/msg/cda...
.

* Use primarily with the Grundig Satellit 800-M Radio
http://www.universal-radio.com/catalog/portable/0800.html

No offense taken, Warren! You're probably right. Steven comes across
as much more reasonable than the IBOC/iBiquity ranters, but when you
come right down to it, there isn't much difference in their content... :-(

- Equatorial Africa is on zulu year round.

Dave ...so... ? Equatorial Africa = Zulu Tribe {Nation} !
-nah-nah-nah-nah-nah-nah-nah-nah-nah-nah-nah-

-wrt- "ZULU" [Z] {Zed} Time
http://en.wikipedia.org/wiki/NATO_phonetic_alphabet
http://www.tc.gc.ca/media/images/ca-publications/com5-4.gif
.
Point-of-Fact # 1 :
Zulu Tribe {Nation} is in the Southern part of Africa
http://www.zanzibartrading.com/images/kwazulu_map.jpg
http://www.pakistanpatriot.com/wp-content/uploads/2008/03/boerwar_map.jpg
http://www.south-africa-tours-and-travel.com/images/1885-map-showing-zululand-zulu.jpg
.
Point-of-Fact # 3 :
Equatorial Africa has many Tribal Groups; most of
which would NOT be considered to be 'Zulu'
http://www.african-tribes.org/map-of-african-tribes-2502x2984.jpg
http://chromatism.net/current/images/equafrica2.gif
http://www.naturalhistoryonthenet.com/Continents/images/africaclimate.jpg
http://www.naturalhistoryonthenet.com/Continents/africa_countries.htm
Note : The "Equatorial" Region is generally defined as
10 Degrees North and 10 Degrees South of the Equator
-not- The Broader "Tropical" Area of Plus&Minus 23 Degrees
.
Point-of-Fact # 3 :
The Continent of Africa has Four {4] Times Zones and
http://jerryrefugeefoundation.com/images/africa_time_zones.gif
much of Africa is UTC+1 and UTC+2 with some western
parts on UTC+0 "Zulu" Time and some of the eastern

parts on UTC+3 too.
-note- The Zulu Tribe proper is in the UTC+2 Time Zone
and does not change to 'Summer' Time [DST]
.
OBTW : Most African-Americans who claim to be the
Descendants of 'Zulu's and attempt to Learn and Speak
'Swahili' do not know their True Ethnic {Ancestral} and
Tribal Cultural History.

The advantages of the personal music player, first the Walkman cassette and CD units, and now the flash based units, over the older boom boxes made many of us happy that we no longer had to endure bad and loud music from others, but the long term effects on hearing loss are a serious problem.

There are some ways to mitigate minor ADD/ADHD with behavior modification and non-drug methods, though the drugs really do work. The key thing with the ADD meds is to find the lowest dose that works. Too low a dose and the meds have no effect at all, too high a dose and it can cause problems. It's mostly trial and error to find the proper dose.

Fortunately no one has to rely on KDFC, whether analog or digital, for classical music.

How about apportioning votes according to taxes paid? That way the
deadbeats, corporate or otherwise, have NO say.

The leeches that tend make up the political class have gotten rather
good at making themselves look absolutely necessary. I see a problem in
convincing the unwashed in Holland MI that we can survive rather well
without the politburo parasites.

> 2) The concept of "one biped, one vote" is inimical to freedom and must

> today.

Well, OK. I can see your point about the dilution of the quality of the vote. The powers that be probably like things just the way they are. The monster truck and pro wrestling crowd are easy to sway. The Roman equivalent was 'Give them Circus'.

Getting a minimum voting prerequisite of, say, a grade 12 education in place would probably take a hundred years. The slime masquerading as lawyers would make sure of it.

> 3) The current empire's policy of forcing disparate peoples with widely

The greater the population, the less they get paid per unit of labour. The money value of time goes down as more and more compete in a limited job market. If you can't move the factory THERE, you cheapen labour costs here. It seems the money men have forgotten Henry Ford's belief that the workers should be able to afford what they are making.

> inherently tyrannical "two-party system."

Yes. I agree completely. A fair and equal amount of time given to all the candidates. Done properly, it would increase viewer numbers and benefit the broadcasters as well as the voting public. This would have to be done without the advertising being sandwiched into the middle of each candidate's presentation.

> Another thing to possibly consider would be to simply not permit

Televising round table debates with the candidates would serve democracy far better than attack ads from previously unheard of 'Patriot' groups or the 'Motherhood, God and Apple Pie' contingent.

I see the entire Russian situation as Putin and the gang putting enough pressure on the money class to assure themselves a money flow. They're running a protection racket. The money men get the resources and import/export business with ten to twenty percent of the take going to the 'insurance agents' running the government.

In the matter of the limits to government, The most minimalist proposal I've seen is, basically:

"The government's only job is to keep foreign powers from overrunning us and to make sure we don't kill each other."

How they proposed to keep the government from overrunning and killing us wasn't mentioned.

Another suggestion has been to raise funds for infrastructure by a system of lotteries. It's taxation on a voluntary basis, with a very slight chance of a 'win' thrown in for incentive.

Yes. I agree completely. A fair and equal amount of time given to all
the candidates. Done properly, it would increase viewer numbers and
benefit the broadcasters as well as the voting public. This would have
to be done without the advertising being sandwiched into the middle of
each candidate's presentation.

Better be careful... that was the exact gist of the old "Fairness Doctrine."
Of course, that was also back when radio and TV stations were operating "in
the public interest" as a condition of their licensing. Now, the only
interest stations are operated in is the lining of corporate pockets.

- Getting a minimum voting prerequisite of, say, a
- grade 12 education in place would probably take
- a hundred years. The slime masquerading as
- lawyers would make sure of it.

Mike,

Most-of/Nearly-All of the so-called 'Slime Masquerading'
as "Lawyers" have a High School {12th Grade} Education
Plus a College Degree and Passed a State Educational
Licensing Examination. {The Professional Class}

All of Them Clear Would Have The Right To Vote :
Using Most Educational Critera as a Standard of :
Who Can and Can't Vote.

OBTW : The ?Vast? Majority of the Elected Officials
at State and National Levels are "Lawyers" Too.
-tfif- They Too Would Still Have The Right To Run For
and Hold Public Elected Office; and Appointments as
State and Federal Judges too.

Clear One Thing Taints : Voting & Elected Officials &
Judges -hint- Lawyers : Stay Out The Lawyers ! :-} ~ RHF

? MWB ?

Which Is Better ? -or- Building a Better Radio Shack
with a Few [Under 10] Very Good Radios !

1st : What Desk Top Shortwave Receivers
Do you presently have ? {How Many?}

Which Receivers Are Being Used ?
-and- Which Are Not Being Used ?
-also- Why Do You Still Have Them
"IF" They Are Not Being Used ?

IMHO : Two to Three Very Good Quality SWL Table
Top Receivers is all you need {per Radio Shack}
-stress-building-better-quality-over-numbers-
* Save, Trade-Up and Buy Better Each Year
-and- Don't Collect Junk Each Month

2nd : What AM/FM & Shortwave 'portable' Radios
Do you presently have ? {How Many?}

Which Are Being Used ?
-and- Which Are Not Being Used ?
-also- Why Do You Still Have Them
"IF" They Are Not Being Used ?

IMHO : Two to Three Very Good Quality SWL
'portable' Radios is all you need {per Radio Shack}
-stress-building-better-quality-over-numbers-
* Save, Trade-Up and Buy Better Each Year
-and- Don't Collect Junk Each Month

Plus Two to Three {One-per-Room} around the
House where you Listen to the Radio.

3rd : What AM/MW DXing Radios
Do you presently have ? {How Many?}

Which Are Being Used ?
-and- Which Are Not Being Used ?
-also- Why Do You Still Have Them
"IF" They Are Not Being Used ?

IMHO : Two to Three Very Good Quality AM/MW
Radios is all you need {per Radio Shack}
-stress-building-better-quality-over-numbers-
* Save, Trade-Up and Buy Better Once Each Year
-and- Don't Collect Junk Each Month

Plus Two to Three {One-per-Room} around the House
where you Listen to the Radio.
TIP : Combine the 'portable' AM/MW Radio and the
Shortwave Radio's into One [1] Radio* that Does Both
* Three Eton E1 AM/FM Shortwave Radios* with Self
Powered Stereo Speakers are very nice All-in-One
Radios {The Grundig Satellit 800-M Works Too :-}

4th : What FM Stereo Music Enjoyment Radios
Do you presently have ? {How Many?}
NOTE : Same Criteria As The Above

5th : What VHF/UFH Scanner Type Radios
Do you presently have ? {How Many?}
NOTE : Same Criteria As The Above

Again : Building a Better Radio Shack with a Few
[Under 10] Very Good Radios !
-stress-building-better-quality-over-numbers-

But it is a place where local time and "GMT" are the same year round.
That was the point.

KCRW plays a lot of "groove" music, but no. Los Angeles has very shitty radio. I stream all day long; at night I can get Reno; which is better than L.A.

Hard truth is that in the US all stations act in the interest of
lining their pockets. "In the public interest' was a condition of
license, but little but lip service was paid. Every station I've
ever worked at sold PSA's and 'public interest' programs, buried

required content (including legal ID's) in revenue producing content, and shaded news to protect advertisers.

It's always been that way. Even Murrow had his content censored by the corner office in the interest of CBS's largest advertisers.

In the US, broadcasting, even so-called public broadcasting, is, and has always been, about the money. It simply can't survive any other way.

RHF,

You enjoy radios your way and I'll enjoy them in
my way. I like to collect receivers. I don't own "Juck"
receivers. And if the RFI in my neighborhood stays
as high as it is now, I need quality portables that
I can carry with me to better environments. I own an
ICOM R75 for a desktop radio. I have a collection of
high end Sonys. Grundigs, and Sangeans. I can make
my own decisions, RHF. Thank you for your advice,
but focus a little more on self-improvement and a little
less on telling everyone else what to do.

I think I've opted to get another RF-2200. I had one 35
years ago, when I was in college, and wouldn't mind
adding another one to my collection.

Mike

Source record: 221984

RHF,

I the RFI remains as high as it is right now at my location,
desktop radios would be rather useless. At least with portables
I can carry them to better environments.

BTW, I don't own any "Juck" radios.

Icom R75
Sony SW-77
Sony ICF 2010K (3)
Sony ICF-7600A
Sony ICF-7600G
Sony ICF-7600GR
Sony ICF-6800W (o)
Grundig SAT800
Eton E1XM
Redsun RP2100
Grundig G3
Grundig G5
Eton E5
Eton E10
Eton E100
DE1102
DE1103
DX440
Sangean ATS-803A
DX-398
DX-380
Grundig S350
Ten Tec RX320
Magnavox D2395

and many more older, but collectible receivers!

Enjoy your (fewer) radios, and I'll enjoy my
Collection!

Mike

> > cuhulin

- Old Coca-Cola wall clocks are good .
- They work off the 60Hz AC lines .

Looking Back at the Old Wall Clock and the Radio
on the Table below it...

Many/Most of the Old Wall Clocks that used the
60 Cycle AC Line Voltage to Run them were great
old performers and the only time you touched them
was Spring-Forward and Fall-Back. {Built-to-Last}

The House that I grew-up in had a small Table in
the Kitchen with an old RCA 'AM' Tube Radio on
it and an AC Wall Clock above it.
* The Radio had a small ~4" wide block of wood
behind it; so that the open back Radio could Reflect
the Sound into the Room. -circa- 1950s
* The AC Electrical Cord went up the Wall to the
Clock -circa- 1930/40s and still running accurate
to the Minute in the 1970s {replace the AC Cord
once in the 1960s}
-and- Those were the only two things allowed to be
plugged into the Wall AC Outlet below that table.

Listening to John K. Chapel on KROW/KABL-AM
960 kHz in the Mornings and Afternoons and a few
other Radio Stations : KSFO, KCBS, KGO, KLX
with mainly KGO in the Evenings to Late-night.

When Radio Listening Was Transformer Into TV Watching

Dave,

The Point [Facts} Being 'Zulu' Time is GMT/UTC+0
and Much/Most of Africa is NOT 'Zulu' Time; but is
in-fact UTC+1 and UTC+2 Time Zones that do not
use/observe DST.

~ RHF
.
The Continent of Africa has Four {4] Times Zones

"NPR chief Vivian Schiller resigns"

"After a series of controversies embroiling National Public Radio in recent months, CEO Vivian Schiller has resigned. NPR reports she was “forced out.” Board chairman Dave Edwards says the board accepted her offer to step down with “understanding, genuine regret and great respect for her leadership of NPR these past two years.” The latest controversy involved statements made by an executive critical of Republicans and the GOP."

- - Not enforceable.

- The People will decide what is enforceable.

Dave,

Fact-Is : The People "With The Guns" Will Actually
Decide What Is Enforceable. -wrt-

1st - Prez "BO" {Obama} Commander-in-Chief of the
US Military with Lots of Guns, Trained Troops, Tanks,
Ships, Aircraft and a vast DOD Logistics Support Network.

2st - State Governors Commander-in-Chiefs of their
National Guard Units with Lots of Guns, Trained Troops,
Armored Troop Carriers, Trucks and Tanks; plus a
Logistics Support Network.

3rd - Local Police and Sheriffs plus State Police
with Lots of Trained LEOs, Guns and Cars/Trucks.

4rd - "YOU" the Un-Trained Armed US Citizen with
a few Weapons and limited Ammo against any and
all of the above -?-what-are-the-odds-...-

YEAH SURE : The People Will Decide What Is Enforceable.
-not-

There is no obligation on Usenet to read or respond to every clueless post.

What's so strange about the hatred of digital radio is what it does to people that are normally smart, reasonable, lucid, and calm. What is it about digital radio that causes this behavior?

Here are some of the reasons for opposition to digital radio that have been put forward in their posts, which actually do have a factual basis:

1. A for-profit corporation, iBiquity, licenses the technology for digital radio in the U.S., it is not open source, and anything related to broadcast radio should not require royalty payments.

2. FM stations that have been broadcasting far beyond their protected contours for decades can no longer do so without interference.

3. As digital power levels increase at FM stations with high-power transmitters, those with lower power transmitters will experience interference.

4. A transition to all-digital will drive smaller, lower power, and cash poor FM stations out of business.

If they would just stick to these factual points, rather than go off on tangents where they have already been proven wrong (i.e. audio quality)

no one would have any less respect for them.

Except audio quality IS an issue. And as much as you deny it,
there IS intereference within a protected contour. I've filed such
complaints, myself.

I'm not fond of it myself, but, like John Higdon, I'm willing
to read informed opinions to the contrary. Posting magazine
articles and press releases and ignoring the personal experiences
of broadcast engineers and listeners is not my idea of informed
discussion.

>> -and- Anyone who Thinks that IBOC might be good
>> should sit down and shut-up -cause- IBOC IS BAD !

Uh, no, I never said that. What I pointed out (as have many other
people) is that Steven is saying the same INCORRECT statements
over and over again. I was inquiring why he refuses to acknowledge
the postings (mostly from other people, not me) that demonstrate
his mistakes. Far from asking him to shut up, I'm asking him to
RESPOND to those postings.

>There is no obligation on Usenet to read or respond to every clueless post.

What an ironic statement coming from you.

>What's so strange about the hatred of digital radio is what it does to
>people that are normally smart, reasonable, lucid, and calm. What is it
>about digital radio that causes this behavior?

You appear to be ignoring the rants coming from the pro-IBOC side.
Unless that troll has gone away; both he and the anti-IBOC nut have
been in my killfile for a long time. I occasionally see responses
to their idiocy, so I thought they were still around. Anyway, one
could just as easily say, "What's so strange about IBOC is what
it does to people..."

And were you more observant, you would have noticed over the years
that I have objected to illogical postings from people who hold
different opinions on a variety of subjects--politics, digital
radio, etc. In fact, The true "haters" of IBOC have been just as
rude to me in the past as those who are vehemently for it.

And btw, nice try again on your part to equate IBOC with "digital
radio." Once again, you are conveniently ignoring the postings from
people here who have said they would WELCOME a good implementation

of digital radio. So to say that people who have concerns about IBOC have a "hatred of digital radio" is patently false.

The question here is, why do you refuse to answer the legitimate and polite objections that people have posted about IBOC? Radio professionals (of which you appear not to be one) bring up instances of technical problems with IBOC. Listeners discuss how disappointed they are with its audio quality. Then you pop up again saying that IBOC works fine and the audio is great. Are you really going to try to ignore all those people by saying they're "clueless"? That's a classic mark of a troll; I fear that Warren is right about you.

>If they would just stick to these factual points, rather than go off on
>tangents where they have already been proven wrong (i.e. audio quality)
>no one would have any less respect for them.

Well, at least you've backed off to claiming that people have been proven wrong on only a single aspect of IBOC. Either that, or you don't know the proper use of Latin abbreviations. In either event, it's awfully arrogant to say that your quoted magazine articles are correct and people's own ears are wrong.

- There is no obligation on Usenet to read or respond to every
clueless post.

...but... Many of Us Do Do Do Do ;;-}}
.
- What's so strange about the hatred of digital radio
- is what it does to people that are normally smart,
- reasonable, lucid, and calm. What is it about digital
- radio that causes this behavior?

Maybe It's The STTCA! Syndrome ?
-wrt- Some Thing To Complain About !
.
- Here are some of the reasons for opposition to digital
- radio that have been put forward in their posts, which
- actually do have a factual basis:

Many Simply Oppose Change Because It's Change [.]
-they-like-things-the-way-they-are-
.

- 1. A for-profit corporation, iBiquity, licenses the
- technology for digital radio in the U.S., it is not
- open source, and anything related to broadcast
- radio should not require royalty payments.

Weren't Licensing "Patent Rights" Payments {Costs}
Built into Most Radios up until the 1950s and beyond ?
.
- 2. FM stations that have been broadcasting far beyond
- their protected contours for decades can no longer do
- so without interference.

Yes IBOC Forces Most Radio Listening To Become Local :
Which Actually Re-Enforces Radio's Local Advertising
Business Model. -iboc-can-be-good-for-business-
.
- 3. As digital power levels increase at FM stations
- with high-power transmitters, those with lower power
- transmitters will experience interference.

Yes -but- With IBOC HD-Radio Receivers Most HD-Radio
Listeners Will Not Experience That 'Interference'.
Either You Have A Good Local "On-Channel" Digital
HD-Radio Signal Or You Don't -while- Yes an 'Analog'
Radio Receiver will Let 'Analog Radio Listeners Truly
"EXPERIENCE" All The Interference That They Want.
.
- 4. A transition to all-digital will drive smaller, lower power,
- and cash poor FM stations out of business.

Change Happens Over Time :
* No Radio At All to AM/MW Radio
* AM/MW Radio Only to FM Radio
* FM 'Mono' Radio to FM 'Stereo' Radio
* Analog Radio to IBOC 'Digital' HD-Radio
OOPS ! The Biggest Change To Radio of All... "TV" !!!
.
- If they would just stick to these factual points,
- rather than go off on tangents where they have
- already been proven wrong (i.e. audio quality)
- no one would have any less respect for them.
.
tangents-r-us ~ RHF

Not for a station that used to be able to be received far beyond it's local area, and now has fewer listeners and can't charge as much for advertising.

> Yes -but- With IBOC HD-Radio Receivers Most HD-Radio
> Listeners Will Not Experience That 'Interference'.
> Either You Have A Good Local "On-Channel" Digital

This is true, and it's why the voluntary (for now) transition to digital is going to be painful in the short term. That's the big drawback to the whole IBOC model, but it's what broadcasters wanted in terms of digital radio because the alternative would have been even worse for them.

> - 4. A transition to all-digital will drive smaller, lower power,

But only the last one is an issue of more than just money, at least in the short term. A 100% power all-digital, 200W FM station would probably work. Even a 10% digital power 200W FM station won't work.

Hopefully the transition to all-digital won't be a gradual increase in power from 10% to 100% but eventually there will be a date set for analog to be turned off, and 100% digital to be turned on. But that is probably at least two decades away.

Actually the whole point of posting references and independent analysis is that "personal experiences" should not be the sole basis for evaluating technology.

If someone says "it sounds good to me" or "it sounds bad and I trust my own ears" that means very little (especially the latter because those people have already disclosed their actual agenda).

But when Walt Mossberg (technology guru from the WSJ) tests three HD Radios and says: "IBiquity claims that HD Radio makes FM stations sound like CD quality and AM stations sound like FM; to my ear, this seemed to be true,"

and

Consumer Reports states: "In our tests, HD Radio can live up to its promise of improved sound. The HD Radio sound quality delivers deeper bass, higher treble, more stereo separation, and a greater dynamic range (the difference between the loudest and quietest sounds) than FM or AM signals. At its best, HD Radio pushes FM sound quality closer to that of CDs and makes AM broadcasts resemble those of analog FM,"

it says a lot more about the reality of things than what someone on Usenet says.

Remember we're just in the infancy of digital radio right now, some of the newer features are just appearing on receivers, i.e. the JVC KW-NT3HDT has the latest HD Radio traffic information service integrated into the GPS functionality, and the same technology is probably in the newer vehicles that are coming with digital radio as standard or optional equipment.

It's very amusing when someone says something like "HD Radio's been around for ten years already and look how few people have a receiver." It says a lot about their agenda (or else they really are more clueless than anyone believes!). Ten years is _nothing_ in the rollout of a new broadcast technology. Look how long it took for FM radio or color TV to become ubiquitous.

Different digital systems.

They designed DAB to fail more gradually, which might be considered a mistake. Instead of simply popping out, we start to get the bubbling mud, which gets worse as the signal gets weaker, until it fails completely.

Well if somebody tried to sell me a car with a tiny engine, and said it was a high performance sports car, then I would be suspicious.

If somebody told me that a digital radio system, being used with a bit rate of only 40k, was providing high sound quality, then I would also be suspicious about that. Oh hang on..... I just describes what I think about HD-Radio.

I'm also suspicious of claims of near CD quality at 96k, as even aac need 128k to provide near CD quality.

As far as I'm aware the laws of physics work the same way in the US as they work here in the UK.

But HD-Radio doesn't use the aac codec, so at 96k it ought to sound a
bit worse than 96k aac.

Oh and I'm not saying that 96k aac isn't OK, but it certainly isn't near
CD quality.

They can also play Apple Lossless. iTunes can rip in that format, so
it's easy to put all your CD's on your iPod in good quality.

What are you getting out of this, trying to fool just a handfull of
Usenet posters? Your abandoned digitalradiofacts site is full of
deception,and doesn't even show up in Google searches. Google sites
are mainly for inter-company websites, not for general purpose use.
You should transfer your site to Google Blogger services, then
optimize it with SEO best-practices, and post many backlinks to it.
I'm astounded at the amount of time and effort that you have wasted.
Maybe, you just enjoy deceiving others, and stirring shit. BTW -
listeners are completely satisfied with analog radio, as the pathetic
HD radio sales show.

True, but then it depends upon what levet of sound quality you want. I'm quite happy with mp3 vbr with a high quality setting, as I don't expect my IPod to sound as good as my hi-fi system at home. I just expect good sound quality, and mp3 can gives me that while also being able to fit all 12,000 tracks of my music collection into my pocket.

The point I was trying to make, is that if young people hear something like HD-Radio, and then get an IPod, they will soon realise that their IPod sounds a great deal better than HD-Radio. They might not hve access to a good hi-fi system, but an IPod can give them a pretty good idea of the pleasures of good sound quality.

Well, as I heard them talking, the 3385 signal dropped to nothing
unscheduled, and came back up 45 minutes later. Meanwhile, 3365 was
still on the entire time. It was not a fluke of propagation, nor a
problem with my RX. I would think a detail like this (maybe not
usually so pronounced) could be a clincher of proof for a station
engineer.

Actually I think here in Europe the EEC has introduced legislation to limit the sound levels on such devices. Well so I heard anyway. I do find however that my IPod has a volume limit much lower than the mp3 player I was using previously. Not that I wanted to blast my ears with sound, but the light weight headphones I used to use were not very efficient, and with the volume limit on my IPod, I only had to walk down a fairly noisy street, and I would find it very hard to hear the music.

So I ended up changing to noise isolating ear buds, which are actually very good, and produce very good sound quality, but I'd still rather be able to use light weight headphones, as the ear buds tend to fall out of position too easily.

Well at least they seem to be doing something about kids destroying their hearing with loud music, but it does rather rule out the option of using in efficient headphones, as you can't turn up the volume to compensate.

Not that SMS is going to take any notice.

He'll just regurgitate some Ibiquity spin about near CD sound quality.
The only worry is that somebody might actually believe him. If they do
then they will get a big disappointment when they actually hear it. A
bit like the disappointment of hearing DAB here in the UK.

SMS just posts iBiquity-related Press releases that are totally
biased. Is there are point of debating any of this? Who in fuck reads
ba.broadcast, besides a handful of people? SMS definately has some
sort of dog in the fight, but I can just sit back and laugh, as I

collect hits! LMFAO!

Nah the NAB and FCC both Bought into IBOC HD-Radio
as a Developing Business Solution for Increased Local
Advertising [Tax Dollars : Revenue Enhancement] and
Expanding the the Saturated FM Radio Band with HD2
Channels. - imho ~ RHF
.

This totally explains the situation, via Bob Savage:

"Well, an anonymous source inside the FCC Mass Media Bureau has
reported that it is not true that "very few stations" have complained
about interference, but since I can't divulge the source I feel
certain you'll be skeptical about it. He says there are scores of
cases, most of which are credible and not nuisance complaints. I can,
however, document numerous others. Of course there's WYSL vs. WBZ.
There is the Greater Media FM in Boston whose calls escape me vs. the
NPR station on Naragansett Pier in RI. There are the three Clear
Channel 1130s in Detroit, Milwaukee and Minneapolis who turned off HD
at night to avoid interference with WRVA. There's KFMB vs. KBRT.
There was WFIL vs. WHP (second adjacent.) The chief engineer of WNTP
was complaining on the Philly board of radio-info about WMVP Chicago
within his protected contour. On the Pittsburgh board here there are
many complaints of WBZ seriously impacting KDKA at night. And of
course Citadel turned off HD at night on WABC, WSB and WJR after only
a week because of skywave problems. I could go on, but that should

suffice. And if, as you state, there are "special cases," what do you think should be done about them? Thus far the Commission's approach is to ignore all interference issues. There hasn't been a single case in the history of HD of the Enforcement Bureau ordering interfering stations to reduce digital power or turn it off. Do you think that's right? What's the "extra functionality" of HD on AM? Multicasting isn't offered in HD-AM."

http://boards.radio-info.com/smf/index.php?topic=160562.msg1372694#msg1372694

AND:

"Howard, you're right about viewing the prospect of the FCC actually doing something about an IBOC adjacent-channel interference case as - well, "dim." But allow me to show you how this game is played: iBiquity, the Alliance and the lawyer-packed (and engineer-lite) FCC have conspired to create a little jurisdictional Catch-22 designed to prevent precisely the action you propose. If a station victimized by IBOC interference tries to short-circuit the FCC complaint-and-enforcement process and sue the interferor directly, you land immediately into a legal conundrum. Yes: along with trashing the decades-old allocation scheme, distorting the NRSC standards and redefining what "interference" is, the IBOC cabal has thought of this too. So: you've filed your interference complaint(s) with the Enforcement Bureau - which the Commission staff, deeply in the tank for iBiquity, has resolutely spiked. They'll pretend like they never received it. If you press individual staff members, they will counsel you to approach the interferor to "try to work something out." The interferors, knowing they hold all the cards, give you the finger. What the FCC WON'T do: take any action one way or other other. Your proposed case against the interfering station lands you in Federal court, because radio waves don't respect state borders and are thus by definition "interstate commerce." Under Federal court rules, since Congress has given the FCC exclusive jurisdiction over the EM spectrum, you can't seek relief in Federal court until you have "exhausted administrative remedies." Your complaint is still pending (recall, the FCC hasn't given you relief or dismissed it.) Nor will they: if they grant you relief and order the offending station to reduce digital power or turn off the IBOC, they've just killed HD, which they don't want to do. If they dismiss your complaint, they've greenlighted a Federal interference lawsuit which will also kill HD (nobody is going to install an expensive system which could either get them sued or which the FCC might order them to turn off.) So - voila! The FCC sits on your complaint. Neat, huh? Of course, with the passage of time, the argument "you haven't exhausted administrative remedies" gets thinner and thinner, so you could head to court to point out that the FCC has spiked your complaint for a year or two - and these days, you could also add the argument that the FCC has NEVER taken action on ANY IBOC interference complaint (and notwithstanding a recent post here by The Cuyahoga Tejano alleging otherwise, there have been scores of them.) I believe that sooner or

later somebody is going to sue over IBOC interference, and that becomes more likely with the pending HD-FM digital power increase. This time around, we're not talking about disused AM facilities but high-billing FMs worth tens of millions. When the stakes get high enough, it's gonna happen. But it will have to be a major player with resources, since litigating just the threshold jurisdictional issue could cost tens of thousands - with no guarantee of success, of course. Then the ensuing lawsuit - promising as it does to be highly technical and hard to get a judge to understand or care about - could easily run to $250K in legal fees. But with a big major-market high-billing FM it could easily be worth it. And THAT, boys and girls, will mark The End of IBOC. The HD loons are sowing the seeds of their own demise with this nitwit digital increase - so I say, bring it! When -10 dBc doesn't improve coverage, let's go to -4! -2! "

MWB,

? I thought that you had a Drake R8B Receiver too !

? Have you consider and of these Shortwave Receivers
that also can go 'portable' ? :
* Palstar R30A Shortwave Receiver
http://www.dxing.com/rx/r30.htm
* AOR AR7030 Shortwave Receiver
http://www.dxing.com/rx/ar3030.htm
* Lowe HF-150 Shortwave Receiver
http://www.dxing.com/rx/hf125.htm

? Have you consider a 'separate' 12VDC Car Battery
power Supply just for your Radios on the Go to be
able to run the Radios longer when going 'portable'
and/or at Home to reduce/eliminate the RFI on the
house's AC Line ?

~ RHF
.
-ps- I have may have as many Radios and Most are
New-in-Box down in Sub-Basement #3 in Alameda.
Still need to go down their and Clean/Thin things out
a bit.
.
-fyi- Sub-Basement # 3 is really the Third Room in
a 5-Room Half-Basement -and- Not 3-Levels Down
as some may think; since Alameda is a near Sea
Level {+30 Feet Max} Island in the SF Bay Area
.

Easy as pie,,, wherever you are in the World, just ask somebody,,, Say cuzz, what time is it? If you don't understand their foreign language, just point at your wrist. (like I did inside of that AT&T SUCKS! store a couple of days.The only person there who was wearing a wristwatch was the store security guard guy there.Everybody else whipped out their Stupid cell phones/Stupid smart phones to look at the time)
Then, set your time piece accordingly.

YOU CAN'T FIX STUPID!!! ~ Jim White, former KMOX Saint Louis, Missouriah radio talk show host.

Indeed, look how long it took for ATSC to become the universal standard digital terrestrial broadcast TV standard in the USofA, 11 years from the first broadcast.

So is it unreasonable to expect similar with digital radio, when the cost of an HD radio is significantly less than an HDTV?

What you don't understand is that it was _mandated_ to turn off analog TV, so there was no option except digital. It's very different with radio. Congress and the FCC have not yet set a date for the discontinuation of analog radio, but it's likely 15-20 years away. A voluntary migration to digital radio will take a lot longer than a mandatory migration to digital TV.

You also have to look at the big picture here. There are still a great many older analog TVs still in use because a) the government subsidized converter boxes, and b) those with digital cable or satellite do not receive OTA broadcasts. They likely would not do something similar with digital radio.

For radio, you have hundreds of millions of vehicles with only analog radio, as well as home and portable radio receivers. The FCC chose the best of their limited options when it came to digital radio and adopted a scheme that allows temporary hybrid broadcasts of both analog and digital, with a long term goal of moving to all-digital.

What the FCC and congress _should_ do is similar to what they did with TV--mandate that all receivers sold after a certain data be capable of receiving HD. Then they can look at setting dates for the end of analog radio.

3010. Good source of wire at a decent price?

Not even comparable. It took eleven years for digital TV to completely supplant analog TV, and in the process required several major adjustment, band allocation changes, and the complete replacement of the installed base of television sets.

I don't know how to break this to you, but "HD Radio" is rapidly approaching the ten-year mark. They still can't sell radios to the public without subterfuge. Less than ten percent of US broadcasting stations have deployed IBOC, and yet one of its main selling points is transparent compatibility. In reality, there are solid technical reasons why stations are resisting.

If it had been a new band (and sounded good), the public might have been intrigued, especially if there had been programming unavailable elsewhere. But the HD Radio Alliance had gone to great pains to make it look like a mainstream service by piggybacking it on the analog FM band. It has less marketing appeal than FM stereo did. That's probably why within five years, FM stereo was ubiquitous, even in rural areas.

> So is it unreasonable to expect similar with digital radio, when the
> cost of an HD radio is significantly less than an HDTV?

You can't compare the cost of radio with the cost of television. Comparing apples to apples, we find that so-called HD radios carry a significant higher price tag than analog radios of the same type. If you equalize the quality of the radios, the price differential is even higher.

"HD Radio" isn't competing with analog radio; it is competing with everything else...and it falls far short.

I only had it on approval. It was a lot of fun, and sounded great
on a well engineered radio station, but not practical for crowded
bands. So I elected not to purchase the kit when I returned the rig
to its owner.

We had some 'weather' yesterday/last night.Two MOFO tornados, F1 and
F2.One of them was about ten to twelve miles South of doggy's couch,
uprooted some BIG Trees, damaged some Homes.
NOTHING Scares ME Worst than MOFO tornados!!!

Now, if those MOFO tornados had happened somewhar else, (New York, for
instance or D.C.) instead of backwater hick Missy Sippy,,, it would have
been Instant World Wide Breaking News!

Am I lieing?

> So is it unreasonable to expect similar with digital radio, when the
> cost of an HD radio is significantly less than an HDTV?
.
Conclusion In The End : Both the FCC and the US Congress
Needed To "Mandated" a Digital HDTV Turn-Over Date and
the End of All Analog TV Transmissions.
.
NOTE : That the FCC and the US Congress have NOT
Mandated a IBOC 'Digital' HD-Radio Turn-Over Date and
the End of Analog Radio Transmissions.
-cause- Good or Bad & Bad or Good : HD-Radio [IBOC]
Incorporates both Old Analog and New Digital.
.
IBOC FM HD-Radio Implementation : The FCC Is Planning
For Failure [No Mandated Plan of Action]
.
The-Bottom-Line : The US Congress Has To Empower
The FCC To Implement An IBOC HD-Radio Transition Plan.
.
The First Step {Phase One} is the FCC has to Mandate
that All 'New' AM & FM Radios built for the US Market
are IBOC HD-Radios; and that in itself will force IBOC
HD-Radios : On to Store Selves for Consumers to Buy;
and Into All New Cars & Trucks.
FCC Ruling/Order Issued in Years 2011~12
Implementation by Years 2011~15
[First Build The HD-Radio Listener Base]
.
The Second Step {Phase Two} is the FCC has to Mandate
that All FM Radio Stations with HD2 Channels 'Phase-Out'
their Analog Transmissions with in Five Years.
FCC Ruling/Order Issued in Years 2013~14
Implementation by Years 2013~19

.
The Third Step {Phase Three} is the FCC has to Mandate
that All FM Radio Stations 'Commence' IBOC HD-Radio
'Dual' Analog & Digital Transmissions with in Five Years.
FCC Ruling/Order Issued in Years 2013~14
Implementation by Years 2013~19
.
The Fourth Step {Phase Four} is the FCC has to Mandate
that All FM Radio Stations 'Commence' IBOC HD-Radio
HD2 Channel Transmissions with in Ten Years
FCC Ruling/Order Issued in Years 2013~14
Implementation by Years 2013~24
.
The Fifth Step {Phase Five} is the FCC has to Mandate
that All FM Radio Stations 'Cease' Analog Transmissions
with in Ten Years
FCC Ruling/Order Issued in Years 2013~14
Implementation by Years 2013~24
.
The Year 2025 The First Year of the All Digital Radio Age.
.
-imho- The FCC Has To Bring Order To Chaos ~ RHF
.
NOTE : This Process Covers the FM Radio Band Only
-imho- The AM/MW Radio Band is a completely separate
Issue for the FCC to deal with; and the FCC should first
Focus-On and Fix IBOC HD-Radio Implementation on
the FM Radio Band as the Critical Issue to be Resolved.
.
IBOC : Hey FCC The Future of Terrestial Radio
in the USA is an Expanded FM Radio Band :
That Uses the Former VHF "TV" Channels 5 & 6

I've used a National SW-3 three tube regen for 41 meters, using the 40 meter coils. It was a leading edge receiver in its day, but its day was in 1933, and technology has improved a bit in the last 75 years.

Are YOU using a regen? If so, what?

If you are not using one, but are considering it, realize that the sensitivity is great, but selectivity, stability and hand-capacity effect will leave a lot to be desired; not recommended for a regular diet, but fun to see what our radio forebearers had to live with.

Not since I was about 15 years old. A better question might be who SWLs anymore. The golden years of SW are over. The big broadcasters have shifted to Internet and FM relays. The small ones can't afford SW for its minimal impact. Heck, even Jesuscasters like FEBC have shut down stations.

In my world everything adjusts automatically. My radio clock (mistakenly called an "atomic" clock) sets itself. My personal watch is the analog clock display on my cell phone. My computers all adjust. I guess the only clock I can think of that I'll have to change is the one in my car, which I usually don't look at anyway.

I have an ICE RFI line filter behind all my RF equipment right now,
and for $75 I think it has the desired effect. When the noise floor
is consistently far below the bottom of the S-meter, I am pretty well
convinced that any RFI my radios receive is coming down the coax, one
way or another. I can eliminate about the top 50-80% of this with the
MFJ-1026 and my two existing antennas; if I could duplicate my most
recent effort (the inverted L with 9:1 unun at the antenna and 1:1
Isolator at the radio end), I'd chop off another 10-20% of the RFI and
probably boost many of the signals too (especially 60-120 meters).
The last 10-30% - well, that's just gonna take a DXpedition, I think.

I will humbly disagree.

I SWL. I DX. I QSL. It's still fun :-)

I still do those things... but not so much fun here. :-/ I can log station calls broadcasting in Korean (they use a sort of English for the legal ID's), but I couldn't tell them what it was that I heard (unless of course they happened to be playing some song in English, which they do occasionally). Most of my BCBDX comes from China, Taiwan, Japan and Russia. My most interesting catch is actually pretty close in.. early most mornings I can hear the AFN-AM outlet on 1530 KHz from Seoul while driving in the southern part of the country (Busan/Chinhae). That's a close in skip... about 360 Km as the kimchi crow flies.

In my world everything adjusts automatically. My radio clock (mistakenly
called an "atomic" clock) sets itself. My personal watch is the analog
clock
display on my cell phone. My computers all adjust. I guess the only clock
I
can think of that I'll have to change is the one in my car, which I usually
don't look at anyway.

The one in my Chevy Tracker loses about a minute a week... I could just let
it go, and it would be just about right for the fall setback... (except, of
course, we don't do DST/Summer Time here)

Greetings!
I use the Ten Tec 1253 and enjoy it. I love the knob turning and holding your breath to get and hold the station and hopefully get the ID. I want to put together the Ten Tec 1254 as well. I want to put together other home brew designs that I can find as well. I would love to see someone setup a winter challenge QSLing shortwave stations received only on regenerative sets. It's a funny thing but I always thought it was the other way around.

Spring forward, Fall back

Makes more sense given that we wind our clocks back this Winter after
having wound them forward in the Spring.

Maybe the US does it differently???

That little time piece I bought for a dollar at a Dollar Tree store about a year ago, I used to wear it on the front of my shirt all the time.I reckon the battery in it finally ran down.

We can't change Time.I really do not believe there really is such a thing as Time.So-called 'Time', measuring 'Time' with whatever is only a 'yardstick' to us.So-called Time ('Time') has always existed and will always exist forever more.

Even Atomic clocks can not measure 'Time'.

In about an hour's ('yardstick') 'Time' it will be WOO WOO WOOF! bed 'Time' Time for doggy and I.
You can not catch a Leprechaun either.

Not quite sure why you mention GMT, as that is the time zone we use in
the UK during the winter (Grenwich Mean Time).

Also curious why you put your clock back an hour, over here we put ours
forward one hour for the summer.

Also for those here in the UK, we don't change out clocks until the last
Sunday in march.

Physics not used here : it is special interest groups . They can and
DO twist things around quite a bit .

>Devil's Island . Period .

An enemy? Hell, I built my first regen radio when I was 10 years old. I stung antennas all over creation to the point where my mom got a shock on the metal clothesline I had connected to one of my radios.

I was first in my neighborhood to build a rhombic antenna after something I saw in an ancient copy of "Radio Doings" magazine. I still think a rhombic is one of the most intelligent designs ever made for SWLing.

But that was then and this is now. Oh, I suppose you could tune in SW utility stations and have fun with that, but all the interesting broadcasters left SW years ago. About the only thing left to listen to is the utils.

I happen to still have a Radio Shack DX-440 (aka Sangean 803a), which 23 years later continues to give me good service. But I don't listen to the SW anymore. There's nothing on it worth hearing.

We used to, too. George W. Bush enacted the extra month of daylight time. It begins 3 weeks before it used to and ends 1 week after it used to. Since Halloween always fell on standard time, it was fun as kids to go out in the dark. Now that doesn't happen as Halloween is now on daylight time.

Mexico continues to observe the last Sunday of March to last Sunday of October schedule as we used to, so that's bound to cause confusion. Canada (probably reluctantly) adopted our daylight plan, probably to avoid being crushed when the elephant rolls over....

> Are YOU using a regen? If so, what?

Used to build transistor regens in the 60's - 2N170 based, mostly.
At the time I was worried about building tube circuits 'cuz of the
voltages involved. By ninth grade I was bending chassis out of
1/8" aluminum - heavy stuff - in metal shop, and built my first
tube power supply, and then tried a tube based regen (octal
triode - 6J5?). Something about the tube circuits - they just
seem to have that special something, above and beyond just the
glow of the filaments.

I had an antenna up on the roof of our house - only 50' for so -
of double cotton covered magnet wire - soft drawn - from an old
telegraph sounder, and mostly just DX'ed the broadcast band.

OT, but I amazed myself once by bringing in Los Angeles stations
in Wyoming in the wee morning hours on just a homebuilt 1N34
crystal diode radio, feeding a speaker, no less! Yeah, had to
put my ear up close but the sound was there.

Now I have a borrowed Ten Tec regen, and things just aren't the
same.

George

No, they are not the same . And the lack of those insanely powered
broadcasts by everyone and his grandma is not missed . Gives more room
to hear DX . Propagation permitting , of course .

> Anyone here using a regenerative receiver for their SWLing? I'm just
> curious.

Designed one when I was practically a teenager. As for
SWL-ing, I got that out of my system when I was a ham.

For me, best broadcast band DX was a carrier believed to be
the ABC station in Sydney, Australia and WBZ, both
from Los Angeles. ABC-Sydney currently broadcasts
at 702 KHz. I don't remember if that was the frequency
then, but such a low frequency is advantageous to
very long-range DX without fade. It is possible
to receive the CBC Radio One station serving
Regina and Saskatoon, SK from the Bay
Area. They're at 540 KHz on a 50 KW
xmtr about midway between the two
cities (separated by 160 mi). It is completely
fade free in Regina where I've listened to it.

The receiver was a conventional superhet of my own
design employing all kinds of IF filtering.

As for shortwave, what DX would be meaningful
other than from low power transmitters?

AM DXing in Europe (9-KHz chan spacing) is fun on a car
radio with digital readout where at night, you can pick
out just about every country from the UK to Russia
using a list, or just plain ability to recognize
languages. There are good nights and not so
good nights, just as in North America. The
distance from London to Moscow is 1500 miles,
the same as the distance from San Francisco
to Kansas City.

Hello,

What is your preference with regards to frequency range, loop or vertical whip, etc?

Why you prefer an active antenna instead of passive?

Some makers: DX Engineering, Wellbrook. If you like electronics, there are various building plans on the web for both whip or loop active antennas.

With kind regards,

One of the Houses in Oakland : My Good Old Dad
built a Small Bomb 'Shelter' -circa-1950s
Just a Small 5'x8' Room with 4-Chairs and 2-Cots
Sleeping Bags; Food & Water + Supplies [Radio].
Had a Wooden outside Door with 6~7 Steps Down
to a Metal Door leading into the 6" Concrete Lined
Room in the a Half-Basement.
One thing I Remember was it had an Axe and Pick
inside so we could Chop & Pick Our-Way-Out.
Both Doors Locked and Dad had a Metal Cabinet
inside to Store His Hunting Rifles and Ammo.
Mostly it got used to store Mom's Jars of 'Canned'
Food.
Dad had me 'stay' down there for a Day a couple
of times; just to get the 'feel' of Surviving.
Actually was a 'nice' place to go to escape the
few Summer Days in the SF East Bay.
One Ceiling Light & One Outlet & AM Radio

Sensible places in other words. Daylight saving is one of the most pointless
routines ever devised by man.

On Thursday, March 10th, 2011 at 06:24:53h +0000, David Kaye explained:

> Mexico continues to observe the last Sunday of March to last Sunday of
> October schedule as we used to

Except, according to Wikipedia

As of December 2009, the Mexican Congress gave permission to these
ten northern border cities to synchronize their time to that of
their US counterparts:

Matamoros, Tamaulipas
Reynosa, Tamaulipas
Nuevo Laredo, Tamaulipas
Anahuac, Nuevo Leon
Acuna, Coahuila
Piedras Negras, Coahuila
Ojinaga, Chihuahua
Juarez, Chihuahua
Mexicali, Baja California
Tijuana, Baja California

And I read somewhere that unsurprisingly the Mexican Stock Exchange
observes daylight savings time during the same periods as the rest
of North America.

When I am put in charge, we will have daylight savings all year long and
double daylight savings in the summer. Lots of long summer nights.

Ever thought about just getting out of bed earlier on the mornings?
Newflash - Daylight saving doesn't make the sun stay in the sky longer.

It really is sad that people are such stupid sheep that clocks have to be put forward to fool them into thinking they're getting more daylight when all it actually is doing is making them get out of and go back to bed 1 hour earlier than they would be doing otherwise.

Good luck to him with 21 gauge. Magnet wire is available in 21 gauge,
but I've never seen insulated, stranded wire in 21 gauge.

Allelectronics.com sells wire in normal gauge sizes in small quantities.

Indeed so, but would employers otherwise change the hours of working?

And surely it means less paperwork and confusion for everybody if the clock
its-self is changed rather than having two sets of "opening hours"?

Now if society were completely agrarian and everybody used a sundial ...

"An anonymous source..." is the beginning about half of all news stories.

"Deep Throat," who brought down the Nixon administration, was an 'anonymous source.'

There's not a police department in the world that doesn't have an 'anonymous source' program for gathering active crime information within their jurisdictions, including the FBI.

Anonymity doesn't preclude validity. It only means that the source doesn't want to face censure, persecution or litigation as a result of speaking out.

And if you ask engineers working with iBiquity products, off the record, you'll get a LOT of information about iBiquity's threats against those who speak out against their IBOC system.

You know, Brother, quality products neither need, nor benefit from, enforced silence. And if what iBiquity was claiming for their system were true, they would not have written gag clauses into their contracts threatening dissenting engineers with litigation for speaking out about interference, audio quality or coverage.

The very fact that these clauses were written into the contracts underscores that fact that iBiquity knew that what they were claiming was untrue. And that they knew it from the outset.

Struble sits atop a phenomenally lucrative scam. And the public bears the burden of his hubris with inferiour performance, poorer audio quality, and spotty coverage with frequent dropouts.

Which makes suspect your motives for so shamelessly shilling for this fraud.

Hello,

From the above I assume you have a portable (with or without external antenna input).

With today's interference from electronic equipment, a simple outdoor antenna may give better S/N ratio then the best indoor antenna. Most portables have sufficient sensitivity to work properly with a passive antenna.

A too large/long antenna may result in receiver overload. If so, you will note a strong increase in noise like signals and reception of same station at several positions on the dial (or frequency readout). Longer or larger doesn't automatically means better.

If you need further info, don't hesitate to come back.

I have noticed two things about them recently:

That their IDs do not always come at the hour, or at least as clearly as they do at random times, like :22 past the hour or whenever. You may have literally "just missed" the moments bookending the program when the Station IDs were uttered.

That the last couple of days, they have been running what appear to be canned, long-winded sermons like most of the other religious broadcasters. They remind me strongly of 15190 Radio Africa in that regard. Meaning, station IDs are less common, or may be mingled with the speaking of the preacher, making them less audible.

>Indeed so, but would employers otherwise change the hours of working?

A lot of employers are flexible with working hours these days. Admittedly
not all. And if you're doing shift work it doesn't make any difference.

>And surely it means less paperwork and confusion for everybody if the clock
>its-self is changed rather than having two sets of "opening hours"?

If you want confusion you should see the hoops software has to jump through
to take account of daylight saving. Its not simply a case of adding or
subtracting an hour in a time field.

On shortwave, I *strongly* recommend Radio New Zealand's "Saturday Night Request Show" with Peter Frye, which shows up stateside on Friday nights (International Date Line, dontcha know :-). He runs a several hour long program (RNZI Broadcast begins at 0500Z *beginning* on 11,725 kHz and then switching over to 9,765 kHz at 0658Z onward) that is just sheer old-fashioned joy. Reads letters from folks, takes musical requests by the bushel, anything from opera to country to jazz to pop to big band to comedy to folk. A great program, and Frye is among the most personable people currently on the radio. Great to enjoy late at night and before bedtime :-)

Methinks thou dost fret too much. There are far sadder things in this
world than clock changes.

3124. OT: Something in the air

Newsgroup: rec.radio.shortwave
Date: 2011-03-10 16:13:10 UTC
From: dave <dave@dave.dave>
Message-ID: <4d78f858$0$2307$bd467cd0@news.dslextreme.com>
Source record: 222076

For the first time in human history almost all of humanity is politically activated, politically conscious and politically interactive... The resulting global political activism is generating a surge in the quest for personal dignity, cultural respect and economic opportunity in a world painfully scarred by memories of centuries-long alien colonial or imperial domination... The worldwide yearning for human dignity is the central challenge inherent in the phenomenon of global political awakening... That awakening is socially massive and politically radicalizing... The nearly universal access to radio, television and increasingly the Internet is creating a community of shared perceptions and envy that can be galvanized and channeled by demagogic political or religious passions. These energies transcend sovereign borders and pose a challenge both to existing states as well as to the existing global hierarchy, on top of which America still perches...

The youth of the Third World are particularly restless and resentful. The demographic revolution they embody is thus a political time-bomb, as well... Their potential revolutionary spearhead is likely to emerge from among the scores of millions of students concentrated in the often intellectually dubious "tertiary level" educational institutions of developing countries. Depending on the definition of the tertiary educational level, there are currently worldwide between 80 and 130 million "college" students. Typically originating from the socially insecure lower middle class and inflamed by a sense of social outrage, these millions of students are revolutionaries-in-waiting, already semi-mobilized in large congregations, connected by the Internet and pre-positioned for a replay on a larger scale of what transpired years earlier in Mexico City or in Tiananmen Square. Their physical energy and emotional frustration is just waiting to be triggered by a cause, or a faith, or a hatred...

[The] major world powers, new and old, also face a novel reality: while the lethality of their military might is greater than ever, their capacity to impose control over the politically awakened masses of the world is at a historic low. To put it bluntly: in earlier times, it was easier to control one million people than to physically kill one million people; today, it is infinitely easier to kill one million people than to control one million people.[1]

It's a half-sloper. Why do have a balun? It should match 50 Ohms on each
of the cut sections for the band you cut it for. No balun is necessary.
The 30' ground wire makes it a half sloper.

Source record: 222084

I tune in each night to RTV Mali on 5995 after 0600Z. TWR Swaziland has already signed off, the freq is otherwise clear. Mali's carrier signal gradually grows into a real powerhouse as the grayline overtakes the TX location - last night it was S-9 with no preamps on here in California around 0700, only had the noise suppression peaked on my antennas, signal was quiet and steady - but the darn thing has no modulation, audio at bare limit of detectability. Another Radio Cairo?

What is it with these lo-performance Saharan African stations? Somebody give them an Astatic T-UG8 D-104 mike to juice up their sidebands, please!

There's some guy on 9980 all day long. Sound's like Glenn Beck with a hillbilly accent.

Regenerative receivers can destroy other peoples' reception. Always use an RF buffer in your front end.

Well, you won't hear Antioch unless you live within 1 or 2 blocks of his
house.

From his web site (radio.macinmind.com)

> The AM transmitter is a micro-power part15 AM RangeMaster1000
> transmitter. Our house is in the middle of town where the houses are
> densly spaced. Range is about 1/2 mile...

99.999% of his listeners are on the internet.

Not sure about the other 3 stations you list.

A few months ago, Animal Medical Center checked doggy's blood sample, it all checked out ok.On Wednesday afternoon, March 2nd, when I went there to pick up doggy, (teeth cleaning) they set an appointment for doggy on March 16th, something about elevated liver level, something like that.Doggy is going back to Animal Medical Center next Wednesday, be there at 9:00 AM.Doggy has been taking antibiotic meds twice each day, big pills, I crunch them up and mixed it up in a bowl with a little bit of milk and a cookie.She finished the last med/antibiotic this morning.

Peter,

You certainly have figured out this fraud. I too have read stories on the Web about iBiquity threatening enginers that speak out against HD Radio. One broadcaster said iBiquity "mildly threatenened" him to convert. I believe iBiquity has this as a "best-practices" clause in their contracts. This should have been a huge red-flag to stations that have converted. Of cource, if iBiquity's product was any good, this clause would have never appeared. I do hope that Keefe Bartels and Galax Wolf make good progress with their investigations, as class-actions would certainly derail Struble and his minions. The degree of this fraud would make Bernie Madoff blush, and probably jealous. Automakers are receiving nothing but complaints about HD Radio. I believe that HD Radio will eventually implode, but iBiquity is probably hoping for an IPO before the truth finally comes out. There will be no mandate for HD Radio, because there are no reclamation needs of spectrum, as there was for digital TV. So, iBiquity is threatening all of those stations that have turned off IBOC? Interesting, but not surprising...

Notice that SMS derailed this thread from appearing in alt.radio.digital and rec.radio.shortwave.

They were talking about putting the clocks 2 hours forward here, as
apparently they reckon it would help tourism. I'm not sure why, as we
already get plenty of light in the evenings during the summer. In June,
sunset doesn't come until about 9:00 pm, and it's still fairly light
until almost 10pm.

Putting the the clocks forward 2 hours would mean, in June, it wouldn't
get dark until about 11pm, and it would be even later in Scotland as
they are both further North and further West.

Richard E.

That's what I think. If people want more daylight in the evenings, there
is nor particular reason why they can't just get up earlier. No need to
force the rest of us to do the same.

Richard E.

"Ibiquity's "Gag Order" on engineers"

"This was documented in another thread. I've encountered this before in my career. Usually - it was to protect some "golden boy" - maybe the boss's nephew or something. Anybody daring to demonstrate that golden boy was incompetant was ushered out the door in short order. Or - when golden boy inevitably goofed up - the one who pointed out his mistakes was deemed the one to blame. Other times, a gag order is because there is a lot of money to be made - by somebody powerful. Everybody knows the project will fail, but they are told to keep quiet until somebody has cashed in their stock options and left. I have heard of cases where physical harm was implied to anybody who spoke out too soon. HD radio has all the earmarks of the second scenario. Since there was a gag order - you can bet there are technical issues we haven't even heard about yet. Ibiquity - you can stick a fork in them, they are DONE. At some point, the people in the company with the most to gain financially are going to sell their stock and retire somewhere exotic, out of reach of US law. Their legacy? Broadcast bands in shambles, radio manufacturers with warehouses full of unsold HD radios, stations with an orphan system that is unsupported. Listeners with buzzing in their ears. But - it will have made a few people very rich. Shouldn't we all be happy about that?!"

Source record: 222101

Dani Zweig, authority on Keith Laumer, has announced a lawsuit against Experian.

She claims Experian improperly sold her personal credit data to Marauder Corporation operated by former male escort, Ryon Gambill.

We've said for several years that a collector in California by the name of Ryon Gambill, operating under the name of CPS and Marauder was using the credit bureaus as a tool for extorting monies he was not owed or entitled to from consumers. We published a site called marauderexposed and asked consumers with Marauder on their credit reports to contact Experian Information Services directly. We provided the Experian contact name and number.

Every consumer who responded back to us after talking with Experian told us there was no interest in stopping Ryon Gambill, that he was the paid subscriber and the consumer was giving Experian nothing.

Now, a well thought out law suit takes on Experian and is asking for a CLASS ACTION status. You can read the suit by downloading the file from www.marauderexposed.com

You can build one for a few dollars. You can use an Op Amp, a paper
towel roll, a couple of pots and a tuning capacitor, some wire, and like
that there.
```

Sorry but I already know a fair bit about Nyquist and Shannon. I know that HD-Radio is a long way short of the Shannon Limit, unlike something like DVB-T2 which is much closer to Shannon's Limit and far more efficient than HD-Radio.

I also know enough about codecs to know that no known codec can make music sound good when encoded at only 40kb/s. This is true over here in the UK, so it must also be true over there in the US.

Richard E.

Well said.

Remember, the faster the IBOC scam goes broke, the faster we are
likely to get real digital radio in a dedicated band, which -- if
it's done right -- has great potential for superb quality, excellent
coverage, new content many times greater than what we now have, and
new avenues for freedom of expression.

With every good wish,

Kevin Alfred Strom.

That's hilarious.

The "big advantage" is that there will be no more interference to AM
and FM -- once AM and FM are forced off the air!

Anyone seen the Mad Hatter?

Do you know what happened to a lot of people's personal Shortwave Radios in World War Two? I Know.

I was fixin to get back up in my attic,putting down two feet by eight feet sheets of plywood over those ceiling rafters up there.I quit working up there when the weather got cold, that cold air coming through those roof vents on the sides up there,,, Frosty mannnnn, Frosty!
I need to get finished with that up there so I can move a hell of a LOT of my old thingys up there, some of my (over 300) old radios up there too.

But, What Every Woman Knows, old 1934 Scottish movie, has popped up on the TCM channel.My attic will have to wait a while longer.

Adjusting one's schedule can have some benefits. I look forward to
additional daylight and warmth following my workday to get in that
daily bicycle ride. OTOH, it does nothing for amateur astronomers and
only makes us DXers stay up later.

The summer here doesn't do amateur astronomers any favours. In June the sky never gets completely dark. I once got home at 1am in mid June, and looked up to see a dark blue sky. Apparently in Northern Scotland it doesn't get any darker than twilight.

Oldtime radio has a very very very limited audience. I remember a station in Portland that used to run this stuff and the Arbitrons looked really strange. The audience was nearly 100% male, ages 12 to 17 and 60+ with nothing in the middle. This was in the pre-Internet days, so I suspect the 12-17 age group has dropped off and the 60+ has now become 90+. Seriously.

LIstening to this stuff it just doesn't hold up.

Same thing with silent movies. I was going to go to the Balboa Theater's 85th anniversary party last Sunday night in San Francisco, but I saw there was some obscure Rudolph Valentino silent movie on the bill. I realized that I really hate silent films. Now that we have sound and better production techniques, and better acting for that matter, the stuff is really rank.

Well, oldtime radio is like that. Some things like the old Jack Benny shows hold up, and Fred Allen does a little, but Jack Armstrong is garbage, even Burns and Allen did not wear well. Gunsmoke comes out pretty well, tho.

This is what they did in the former USSR. Also, there were times when the U.S. was on DST continuously. Once was during the Ford administration I believe. It had something to do with saving fuel or some such nonsense.

The thing about DST is that everyone changes their schedules. Unless you're a hermit you're interacting with others and with businesses, so DST works well.

I disagree with your take on silents. Watch a silent Keaton or a
Lloyd comedy, and they hold up REALLY well. These guys are not
considered timeless masters for nothing. "Sunrise" is clearly one of
the greatest films ever made...magnificent acting and a fable-story
that leaves the viewer exultant at the end. There are plenty
more...and they rely on stories and character instead of fluff, just
like the best of today;s films. Not all are great, but let's face it
- neither is 96% of the junk that comes from Hollywood now either.

Lum and Abner has kind of minimalist Zen aura about it, and it still
works.

And the Goon Show is still insanely funny.

All the best,

Kevin, WB4AIO.

Those are good goals, but the reality is that the existing broadcasters, both large and small, are dead set against such a dedicated digital band so it will likely not happen. They do not want to have to purchase additional spectrum and have new competitors.

The whole reason IBOC came to be is because they needed buy-in from existing broadcasters and the FCC on a digital scheme that would allow a transition from analog to digital without creating a new digital band.

A friend once had a Hallicrafters S-119 Sky Buddy II. A very cool
little radio. It was really hot on MW but I think it had images. I'd
love to have one just for that old time analog ambience.

I'll second the TenTec kit. Compared to other kits especially.
Here's a list http://www.ac6v.com/kits.htm
Also, check MFJ, maybe Velleman??
Google found this http://www.mtmscientific.com/swradio.html

There are some "toy" type kits, I can't say if those would be worth the
trouble.
I just remembered I have a Heathkit GR-81, it works fine. There would more
older regens on eBay
Shortwave radio has been reduced to a novelty. If you want SSB then just try
a Sony portable. Then you could re-sell it on eBay if you change your mind.

Most people don't have control over their work schedule. Daylight
savings does give them an extra hour of daylight.

But if they got up an hour earlier, they could get some stuff done
before going to work. Hence benefit from an extra hour of daylight.

Myself I use an Ameco TPA as opposed to the MFJ-1020C(had) ... Just seems to work better. The case is plastic so you may want to add some type of weight inside to keep it in one spot when tuning. Some have added interior shielding as well but seems to work fine for me the way it is.
The MFJ-959B is good as well as an older Grove tuner/amp that I have.
Myself and a few others have not had any luck with the MFJ-1024 outdoor amp.
The Palstar AA30 isn't even reviewed on Eham net.
The following should help you decide.
http://www.eham.net/reviews/detail/3810
http://www.universal-radio.com/catalog/sw_ant/1512.html
http://www.mtechnologies.com/ameco/othel.htm
http://www.amecocorp.com/electronic.html
http://www.dxing.com/tips.htm
http://forums.radioreference.com/hf-mw-lw-general-discussion/127396-mfj-1020c-indoor-active-antenna.html
Just remember you will most likely be amplifying a certain amount of RFI along with the chosen setting. That's why it so important to find that sweet spot (area of the house or property less affected by RFI). A quick walk-around with a portable tuned to the SW band will soon locate the area of least man made noise. For me it's the centre of the kitchen, nice clear reception. The rest of the house sounds like it's raining RFI. My outdoor antennas are another story.

Some people may be surprised to hear that the UK is on the same latitude
as Canada. It's a lot milder here however because we have the Golf Stream.

Richard E.

Definitely an interesting little entry level radio, but a superhet, not
a regen.

And yes, it does have images as it is a single conversion receiver (455
kHz I.F.).

10.) You take a week off to protest in Wisconsin and your office runs better.

9.) On a snow day, when they say “non-essential” people should stay home you know who they mean.

8.) You get paid twice as much as a private sector person doing the same job but make up the difference by doing half as much work.

7.) It takes longer to fire you than the average killer spends on death row.

6.) The worse you do your job, the more your boss avoids you.

5.) You think the French are working themselves to death.

4.) You know by having a copy of the Holy Koran on your desk your job is 100% safe.

3.) You spend more time at protest marches than at church.

2.) You have a Democratic congressman’s lips permanently attached to your butt.

And the #1 way to tell if you might be a member of a public sector union:

1.) You pay more in union dues than you do for your healthcare insurance....

"All Government employees should realize that the process of collective bargaining, as usually understood, cannot be transplanted into the public service. It has its distinct and insurmountable limitations when applied to public personnel management. The very nature and purposes of Government make it impossible for administrative officials to represent fully or to bind the employer in mutual discussions with Government employee organizations. The employer is the whole people, who speak by means of laws enacted by their representatives in Congress. Accordingly, administrative officials and employees alike are governed and guided, and in many instances restricted, by laws which establish policies, procedures, or rules in personnel matters."

"Particularly, I want to emphasize my conviction that militant tactics have no place in the functions of any organization of Government employees. Upon employees in the Federal service rests the obligation to serve the whole people, whose interests and welfare require orderliness and continuity in the conduct of Government activities. This obligation is paramount. Since their own services have to do with the functioning of the Government, a strike of public employees manifests nothing less than an intent on their part to prevent or obstruct the operations of Government until their demands are satisfied. Such action, looking toward the paralysis of Government by those who have sworn to support it, is unthinkable and intolerable."

The LIBERAL FASCIST Path to Socialism:
Pt.1 http://www.youtube.com/watch?v=fPyoEbU_wc4
Pt.2 http://www.youtube.com/watch?v=Dvuxr7v4xzk

"Just as the Left was drawn to the communist killing machines of
Lenin, Stalin, Mao, Pol Pot, and Castro, so too it is now attracted to
radical Islam."

"The contempt that German Hitlerytes had for "Bolshevism" or "marxist
Jews" generally should also not mislead us in assessing the similarity
between National Socialism and Communism. Leftist sects are very prone
to rivalry, dissension, schism and hatred of one-another. One has only
to think of the Bolsheviks versus the Mensheviks, Stalin versus
Trotsky, China versus the Soviet Union etc. Similarity does not
preclude rivalry. Hitler and Stalin were literally brothers in arms
BEFORE they became rivals. That socialist brothers sometimes fall out
should not prevent us from noting the brotherhood concerned."

[...]

"The fundamental dogma of all brands of socialism and communism is
that the market economy or capitalism is a system that hurts the vital
interests of the immense majority of people for the sole benefit of a
small minority of rugged individualists. It condemns the masses to
progressing impoverishment. It brings about misery, slavery,
oppression, degradation and exploitation of the working men, while it
enriches a class of idle and useless parasites."

"This doctrine was not the work of Karl Marx. It had been developed long before Marx entered the scene. Its most successful propagators were not the Marxian authors, but such men as Carlyle and Ruskin, the British Fabians, the German professors and the American Institutionalists. And it is a very significant fact that the correctness of this dogma was contested only by a few economists who were very soon silenced and barred from access to the universities, the press, the leadership of political parties and, first of all, public office. Public opinion by and large accepted the condemnation of capitalism without any reservation."

[...]

Dr. Ludwig von Mises - http://mises.org/midroad.asp

[...]

"The term 'planning' is mostly used as a synonym for socialism, communism, and authoritarian and totalitarian economic management. Sometimes only the German pattern of socialism-Zwangswirtschaft-is called planning, while the term socialism proper is reserved for the Russian pattern of outright socialization and bureaucratic operation of all plants, shops, and farms. At any rate, planning in this sense means all-around planning by the government and enforcement of these plans by the police power. Planning in this sense means full government control of business. It is the antithesis of free enterprise, private initiative, private ownership of the means of production, market economy, and the price system. Planning and capitalism are utterly incompatible. Within a system of planning production is conducted according to the government's orders, not according to the plans of capitalists and entrepreneurs eager to profit by best filling the wants of the consumers.

"But the term planning is also used in a second sense. Lord Keynes, Sir William Beveridge, Professor Hansen, and many other eminent men assert that they do not want to substitute totalitarian slavery for freedom. They declare that they are planing for a free society. They recommend a third system, which, as they say, is as far from socialism as it is from capitalism, which, as a third solution of the problem of society's economic organization, stands midway between the two other systems, and while retaining the advantages of both, avoids the disadvantages inherent in each.

"These self-styled progressives are certainly mistaken when they pretend that their proposals are new and unheard of. The idea of this third solution is very old indeed, and the French have long since baptized it with a pertinent name; they call it interventionism. Hardly anybody can doubt that history will link the idea of social security, more closely than with the American New Deal and with Sir William Beveridge, with the memory of Bismarck whom our fathers did not precisely describe as a liberal. All the essential ideas of present-day interventionist progressivism were neatly expounded by the supreme brain-trusters of imperial Germany, Professors Schmoller and

Wagner, who at the same time urged their Kaiser to invade and to conquer the Americas. Far be it from me to condemn any idea only on account of its not being new. But as the progressives slander all their opponents as old-fashioned, orthodox, and reactionary, it is expedient to observe that it would be more appropriate to speak of the clash of two orthodoxies; the Bismarck orthodoxy versus the Jefferson orthodoxy.

[...]

Dr. Ludwig von Mises - 1952 - http://mises.org/books/planningforfreedom_mises.pdf

The origins of the modern left can be traced back to the famous passage in Rousseau's Discourse on the Origin and Foundations of Inequality, in which he condemned the institution of private property:

"The first man, who after enclosing a piece of ground, took it into his head to say, 'this is mine,' and found people simple enough to believe him, was the real founder of civil society."

Added Rousseau: "How many crimes, how many wars, how many murders, how many misfortunes and horrors, would that man have saved the human species, who pulling up the stakes or filling up the ditches should have cried to his fellows: Beware of listening to this impostor; you are lost, if you forget that the fruits of the earth belong equally to us all, and the earth itself to nobody!"

Around the 1830s, a faction of French liberals gravitated toward Romanticism and the philosophy of the late Rousseau, proclaiming that capitalism, private property, and the increasing complexity of modern society were agents of moral decay -- both for the individual and for society at large. This is essentially the worldview that has made its way, through history, into the collective mind of the modern left; it is a worldview calling for a revolution that not only will topple the existing capitalist order and punish its corrupt leaders, but that also will replace that order with a socialist regime where the utopian ideals of perfect justice and equality will reign. Such an ambition can be put into effect only by a totalitarian state with the authority to micromanage every facet of human life, precisely the end-point toward which the policies and crusades of the modern left are directed.

When the term "liberalism" (from the Latin word liberalis, meaning "pertaining to a free man") first emerged in the early 1800s, its hallmarks were a belief in individual rights, the rule of law, limited government, private property, and laissez faire economics. These would remain the defining characteristics of liberalism throughout the liberal epoch (generally identified as the period of 1815-1914). Yet the modern left, which portrays itself as the agent of enlightened commitment to "liberal" causes, in fact stands for the antithesis of each of the foregoing liberal ideals. Contrary to its self-definition,

the left is neither “liberal” nor “progressive,” but rather a
reactionary force that seeks to resurrect the traditions that
characterized the epoch which preceded the rise of classical
liberalism.

http://www.discoverthenetworks.org/viewSubCategory.asp?id=1217

The following is from The World Book Encyclopedia, 1947 edition:
The chief characteristics of Fascism are as follows:

THE CULTIVATION OF IGNORANCE

Fascism, like all forms of government, rests firmly on the sincere
consent of a large part of the population... To maintain this consent,
the Fascist leadership must cut off the people from any information
which might cause them to doubt the complete correctness of the fixed
Fascist principles... All forms of communication are carefully
censored, so that the public will receive only those facts that the
dictators want known... Travel to other countries must be controlled,
and freedom of speech and assembly must be rigorously suppressed...

http://www.americanthinker.com/blog/2010/10/arrest_warrant_filed_for_rahms.html
http://www.youtube.com/watch?v=sce0TLA5UYE
http://bigjournalism.com/dloesch/2010/10/13/exclusive-cbs2-reporter-threatens-journalist-o
ver-rahm-questioning/

SUPPRESSION OF LABOR AND INDUSTRY

Fascism in Italy and Germany at first won the support of the wealthy
classes, both landed and industrial...

http://www.discoverthenetworks.org/individualProfile.asp?indid=977
http://www.discoverthenetworks.org/viewSubCategory.asp?id=589
http://www.keywiki.org/index.php/George_Soros

These people saw in Fascism a protection against the demands of
farmers and other workers... Both regimes at first upheld the rights
of private property... They subjected the working classes to a
rigorous discipline... As soon as they were firmly established, the
dictators began to limit profit, impose capital levies, and regulate
business in great detail...

Employment Rates under Liberal Fascism
http://www.youtube.com/watch?v=9ssIhiD8kKM

.....sound..familiar?.....

THE POLICE STATE

Fascism depends upon the police to crush all opposition or dissent.
Secret police spy on the whole population, and any casual remark
against the regime leads to swift and severe punishment... Opposition
parties are dissolved. Intellectual, athletic and recreational
organizations are usually brought under the control of the Fascist

authority... The ruthlessness of the police gradually becomes less noticeable... This is because within a year or so after a Fascist government takes power, vigorous opponents of the regime have either left the country, been killed or jailed...

LIBERAL FASCIST union thugs trying to upend the results of Wisconsin elections by force.
http://www.jsonline.com/news/opinion/116355379.html

Read more:
http://www.chicagonow.com/blogs/publius-forum/2011/02/teachers-union-thugs-comparing-people-to-hitler-shutting-down-schools-losing-their-argument.html#ixzz1EGR2iKwW

(Both Fascist and Communist leaders make use of the police state... Every absolute government has used the police state to some degree... It was highly developed among the ancient Assyrians...)

.....sound..familiar?.....

EXTREME NATIONALISM

Fascism is highly nationalistic... It tries to identify its principles with the country, so that disagreement will look like treason... Some other country, or some group within the country, is chosen to serve as the "enemy" and made to appear as the cause of all evils or misfortunes... For example, the Nazis in Germany represented their movement first as a crusade against the Jews, then as a fight against Communism and later as a struggle against the "attacks" from whatever neighboring country they wished to subdue or occupy... Extreme nationalism often becomes a kind of racial fanaticism... Sometimes it combines racial and religious bigotry...

When you hear the Liberal Fascist JackAss propaganda that THEY are the true patriots then you know the time is near. Look for it from the socialist Labor Unions such as the SEIU!
http://www.discoverthenetworks.org/groupProfile.asp?grpid=6535

MILITARISM

Fascism maintains among the people a permanently warlike frame of mind... Every citizen feels that he is mobilized against enemies of the regime from within, and against possible foreign foes... The dictator usually comes to power during a period of economic crisis or depression... He relieves the depression partly by employing many people in the making of armaments... To justify this procedure, he must convince the people that the country is threatened, and must point toward some of the enemies against whom the armaments may be needed...

Listen to 0baMa0's rhetoric and his fascistic support from the Liberals
.....sound..familiar?.....

Here are the Three (3) Phases of Liberal Decay into Fascism:

1. Liberalism (Well Meaning, Nice Sounding, "Do-Gooder" Policies
Always Doomed to Fail)

2. Liberal-Progressivism (The Drive for Social Improvement through
Change and Promising Hope;
More Draconian Liberal Polices are Implemented to Transform The People
into a New Society that
Is Guided by 'The Party') The Party Elite Have Complete Power and Rule
Un-Checked.

3. Liberal-Fascism (The Rise of the Party Leader over 'The Party'
Ensuring the Unity and Uniformaty of 'The Party' and Enforcing The
Will of 'The Party' Over the People.) The Party Leader will Cleanse
'The Party' of All those Who Are NOT of 'The Party'; and 'The Party'
Will Cleanse the People of All Those Who Do NOT Support 'The Party'
and The Party Leader. The Party Leader Now Has Complete and Total
Power and Rules by the Force of His Iron Will.

Brother/Sister Are You "OF" 'The Party' ?

Does The Teaching Of 'The Party' Abide Within You ?

Does The Thoughts Of 'The Party' "Leader" Guide Your Thoughts ?

Let 'The Party' Change Your Life and Transform You !

Let 'The Party' Give You Hope and Renew You !

When you vote cut them off at the knees from your Tax Dollars.
Vote with your wallet.

Parts of Britain are as far north as southern Alaska. When I visited Inverness one May there was still considerable light in the sky at midnight.

People in the contiguous 48 states are often unaware of how far to the south they are compared with Europe. Minneapolis, Minnesota is further south than Venice, Italy.

With best wishes,

Kevin Alfred Strom.

It is not about getting stuff done. I get up between four and six most mornings. I like getting up early.

It is about spending wonderful summer evenings playing with the kids. I don't know what the weather is like where you are, but here in Silicon Valley, we have perfect evenings for six or seven months of the year. It is pretty good, most of the rest of the time. Too good to waste.

Phil

Well, it is south of Verona and Milan. Not to be contrary, but on
average, Minnesota is a bit north of Italia. More on par with
France...but I nitpick.

People think of north as cold and south as warm. That's why Minnesota
and Maine are "north", the Riveria and Italy are "south" - but there's
a lot more to climate than latitude. Direct sea influence (water
temps and current heat transfer), indirect sea influence
(continentality), elevation and humidity all play a role. Minnesota
has a very high degree of continentality whereas Italy has almost
none, being right on the sunny Mediterranean.

Kilimanjaro, Mauna Loa and Aconcagua, in the midst of the world's
warmer climes, get snow year round. Such a puzzle! :-)

Look on a map at the Northern tip of West By God Virginia.Wayyyyyy up there between Ohio and Pennsylvania.

Doggy and I are further North than some Yankees are.

In 1966, the temperature in Corinth,Mississippi got down to nineteen degrees below Zero.Sometimes, it gets damn Cold down South.

Any loud clicks or test tones at all ? They may be adjusting/upgrading the station . Who knows . They certainly can't afford expensive stuff , unlike some of the neighboring countries in that part of the world .

What radio are you intending to use ? Many receivers (even very dear ones) don't agree with Active Antennas due to insufficient (or absent) pre-selection plus low dynamic range : 'anemic' front end is NOT that rare at all .

OK, Steve - I'm not sure everyone else here got it. But I did. Yup.
My GMT clock is one hour behind in the summer. But it's because my
local clock is ahead. GMT (or - what is it now - "Coordinated Universal
Time"??) is one of the few time designations that stays the same.

It's interesting that the rest of the world has developed means of
adjusting things - software in our PC's, routers, and even the
transmitter control boxes that switch to nighttime patterns when
necessary (this is a broadcast group, after all). Most all of them keep
time internally through some means of syncing to GMT, but change the
display info for the benefit of us humans.

We can complain all we want about this, but it's kinda funny how
technology has adapted - or not - when you think about it.

Dave B.

Reminds me of someone I used to work with . This Cat used to CHANGE the time in the punch clock by removing the glass and moving the hands as much as he felt like ! He was the morning shift , I was the afternoon. . . Didn't take too long for the owner to find something fishy with all those 'extra' hours worked by the morning fellow . So he welded thick metal wire OVER the glass and that kind of solved this problem . So this CAT immediately came up with something new , don't remember exactly what he did . This was many moons ago .

And presumably no clocks either so how exactly does that relate to DST?

Roy IS the messed up editor..

But... you've never heard of wind up clocks? They were actually all the rage
well into the late '60's.

OK so if you are using a Shortwave 'portable' Radio
and require an indoor Shortwave Antenna
-then-
Sony AN-LP1 "Portable" Loop Active Antenna
http://cgi.ebay.com/140519324821
http://www.universal-radio.com/catalog/sw_ant/3676.html
.
-or--read- The In-Door Shortwave Listener (SWL)
Antenna -with- An Out-Side Antenna Element
http://groups.google.com/group/rec.radio.shortwave/msg/80a916f4cc134e1d
.

When I go to the cabin in the north woods, I leave my watch in
Chicago.

Bucolic is good.

Until the bear tries to get into the living room.

Union gigs pay very well. My best years were at NBC as a member of NABET (CWA). I think the union dues are deductible, too.

I don't think $273/day +$50 per diem in lieu of benefits is out of line for a company that charges $10,000 for a 30 second commercial.

> People think of north as cold and south as warm.

Strangely in parts of Europe it is the opposite way around,
because one is travelling further away from the coast which
is warmer due to the effects of the Gulf Stream.

For example, in the winter it may be quite mild in Brussel
(no snow, or even ice) but heading south the temperature
drops and there can be lots of snow on the ground south of
Namen and beyond. And continuing further south and east
eg to Metz and Strassburg, even further away from the coast,
the temperatures are even colder again.

A similar effect can be observed travelling east provided one
is not staying parallel with the coastline.

I wish - all I hear for two hours between 0600 sign-on and 0800 is a
nearly dead fairly strong carrier. It's a 100-kW transmitter
according to WRTVH and Aoki, which in terms of sheer power appears to
be working well.

3278. Latest Liberty Net via WB4AIO

Newsgroup: rec.radio.shortwave
Date: 2011-03-11 15:55:18 UTC
From: Kevin Alfred Strom <kevin.strom@revilo-oliver.com>
Message-ID: <201103111555.UTC.ildgl7$n1b$1@tioat.net>
Source record: 222231

Liberty Net: March 5, 2011

http://3950.net/2011/03/liberty-net-march-5-2011/

by Kevin Strom, WB4AIO

CONDITIONS WERE EXCELLENT for the first March session of the Liberty Net this week, and a wide variety of views were presented, sometimes passionately, on subjects as disparate as the union conflicts in the Midwest and animal rights.

Hereï¿½s a sampling of whatï¿½s on this weekï¿½s recording:

ï¿½ A sane and representative government would rescind NAFTA and other ï¿½free tradeï¿½ agreements which force our workers to compete with slave-labor Third World peons. Instead, though, such agreements are being aggressively expanded. (48 minutes)

ï¿½ Why are some jurisdictions outlawing all photography of police activities? What are they trying to hide? Isnï¿½t photography ï¿½ and the publication of said photography ï¿½ protected by the First Amendment? (1 hour 45 minutes)

ï¿½ You canï¿½t take pictures of ï¿½law enforcementï¿½ or you go to jail ï¿½ but they sure as Hell are taking pictures of you: from body cameras, from their cars, from street cameras, from cameras hidden in pole pig transformers (and many other places) ï¿½ even going so far as to X-ray your vehicle and your person without your knowledge. (1 hour 53 minutes)

ï¿½ In New Jersey, police agencies have a mandate to hire ï¿½minoritiesï¿½ as police officers even if their scores are as pathetically low as the sixth percentile. Whites with scores as high as the 98th percentile are rejected to achieve such ï¿½diversity.ï¿½ (3 hours 42 minutes)

ï¿½ It is a great tragedy that so many of our young people are forced by bad economic times to risk their lives in the illegal, murderous wars for Israel in the Middle East ï¿½ and it is doubly tragic that they are brainwashed into believing that they are ï¿½defending our freedomï¿½ by doing so. (4 hours 10 minutes)

ï¿½ Eleven states are now considering alternative currencies that would operate in competition with the illegal Federal Reserve. The states want to have a working currency in place well before the often-predicted failure of the Fedï¿½s ï¿½dollar.ï¿½ Utah is considering making gold and silver coins an officially recognized currency

there. (4 hours 18 minutes)

ï¿½ The producer of The Money Masters has now produced a new film, The Secrets of Oz, which exposes the amazingly simple methods by which the bankers steal our personal and national wealth. (4 hours 54 minutes)

ï¿½ Is Obamaï¿½s Caligula-like partying while an unprecedented number of Americans have lost their homes a deliberate provocation engineered by his handlers? (5 hours 1 minute)

Remember that you can find the Liberty Net in the upper part of 75 meters (lately it has been consistently higher than 3950 kHz) every Saturday night at 10PM Eastern Time ï¿½ join in, or listen live on the Internet via N2SAG or N2IRJ, or listen at your leisure via the mp3 files posted here at http://3950.net every week. Usually the new recording is posted early on Sunday. It will be visible at the top of the upper right column of every page of this site.

Once again, thanks to W1WCR for running this important and historic discussion net, and thanks also to N2IRJ for making these recordings available.

Surprised they didn't continue. In WW I to feed the troops, brewers
had to cut the amount of grain used per pint, and British beer has
been low alcohol ever since.

you already see it. the original poster is getting ever more shrill,
posting under another alias(he has another one for sure, i am sure we
will see it soon), posting stuff that proves he is a fascist, then
trying to project that onto others. lets remind him that reagan was
once the president of the actors union, and that he supported gasp,
FDR:)
i am sure that ronnie saw how the fascists and communists hated labor
unions during the 1930's. and he remembered that when he made that
statement.

What I meant was Saudi Arabia should be On-the-Air
across the Shortwave Bands 24&7 with Prayers from
the Holy City of Mecca with an S9+10 Signal :
Like China's [PRC] China Radio Intenationa {CRI} is...

all allah alla the day long ~ RHF
.

One other item I've tried and have had fun with is the Radio Shack
amplified shortwave antenna 20-280. Just a little plastic thing, but
it does the job. Again, it can pick up RFI so you have to find a
quiet spot for it - but as remote port-a-tenna it's a blast.

This is basically a PL-380 in a big cabinet, with 2 speakers and longer ferrite and telescopic antennas.

I've been through a number of the Tecsun DSP-based portables, and this model appears to accumulate most of the positives and few of the negatives.

It lacks the objectionable strong soft-mute action ("reverse AGC") of the PL-310 and PL-606, while retaining the excellent sensitivity of the PL-380 on SW. The slightly larger cabinet size allows for larger antennas that remedy the PL-380's mediocre sensitivity on MW and FM.

In all, I agree it's a winner. If it had SSB/Sync and RDS, it'd be the best portable around in a very long time. Unfortunately, there doesn't seem to be anything coming down the pike from Silicon that implements these functions.

You're allowed to try to fix them; even if you destroy it in the process you don't void the warranty. You can call the guy who designs the shit and ask him questions (try doing that with Kenwood).

Man, if MFJ had been around when I was a kid my whole life would've turned out different. They make some cost-effective fun stuff.

>whistles. I'll do a short review of that one as well.

Despite similarities in size, the PL-660 is an entirely different animal.
In my "RF Alley" area, the DSP-based rigs are much more resistant to
overload and mixing products from local blowtorch transmitters.

Tecsun seems to be still tweaking things in this model in response to
postings on their Chinese BBS. The third production run has most of the
bugs and poor implementation stuff ironed out, but from reports some still
remain (e.g. there is great disparity in audio level between FM and AM
detectors). One wonders what variety Kaito USA is selling.

Still, the PL660 is a versatile performer. It uses the same sync detector
chip that the Sony SW7600 family uses, and has been one of the features
that worked as designed even from the get-go.

My 'GymyBobism' collection...updated daily:
==========
some '#' bracketed text added for clarification
all cut and paste, NO modifications of ANY kind
100 % Pure GymyBob. Accept no substitutes!

We need less morons like another clone of Moron II here.
My fifteen minutes of FAME!

Your car alternator will charge your car batery up to 15.4 volts in
cold weather.

NTSC redefined it slightly off 60Hz so that power supply ripple
will move on the screen (two slightly black bands that scroll
up/down your screen

You sure spent a lot of time trying to convince me you don't knwo what
I am talking about...LOL

Voltage does not indicate state of charge well.

At 11.6 volts a 12v battery is about 50-70% charged still.

Polish solar panels are what americans called "flashlights"

There should be subsidies for solar panels but control of prices to boot.

Propane will disapate and freeze when it evaporates.

Gasoline is not nearly as volatile as hydrogen.

When I use pot I imagine everythging is perfect.

Many people have browsers that economize the download

Just another threading error creating confusion

Learn how to thread or sit back and watch for a few years.

Try to stay on topic and on thread too bean brain.

Perhaps try Outlook Express or another browser that knows how to
thread posts.

Bottom posting was the was in the 70s and 80s before threading
browsers were available cheap like OE

Another Forte Agent person that doesn't understand threading.

You use Mozzilla and haven't learned to thread.

Try Outlook Express so you can understand threading maybe.

I have been noticing many threading errors everywhere on Usenet lately.

People with OE don't seem to have the petty problems with subject
lines changing, intermingled posts and downloading binary files with
mixed posts, random pieces and many other problems all the nonOE
people have.

Bottom posting has been obsoletely by threading browsers.

Forwarding does not include headers.

Call your damn ISP and tell them your browser is multiple posting.

90% of the people in America have never operated a computer.

Let's say youre solar cell was trying to put out
14.3 volts DC and you stuck a 10 ohm meter in series with a charged
13.8 volt DC battery.

Your troll was too obvious. Try to engage the mark in conversation
first so there is, at least, some stake, like friendship for the
person listening. When the friendship is well developed then attack.
Not too obvious at first or you will lose your audience. This will
enhance your troll points.

I think outside opinions are worth much more than sales hype from the
company that made the product.
Referring to *factory* charging specifications for the batteries
they make ##

This is power grid induction through capacitive proximity

You can get fooled with another ground in the house finding it's way
back to the transformer neutral.

A thought I have is rain water from a roof on a three story home
through a micro-turbine.

Setback thermostats only work efficiently for small differentials,
dependant on the time duration.

Breakers are good for one time usage of one fault and then they need
to be replaced for any warrantied usage.

If the breaker interupts a fault, it should be replaced.No warranty
will honoured after that.

I don't have a link at this time

There are no hydrogen molecules in water and the oxygen in water isn't
flammable either.

Water is inert and contains no energy to be used. Get some basic chemistry
first.

Quite simply put, for some of the boneheads here.

NiCads and NiMh batterries are designed to take a current charge forever.

Oh yeah, I can charge a battery and use it six months later fully
charged. The nicads will be cooked because you keep them on charge,
just in case you need them but when you remember them six months
later they are cooked and won't last 5 minutes in the camera.

It takes a complete idiot to deny they can short out all by
themselves. Three, loose in a bag can short themselves out.
referring to AA batteries doing the physically impossible

Did they have electricity back in 1994?

I have been around so long with this stuff I believe I invented the
diode in 1941 but I am not familiar with the solar panel usage
requirements of them. (no P & N substrate explanations please. I wrote
the GE manual...LOL)

NOTE: do not pass ground wires through metal holes or cable clamps
with two screws on a metal surface.

There is **NOT*** enough energy in a lightning bolt to power your
house for more than an hour...if that. Do the math.
The figures escape me but let's say it puts out a roughly MWatt of
power for 100 nanoseconds?
100 x 10-9 x 1 x 106 / 3600 (sec/hr) = 0.0027 wH
oooops.... Wouldn't light your home for a 1/2 second.
OK..OK.. multiply the figures time 100 or 1000. Now it would light a
100W bulb for 1 second.

The IEEE-232 standards were never followed or known by many.

Fossil fuels are still renewable and being cxreated as we speak.

Children are venerially created.

If you want to discuss this then fine, otherwise go fuck yourself like
your mother did.

Can you let go of my dick before it explodes on ya, goofball?

Petroleum is not related to Natural gas.

I would rather work at my $100/hour job than at chopping wood for hours to save $3/hour

I have no license, I wire and inspect other's wiring for a job and work for a medium size electrical utility.

As a design engineer of transformers for 10 years I happen to know you are full of shit.

I am a Protection & Control Tech by profession and have experience with control systems

Try spelling "bus" correctly! Maybe your brain will start again. Probaby not, you fucking loser.
Referring to the correctly spelled word 'buss' as used in real electrical terminology
http://tinyurl.com/5ctml

X10 signals are transmitted just after the voltage waveform zero crossing. This is in order to avoid conflicts with SCR and Triac peak waveform switching spikes from load type devices such as lamp dimmers.
control module misinformation

Besides when they on any line they will pull of the meter as a disconnect point.
speaking of power line guys miles away removing YOUR electrical meter for THEIR safety

My workplace has been throwing out huge digitizing pallettes (like 24 x 36" units)
in alt.sewing.mach-embroider

The majority prefers top posting.

Not one of your suggesters listened to what the OP requested...LOL

Get your tear ducts flushed by a knowledgeable optometrist.

Not many materials have the huge exponential resistance/heat curve aluminum does. Overload doesn't make it glow like copper...it flashes and explodes.

A bathroom fan motor would never push hot air down ten feet or cold up ten feet.

Bathroom fans have a hard time pushing 55 cfm through a 3-4" pipe 20 horizontal feet. They are made to vent smells and humid air horizontally only.

Why not spend the money on a contract with the grid company and get an exclusive line to your house and never have brownouts.

Usenet rules dictate top posting for readability

Many cell modems are set up to filter bottom posts out.

Cell modems do not cut off anything.

What security flaws.
##referring to Outlook Express##

10 pounds per gallon Imperial. That gallon is totally unique to the US....ooops..I think all gallons are unique to the US now.

The standard Imperial gallon the whole world used weighs 10 pounds exactly.

The copper isn't worth more than 5 cents per pound. It is classed a mixed copper and nobody wants it.

Hey moron! The copper is considered "mixed" copper and is worth about $0.02 per pound, if he seperates it all.

Just don't ever lose weight. Toxins are stored in your fat cells.

Did you know, **NO***, I repeat ***NO*** death has ever been related to PCBs?

Insulated square copper wires from a dry transformer are not 99% copper and take a lot of work to remove the insulation.

I have tonnes of insulated copper wire if you want it. I think you could almost have for the picking it up. How many bins can you take per year

50 lbs? We have it by the bin full. Mostly #6 to 650 MCM. I beleive you would have to leave a bin and then pick it up full later to compete with the current scrapper.

Can't this tranformer be used by somebody to generate a second 120V from a single phase 120V inverter? It sounds pretty beefy.

BTW: once you knock the wedge out of the coil form the laminations will be easier to get out. This keeps them from buzzing until the varnish and other impregnations go into it.

All you guys have a bad Christmas or Jewish and didn't see Santa or something?

Run each signal twisted with a ground for noise. RD twisted with gnd as a pair, TD twisted around ground as a pair etc... This means signal/logic ground not power ground or case ground, if they are different. Do not
connect the other ends of the ground conductors.

Tar pitch in a flourescent ballast does ***NOT*** contain PCBs and probably never did.

Religion is not genetic or even herodigious

I believe the warmest part of the lake is just below the ice. As the water frezes it rises to the top and joins the other ice formations.

Gel cell won't cut it when it comes to putting out 100A or more. They cook in one spot and the rest of the electrolyte doesn't circulate

fast enough.

There is nothing standard about USanian measurements. They changed their sizes to avoid trading with the rest of the world. This worked for a few centuries but the rest of the world moved on to the metric system to avert the confusion the US caused.

Ever put your ohmmeter (do I need to explain an ohmmeter also?) across a capacitor? It measures infinity after charging to the supply voltage because the electrolyte is an insulator.

Electrolytes are not conductors of electricity in a capacitor.

If the electrolyte conducted it would be a resistor.

I doubt they are 4 farads. More likely 4 microfarads uf.
referring to 4000mfd caps

Sometimes it is an ego boost to have these so-called "professionals" come and beg for information because they can't our toys do what the good guys can but I would never hire them given a choice.

Do you measure altitude in degrees? Many aeronautical people would disagree with you.
referring to solar azimuth/altitude thread

My house is filled with motion detectors. They don't all operate lights. They mostly signal my house control computer and it decides what to do and when.

Enlighten please (like it really matters...LOL)

I will hand stitch my embroidery before I would pay that kind of money...LOL

A 50Hz transformer needs double the iron a 60Hz transformer needs for the same VA capacity.

Does it test CTs with real current or just voltage?

It doesn't really matter where the secondary current comes from, secondary exciting or primary current exciting, the voltage developed or excited across it will be about the same.
talking about an OPEN circuit CT transformer

High voltage spikes want to keep going at the end and this is where your saturating core transformer core is located behind the fuse.

Moving a kill-a-watt unit around is like using it on somebody else's house and telling the person's load.

oooops. A flourescent with a filament?
not knowing how most fluorescents start up

You are a stupid basterd.

Ever considered anxiety medication? Chest pains for a man is a classic symptom.

When confronted with many websites stating the otherwise he won't address the issue but repeats his crap again like a child stamping his feet.
Oh, the Irony!

What are you doing up at this ungawdly hour? I just got finished embroidering about 10 items, including a flight bag for golf clubs.
in alt.sewing.mach-embroider

I just love women with front loading bobbins.
in alt.sewing.mach-embroider

I doubt a 6 needle machine would be faster than a 1 needle machine unless you do repetitive patterns.
in alt.sewing.mach-embroider

I had many problems with this and damaged my machine a few times. It was the needles. Find ones that have very little "hip" bump around the eye of the needle.
in alt.sewing.mach-embroider

I have found doctors absolutely ignorant and totally obstinet on these kind of issues.

I put my first child on Ritalin for a year or so when quite young. It beat going to prison for beating him black and blue.

I made a big mistake and should have "drugged" all of my children the same.

I did the chem.cut medication stuff for a few years with my first child and then found Naturopathic Doctors using homeopathy to get more lasting relief.

Homeopathics saved me thousands of dollars for operations I did not have on my children

Accupunture worked for my 1 and two year old children for ailments after the medical doctors could do nothing for.

Placebo is a completely natural cure for many ailments.

Polio Vaccine? They stopped giving that one long before HIV was invented.

You have no idea what you are talking about and either does anybody else here.

See if you can replace it with a thermal acting unit. They have a rachet on a shaft that holds thew contacts closed.
confusing motor overload with breaker

What are you doing in my group?

Milk is just plain poison for humans.

I am not a chemist but I know that cow's milk calcium molecules are a
huge irritant to human digestion and usually results in calcium

See an accupunturist for the pain and circulation
See a chiropractor to keep the structure good.
See a naturopathic doctor for the chemical imbalance.
See a medical doctor for a some poison that will make her life shorter.

Even an honest Doctor will take yoy they arte totally ignorant of
nutrition.

The medical doctors will play the time game and probably just let him
die after removing half his organs because they may be a problem.

Some things mankind should just not eat too much of and it isn't meat
typically and this may not be consistent for all people.

Do not listen to the stories of addiction. Yes, they are tough to stop
but so is insulin for a diabetic. I have stopped taking mine and it
wasn't that bad but after months of regressing I chose to return like
the other half the population.

Make sure your wrists are well warmed up before putting sudden jerky
movements to them.

Make up your mind before you mouth off like the usual Internet piece
of shit. This is a rough group and if you had followed the usual
recommendations you would have known that and have nothing to say
about it.

Not sure. IIRC the 7600G is a newer design than the SW77, so the multi-detector
chip (CXA1376) may be newer too.

Reagan described himself in the thirties and World War II as an
ardent New Dealer, awakening only to anticommunism in a bitter postwar
labor union battle with industry Stalinists. And 1938 was arguably
the most seductive year for an ardent New Dealer to join the Party, as
both liberals and communists worked side by side in organizations and
the Party line of the moment was patriotic antifascism. All of that
would end a year later when liberal suspicions about the geography of
the Party’s true loyalties were confirmed when the comrades closed
ranks around the Hitler-Stalin Pact.

Those of us who have suffered either under official, vetted history
under totalitarian regimes or under equally edited works by academia
know that a historical lie doesn't require empirical proof, merely
repetition.

Your twisted lies and stupidity are actually funny. President Reagan
was NOT refering to Government bloodsucking workers in a Public Union.
He was refering to a union fighting against a communist government.
But, your public school education renders you incapable of discerning
any difference.

In case you missed it in your drug induced stupor - In 1981 President
Reagan fired 11,000 striking air traffic controllers.

http://abcnews.go.com/US/gang-rape-charges-18-men-sparks-racial-tensions/story?id=13095476

Why hasn't the main stream media covered this story 24/7 for months on end like they did when those rednecks dragged a black guy behind their pick-up a few years back? I haven't seen one mention of this human rights atrocity on any of the news programs.

And where is Al Sharpton? Jessie Jackson? The Southern Poverty Law Center? And all the other multimillionaire defenders of civil rights? Are they prejudice against little girls? Or isn't there any money in it for them?

Just asking.

Very true. The night before last I worked a station on Turks and
Caicos using a QRP rig (5 watts out) and a whip antenna. No problem.

Directional antennas are great, but certainly not necessary.

Unless this is rhetorical question, you need to ask them. I doubt if
there is a single person reading this who is not appalled by that
action, and who does not believe that those guilty should get the
maximum penalty.

YB 400 by Lextronics (now Eton) ? Good portable , I had the pleasure
of owning one a while ago . Very sensitive ,btw . They produced two
versions, afaik . Namely , YB400 and 400PE . Wouldn't recommend an
external preamp on either one . Passive antenna (space permitting)
will invariably bring in much better performance . Solar Cycle 24 is
warming up lately ,so it may not be needed at all .

The variable conrols they used were of dubious quality . Never seen
such low grade potentiometers ever, must be from the bottom of the
barrel . Had their dual time zone clock (2 side by side) where both of
them lost time immediately irrespect of the other ... Just hope they
improved their QC, had very bad experience with M-F-J in the past ...

Z.B. didn't lure anybody into going to Afghanistan . Neither did R.R.
The insane ayatolla had KGB worried about the spread of Islamic
Radicalism outside of Iran . Even Soviet military leaders were opposed
to the intervention , but they were overruled . . . You know the rest
of the story .

The "Commie U.S. fed govt" has kept Japan in check due to the two Historical Events of August '45 . . . Nowdays , due to the lack of natural resources 25% of electric power is produces by N.power stations . At the present there are 55 of them and construction of more is in the works . A country of nearly 130 million people consumes lots of electricity to make all that 'Made in Japan' stuff .

Screw all of that.I reckon it is still Saturday in Japan, but how many hours ahead of Central Standard Time Zone in America is Japan?

I Reckon I should remember because I did a year in Vietnam in 1964.I have a few big old World Atlas books here which has all of the Time Zones all over the World, but it would take me a year to find them.

Screw all of that,,, What damn Time/Hour is it in Japan right now?

The simplest answer to all the CFL Bulb issues and
problems is the Glass Envelop A19 Configured CFL
http://www.amazon.com/dp/B003VS1HXC

The Glass Envelop acts as a Containment Chamber
for a Broken CFL and minimizes many/most of the
Hazard and Health Risks of CFL Bulbs.

The Glass Envelop A19 Configured CFL Bulb adds
about a Dollar to the Consumers Cost for the CFL
Bulb : But Saves Many More Dollars in Environmental
Handling and Clean-Up Costs related to CFL Bulbs.

"I think MII should be careful, we can all
complain about people if we put our minds to it."

Steve

"If M2 dont like his posts do as we all do to trolls ignore
them or killfile them, but to try and stifle or block freedom of expression
no matter how silly is the worse crime."

The Rifleman

"Do you think I'm making this stuff up? If so, please just go ahead and

me. To be honest, your off topic polittical posts seem to outnumber your SW
posts by a margin of about 30 to 1.

More SW, please, or I won't be seeing any of your posts."

Michael Bryant

My 'GymyBobism' collection...updated daily:
==========
some '#' bracketed text added for clarification
all cut and paste, NO modifications of ANY kind
100 % Pure GymyBob. Accept no substitutes!

We need less morons like another clone of Moron II here.
My fifteen minutes of FAME!

Your car alternator will charge your car batery up to 15.4 volts in
cold weather.

NTSC redefined it slightly off 60Hz so that power supply ripple
will move on the screen (two slightly black bands that scroll
up/down your screen

You sure spent a lot of time trying to convince me you don't knwo what
I am talking about...LOL

Voltage does not indicate state of charge well.

At 11.6 volts a 12v battery is about 50-70% charged still.

Polish solar panels are what americans called "flashlights"

There should be subsidies for solar panels but control of prices to boot.

Propane will disapate and freeze when it evaporates.

Gasoline is not nearly as volatile as hydrogen.

When I use pot I imagine everythging is perfect.

Many people have browsers that economize the download

Just another threading error creating confusion

Learn how to thread or sit back and watch for a few years.

Try to stay on topic and on thread too bean brain.

Perhaps try Outlook Express or another browser that knows how to
thread posts.

Bottom posting was the was in the 70s and 80s before threading
browsers were available cheap like OE

Another Forte Agent person that doesn't understand threading.

You use Mozzilla and haven't learned to thread.

Try Outlook Express so you can understand threading maybe.

I have been noticing many threading errors everywhere on Usenet lately.

People with OE don't seem to have the petty problems with subject
lines changing, intermingled posts and downloading binary files with
mixed posts, random pieces and many other problems all the nonOE
people have.

Bottom posting has been obsoletely by threading browsers.

Forwarding does not include headers.

Call your damn ISP and tell them your browser is multiple posting.

90% of the people in America have never operated a computer.

Let's say youre solar cell was trying to put out
14.3 volts DC and you stuck a 10 ohm meter in series with a charged
13.8 volt DC battery.

Your troll was too obvious. Try to engage the mark in conversation
first so there is, at least, some stake, like friendship for the
person listening. When the friendship is well developed then attack.
Not too obvious at first or you will lose your audience. This will
enhance your troll points.

I think outside opinions are worth much more than sales hype from the
company that made the product.
Referring to *factory* charging specifications for the batteries
they make ##

This is power grid induction through capacitive proximity

You can get fooled with another ground in the house finding it's way
back to the transformer neutral.

A thought I have is rain water from a roof on a three story home
through a micro-turbine.

Setback thermostats only work efficiently for small differentials,
dependant on the time duration.

Breakers are good for one time usage of one fault and then they need
to be replaced for any warrantied usage.

If the breaker interupts a fault, it should be replaced.No warranty
will honoured after that.

I don't have a link at this time

There are no hydrogen molecules in water and the oxygen in water isn't
flammable either.

Water is inert and contains no energy to be used. Get some basic chemistry
first.

Quite simply put, for some of the boneheads here.

NiCads and NiMh batterries are designed to take a current charge forever.

Oh yeah, I can charge a battery and use it six months later fully
charged. The nicads will be cooked because you keep them on charge,
just in case you need them but when you remember them six months
later they are cooked and won't last 5 minutes in the camera.

It takes a complete idiot to deny they can short out all by
themselves. Three, loose in a bag can short themselves out.
referring to AA batteries doing the physically impossible

Did they have electricity back in 1994?

I have been around so long with this stuff I believe I invented the
diode in 1941 but I am not familiar with the solar panel usage
requirements of them. (no P & N substrate explanations please. I wrote
the GE manual...LOL)

NOTE: do not pass ground wires through metal holes or cable clamps
with two screws on a metal surface.

There is **NOT*** enough energy in a lightning bolt to power your
house for more than an hour...if that. Do the math.
The figures escape me but let's say it puts out a roughly MWatt of
power for 100 nanoseconds?
100 x 10-9 x 1 x 106 / 3600 (sec/hr) = 0.0027 wH
oooops.... Wouldn't light your home for a 1/2 second.
OK..OK.. multiply the figures time 100 or 1000. Now it would light a
100W bulb for 1 second.

The IEEE-232 standards were never followed or known by many.

Fossil fuels are still renewable and being cxreated as we speak.

Children are venerially created.

If you want to discuss this then fine, otherwise go fuck yourself like
your mother did.

Can you let go of my dick before it explodes on ya, goofball?

Petroleum is not related to Natural gas.

I would rather work at my $100/hour job than at chopping wood for hours to save $3/hour

I have no license, I wire and inspect other's wiring for a job and work for a medium size electrical utility.

As a design engineer of transformers for 10 years I happen to know you are full of shit.

I am a Protection & Control Tech by profession and have experience with control systems

Try spelling "bus" correctly! Maybe your brain will start again. Probaby not, you fucking loser.
Referring to the correctly spelled word 'buss' as used in real electrical terminology
http://tinyurl.com/5ctml

X10 signals are transmitted just after the voltage waveform zero crossing. This is in order to avoid conflicts with SCR and Triac peak waveform switching spikes from load type devices such as lamp dimmers.
control module misinformation

Besides when they on any line they will pull of the meter as a disconnect point.
speaking of power line guys miles away removing YOUR electrical meter for THEIR safety

My workplace has been throwing out huge digitizing pallettes (like 24 x 36" units)
in alt.sewing.mach-embroider

The majority prefers top posting.

Not one of your suggesters listened to what the OP requested...LOL

Get your tear ducts flushed by a knowledgeable optometrist.

Not many materials have the huge exponential resistance/heat curve aluminum does. Overload doesn't make it glow like copper...it flashes and explodes.

A bathroom fan motor would never push hot air down ten feet or cold up ten feet.

Bathroom fans have a hard time pushing 55 cfm through a 3-4" pipe 20 horizontal feet. They are made to vent smells and humid air horizontally only.

Why not spend the money on a contract with the grid company and get an exclusive line to your house and never have brownouts.

Usenet rules dictate top posting for readability

Many cell modems are set up to filter bottom posts out.

Cell modems do not cut off anything.

What security flaws.
##referring to Outlook Express##

10 pounds per gallon Imperial. That gallon is totally unique to the US....ooops..I think all gallons are unique to the US now.

The standard Imperial gallon the whole world used weighs 10 pounds exactly.

The copper isn't worth more than 5 cents per pound. It is classed a mixed copper and nobody wants it.

Hey moron! The copper is considered "mixed" copper and is worth about $0.02 per pound, if he seperates it all.

Just don't ever lose weight. Toxins are stored in your fat cells.

Did you know, **NO***, I repeat ***NO*** death has ever been related to PCBs?

Insulated square copper wires from a dry transformer are not 99% copper and take a lot of work to remove the insulation.

I have tonnes of insulated copper wire if you want it. I think you could almost have for the picking it up. How many bins can you take per year

50 lbs? We have it by the bin full. Mostly #6 to 650 MCM. I beleive you would have to leave a bin and then pick it up full later to compete with the current scrapper.

Can't this tranformer be used by somebody to generate a second 120V from a single phase 120V inverter? It sounds pretty beefy.

BTW: once you knock the wedge out of the coil form the laminations will be easier to get out. This keeps them from buzzing until the varnish and other impregnations go into it.

All you guys have a bad Christmas or Jewish and didn't see Santa or something?

Run each signal twisted with a ground for noise. RD twisted with gnd as a pair, TD twisted around ground as a pair etc... This means signal/logic ground not power ground or case ground, if they are different. Do not
connect the other ends of the ground conductors.

Tar pitch in a flourescent ballast does ***NOT*** contain PCBs and probably never did.

Religion is not genetic or even herodigious

I believe the warmest part of the lake is just below the ice. As the water frezes it rises to the top and joins the other ice formations.

Gel cell won't cut it when it comes to putting out 100A or more. They cook in one spot and the rest of the electrolyte doesn't circulate

fast enough.

There is nothing standard about USanian measurements. They changed their sizes to avoid trading with the rest of the world. This worked for a few centuries but the rest of the world moved on to the metric system to avert the confusion the US caused.

Ever put your ohmmeter (do I need to explain an ohmmeter also?) across a capacitor? It measures infinity after charging to the supply voltage because the electrolyte is an insulator.

Electrolytes are not conductors of electricity in a capacitor.

If the electrolyte conducted it would be a resistor.

I doubt they are 4 farads. More likely 4 microfarads uf.
referring to 4000mfd caps

Sometimes it is an ego boost to have these so-called "professionals" come and beg for information because they can't our toys do what the good guys can but I would never hire them given a choice.

Do you measure altitude in degrees? Many aeronautical people would disagree with you.
referring to solar azimuth/altitude thread

My house is filled with motion detectors. They don't all operate lights. They mostly signal my house control computer and it decides what to do and when.

Enlighten please (like it really matters...LOL)

I will hand stitch my embroidery before I would pay that kind of money...LOL

A 50Hz transformer needs double the iron a 60Hz transformer needs for the same VA capacity.

Does it test CTs with real current or just voltage?

It doesn't really matter where the secondary current comes from, secondary exciting or primary current exciting, the voltage developed or excited across it will be about the same.
talking about an OPEN circuit CT transformer

High voltage spikes want to keep going at the end and this is where your saturating core transformer core is located behind the fuse.

Moving a kill-a-watt unit around is like using it on somebody else's house and telling the person's load.

oooops. A flourescent with a filament?
not knowing how most fluorescents start up

You are a stupid basterd.

Ever considered anxiety medication? Chest pains for a man is a classic symptom.

When confronted with many websites stating the otherwise he won't address the issue but repeats his crap again like a child stamping his feet.
Oh, the Irony!

What are you doing up at this ungawdly hour? I just got finished embroidering about 10 items, including a flight bag for golf clubs.
in alt.sewing.mach-embroider

I just love women with front loading bobbins.
in alt.sewing.mach-embroider

I doubt a 6 needle machine would be faster than a 1 needle machine unless you do repetitive patterns.
in alt.sewing.mach-embroider

I had many problems with this and damaged my machine a few times. It was the needles. Find ones that have very little "hip" bump around the eye of the needle.
in alt.sewing.mach-embroider

I have found doctors absolutely ignorant and totally obstinet on these kind of issues.

I put my first child on Ritalin for a year or so when quite young. It beat going to prison for beating him black and blue.

I made a big mistake and should have "drugged" all of my children the same.

I did the chem.cut medication stuff for a few years with my first child and then found Naturopathic Doctors using homeopathy to get more lasting relief.

Homeopathics saved me thousands of dollars for operations I did not have on my children

Accupunture worked for my 1 and two year old children for ailments after the medical doctors could do nothing for.

Placebo is a completely natural cure for many ailments.

Polio Vaccine? They stopped giving that one long before HIV was invented.

You have no idea what you are talking about and either does anybody else here.

See if you can replace it with a thermal acting unit. They have a rachet on a shaft that holds thew contacts closed.
confusing motor overload with breaker

What are you doing in my group?

Milk is just plain poison for humans.

I am not a chemist but I know that cow's milk calcium molecules are a
huge irritant to human digestion and usually results in calcium

See an accupunturist for the pain and circulation
See a chiropractor to keep the structure good.
See a naturopathic doctor for the chemical imbalance.
See a medical doctor for a some poison that will make her life shorter.

Even an honest Doctor will take yoy they arte totally ignorant of
nutrition.

The medical doctors will play the time game and probably just let him
die after removing half his organs because they may be a problem.

Some things mankind should just not eat too much of and it isn't meat
typically and this may not be consistent for all people.

Do not listen to the stories of addiction. Yes, they are tough to stop
but so is insulin for a diabetic. I have stopped taking mine and it
wasn't that bad but after months of regressing I chose to return like
the other half the population.

Make sure your wrists are well warmed up before putting sudden jerky
movements to them.

Make up your mind before you mouth off like the usual Internet piece
of shit. This is a rough group and if you had followed the usual
recommendations you would have known that and have nothing to say
about it.

No, Dave, Priest is right.

He asked why the news _programs_ -- that is, the nightly news shows with the huge audiences -- haven't made this horrific Black crime known to their viewers as they did the far less significant dragging case. And he asked why the billionaire's media haven't made this story a _cause celebre_ as they do in cases where those in "protected classes" are victims of Whites.

It's a totally legitimate question.

And the answer, as Priest probably knows, is that the billionaire's media have a racial agenda -- an agenda that includes the total acceptance by White Americans of 1) multiracialism, 2) multiculturalism, and 3) their own disappearance. Anything that advances that agenda is promoted vociferously by the media; anything that would impede that agenda is downplayed.

Careers and promotions depend on it.

I would be willing to wager a very substantial sum that you will _not_ see major media reporters or commentators on this tragedy -- which is a case of interracial rape -- bringing up the very relevant fact that interracial rape is engaged in by Blacks at a rate literally _thousands_ of times greater than that of Whites.

What you _will_ see them saying or implying is that we must _never under any circumstances_ draw any conclusions about race from this outrage or others like it, and that we are _morally required_ to regard what happened in a race-neutral way.

With every good wish,

Kevin Alfred Strom.

If we used Major Douglas's Social Credit (instead of fractional reserve banking) there would be no need for taxes most of the time. Instead, there would be a social dividend paid directly to every person and corporations would get none of it.

But, assuming that there would still be some emergencies and some years in which taxation was still necessary, there are many good arguments why _only_ corporations should be taxed and individuals not taxed at all.

1. Corporations are created by the state and given special privileges by the state and therefore deserve to bear the burden of record-keeping and payment of taxes to support those privileges. (And corporations by their very nature keep records anyway. Record-keeping is an absurd and onerous burden to place on all individuals.)

2. The argument will be made that "corporations just pass along their taxes to consumers." While that is true, it is actually an _advantage_ because consumers could still choose not to pay by simply not buying (or buying far less) from corporations.

3. Most important of all, citizens would no longer have to record all of their financial transactions and the state would no longer have the rationale -- or the right -- to snoop into any individual's financial life.

With every good wish,

Kevin Alfred Strom.

I'm listening to 873 KHz, appears to be a Japanese station, broadcasting tsunami alerts for several Japanese prefectures for up to 6'. Lot of languages: Japanese, English, Korean, Spanish (wouldn't think there would be a lot of Spanish speakers in Japan...)

Anyone on the west coast hear it? Pretty strong signal here in the ROK, and I don't get a lot of Japanese stations.

Looks like Ol' Joe was right -- the tap-dancing has begun.

-My- ignorance, you say? It is PAINFULLY CLEAR that Reagan is DEFENDING
collective bargaining and that YOU missed the point. Nice tap dance but
no cigar.

1) Gov. Walker wants to kill collective bargaining.

2) Gov. Walker admires, quotes and even tried to compare himself to
Saint Regan.

3) Unfortunately for Walker, Saint Reagan was DEFENDING collective
bargaining.

Let me pose my question again, typing real slow, to see if you can focus
and address the point.

>> Gee, I wonder how the brain dead tea-baggers are going to tap dance
>> around their Saint, Ronnie Reagan, actually -defending- collective
>> bargaining.

They love Walker for busting collective bargaining.

They love Regan -- who most inconveniently supports and defends
collective bargaining.

Oh, the hypocrisy, the irony!

That's OK - half of our community is Asian. It's actually a pretty
nice place to live, the people are kind and respectful to each other,
and it's a fun bunch.

snicker, reagan was smart enough to know that every worker in the
eastern block were employees of the state. that is why he supported
independent labor unions for government employees, he was far seeing
in that respect.
as far as patco is concerned, he was far enough seeing in that one
to, he did not attempt to block the controllers from ever forming a
union again, he was far seeing. independent labor unions fight anti-
democratic forces, such as conservatism/.libertarianism/fascism/
communism:) reagan was a union man thru and thru:)

feces ridden bank that supported scott "Moammar Gadhafi" walker, shut

http://www.alternet.org/newsandviews/article/515607/awesome%3A_wiscon...

Awesome: Wisconsin Firefighters Shut Down Bank That Funded Walker

Everybody knows the GOP's biggest weakness is money, so why not hit
'em in the sweet spot? That's what many amazing Wisconsin firefighters
did yesterday when they collectively began withdrawing their funds
from Madison's M&I Bank -- whose executives and board members were
among the highest donors to Governor Scott Walker's campaign.

Heeding a call by Firefighters Local 311 President Joe Conway to 'Move
your money,' union members withdrew over $100,000 from the bank, with
some reports stating that number is as high as $192,000. Either way,
it was a hefty enough chunk of change that M&I shut its doors and

closed for the day at 3PM.

This is a very simple, very peaceful way to inflict some serious damage on the money-grubbers; super kudos to the Firefighters Union.

Anecdoctally -- 'M&I Bank received $1.7 billion in bailout money via President George W. Bush's Troubled Assets Relief Program. The bank was acquired by the Bank of Montreal in December of 2010 for $4.1 billion in stock,' reports Dane101.

UPDATE: Stranded Wind over at DailyKos has photos of the protest outside M&I, and says the ante has been upped to $600,000! 'What these pictures show are six hundred ordinary citizens descending on the M&I branch near the Wisconsin Capitol after learning of their purchase of the gubernatorial election last November. Two firefighters with old school ideas about saving had over $600,000 between the two of them and they demanded cashier's checks on the spot.'

Somebody (in Hotlanta) in the alt.gossip.celebrities newsgroup said
Japan is fourteen hours ahead of her time zone.She said she is in
Atlanta.
I think that is about right.I have a great big old raggity World Atlas
book floatin around here somewhere.The book has the World Time Zones in
there.I am too lazy to dig that book up though.

G.E.Reveal 60 Watt Incandescant Light Bulbs are Tuff.The bulb itself
didn't pop.A few strands of that copper wire had touched together,
that's what POPPED.

So he seems to be copying some the spin from the Europeans.

Well DAB is failing here in the UK, and is doing far worse in other
European countries, and I can't see any sign of HD-Radio doing any
better over there in the US.

Richard E.
